

EVENT HISTORY WINDOW

The system automatically records the history of events associated with each violation item and allows the user to view the data through an Event History Window and update the information as required. This window may be accessed from the OSHA 1B screen or the OSHA 2B screen.

The field values for the first Event History record shown above are as follows:

Event Date =	Issuance Date
Event Code =	Z (signifies that this is the system generated record containing the ORIGINAL violation data)
Action Code =	A (Add)
Cit Type =	Citation Classification for the displayed violation
Penalty =	Original penalty amount
Abate Date =	Date entered in Item 14b, Final Abatement Date
Final Order =	Final Order or Appeals Board Decision

C-166, Attachment B (08/01/94)
