through
May 31, 2009**

SAFETY

- Section 3.27** On all energized circuits or equipment carrying four hundred and forty (440) volts or over, as a safety measure two (2) or more journeymen must work together. All other safety laws of the State of California shall be complied with.
- Section 3.28** All workmen employed under the terms of this Agreement shall observe all safety precautions in accordance with the safety orders of the Industrial Accident Commission. They shall also observe instructions of the Employer in the matter of safety providing such instructions are not in conflict with the safety orders of the Industrial Accident Commission. Adequate protective devices shall be supplied to workmen by the Employer. Such devices or safety equipment shall be used in accordance with recognized practices in the trade.
- Section 3.29** Workmen employed under the terms of this Agreement shall do all electrical construction, installation, or erection work, including, but not limited to, PVC, EMT, P&C ducts and ridged Electrical conduit raceway systems, and all electrical maintenance thereon, including the final running tests. This shall include the installation and maintenance of all electrical lighting and the installation and maintenance of temporary wiring including all work pertaining to luminous ceilings, heat and power equipment, electronic equipment and apparatus, and all work pertaining to communications systems, including fiber optics. Handling and moving of all electrical material, equipment and apparatus on the jobs shall be considered electrical work.
- Section 3.30** All work joining, splicing, and insulating, and the placing of flame proof covering where wiped lead joints are necessary and the installation of potheads, oil switches, and oil fuse cutouts shall be performed by Cable Splicers. Journeymen only shall be used in assisting Cable Splicers on energized circuits. Cable Splicers shall not be required to work on wire or cables when the difference in potential is over three hundred (300) volts between any two (2) conductors or between any conductor and ground unless assisted by another Journeyman Wireman. In no case shall Cable Splicers be required to work on energized cables carrying an excess of four hundred and forty (440) volts. This section shall not be construed to mean the Journeymen applying factory kits shall receive Splicer wages.

IBEW - NECA
INSIDE AGREEMENT
JUNE 1, 2006 THRU MAY 31, 2009

Section 3.31 All drop cord fixtures, repair and the preparation of conduit shall be done only under the direct supervision of a Journeyman, whether in the shop or on the job as a part of the work to be performed under this Agreement. Such work shall also include welding, burning, brazing, bending, drilling, and shaping of all copper, angle iron, and, brackets to be used in connection with the installation and erection of electrical wiring equipment. The chasing and channeling necessary to complete electrical installation work shall be performed by workmen employed under the terms of this Agreement.

Section 3.32 The cutting and threading of all conduits and nipples shall be performed by workmen employed under the terms of this Agreement and where pipe cutting and threading machines are used on the job, such workmen shall also operate such machines.
