March 15, 2002

**IMPORTANT NOTICE
TO AWARDING BODIES AND INTERESTED PARTIES
REGARDING THE
TELECOMMUNICATIONS TECHNICIAN**

Based upon the attached communication dated February 20, 2002, from Bill Quirk of the Communications Workers of America to Chuck Cake, Chief Deputy Director of the Department of Industrial Relations, the Office of the Director has determined the following:

Effective March 15, 2002, for all projects advertised for bids as of this date and prospectively which involve voice, data, and video communications work, the scope of work for this determination is clarified to exclude conduit work except in cases involving conduit runs of less than or equal to ten (10) feet within telecommunications rooms/closets.

Bill Quirk - Conduit issues

From: Bill Quirk
To: ccake
Date: 02/20/2002 5:10 PM
Subject: Conduit issues

>>> Bill Quirk Wednesday, February 20, 2002 3:27:57 PM >>>

Dear Chuck,

I hope the information below will help you.

For C7 licensed contractors with whom CWA holds a collective bargaining agreement in the State of California, I believe the following statement covers 95 % of work performed by our members.

The scope of work that CWA members perform requires the running of conduit from time to time. This conduit work is typically coincidental to Telecommunications work and normally in telecommunications rooms / closets. Usually the conduit run is not longer than 10 feet.

Sincerely,

Bill Quirk
Assistant to Vice President
Communications Workers of America, District 9

August 31, 2001

**NOTICE REGARDING ADVISORY SCOPE OF WORK FOR
THE TELECOMMUNICATIONS TECHNICIAN
GENERAL PREVAILING WAGE DETERMINATIONS**

The following work, which is part of the Collective Bargaining Agreement between Pacific Bell and Communications Workers of America, is not recognized by the Department of Industrial Relations in the August 22, 2001 issuance of the Telecommunications Technicians' general determinations, C-422-X-1-2001-1, C-422-X-1-2001-1A, and C-422-X-1-2001-1B. These duties **SHALL NOT** apply to the Telecommunications Technician classification. The minimum rate of pay for this work shall be that of the appropriate construction crafts/classifications published in the Director's General Prevailing Wage Determinations.

- Repair and maintain AC & DC power equipment in central office.
- Maintains operational fuel tanks.
- Maintain engines and turbines from 6 KW to 2500 KW.
- Testing and maintaining power alarms.
- Erect overhead ironwork including cable racks and earthquake bracing to support cables and equipment.
- Work with heavy duty power equipment and hand tools in the construction and repair of outside plants cable facilities, conduit and pole lines.
- Drive vehicles with 3 or more axles or tow other vehicles of 6000 pounds or more.
- Perform various types of construction operations which all require heavy physical labor and lifting.
- Perform preventative maintenance on all assigned company tools, equipment and motor vehicle.
- Perform repetitive task, e.g., manually digging poles and holes.
- Digging with shovel, jackhammer, etc. to find buried trouble.

COMMUNICATIONS TECHNICIAN (EM)

ADDITIONAL BASIC TEST **Digital Technology Skill Assessment Test (DTSAT)** *Note: Effective May 1, 1996, this will become a BASIC TEST.*

SOME OF THE TASKS AND DUTIES

1. Repairs and maintains AC and DC power equipment in central office.
2. Locates trouble by inspecting and testing equipment and analyzing test data, trouble reports and computer diagnostics or printouts.
3. May perform many tedious, repetitious test procedures to locate trouble.
4. Clears trouble by cleaning, adjusting, or replacing equipment; or by computer input commands; repairs faulty wiring.
5. Performs routine equipment maintenance such as inspecting, cleaning, testing and lubricating.

COMMUNICATIONS TECHNICIAN (EM)
CALIFORNIA MARKETS
JOB DESCRIPTION NUMBER: 01235

SOME OF THE TASKS AND DUTIES (CONTINUED)

6. Keeps detailed record of nature of work and item of equipment involved.
7. Observes important housekeeping and safety standards.
8. Could be sent to work in offices other than regular assigned office which may require driving of Company vehicle between locations. Ability to drive a manual transmission may be required.
9. Tests and controls equipment using computer input/output devices.
10. Uses high precision measuring devices and meters that may weigh up to 60 lbs., in testing of new service.
11. Uses various equipment to isolate trouble, and coordinates trouble clearing with Surveillance Center and Power Maintenance Engineers.
12. May perform corrective/preventive maintenance and analyze computer printouts to troubleshoot operational and data problems.
13. Some degree of expertise in the use and maintenance of various manufactured power equipment (e.g., Lorian, Ratelco).
14. May be required to use oscilloscopes and other sophisticated electronic test equipment to isolate trouble and test power equipment.

NETWORK TERMINAL EQUIPMENT CENTER (NTEC)

1. Performs the hands-on maintenance of Network Terminal Equipment (NTE), and the maintenance and provisioning activities associated with NTE for message trunks and special services circuits.
2. May work on circuit cross-connects on distributing frames for maintenance or provisioning operations, or both.
3. May require work on transmission equipment such as carrier (Channel Banks), Digital Access Cross-Connect System (DACCS), Digital System (DDS), Metallic Facility Terminal (MFT), terminal and signaling equipment, bridges, equalizers and repeaters.
4. May prepare circuit sketches from Work Order Record and Details (WORD).
5. Processes Special Service Orders (SSO's), Trunk Facility Orders (TFO's), and WORD documents.
6. May be required to provide maintenance and provisioning on Pair Gain Terminal.

POWER

1. Performs the hands-on maintenance of central office AC and DC power equipment.
2. Reads and interprets CD's, SC's, T-Wiring diagrams and electronic circuits.
3. May work with analog and digital power equipment.
4. Knowledgeable of central office grounding technology.
5. Maintains engines and turbines of all sizes from 6KW to 2500 KW.

**COMMUNICATIONS TECHNICIAN (EM)
CALIFORNIA MARKETS
JOB DESCRIPTION NUMBER: 01235**

SOME OF THE TASKS AND DUTIES (CONTINUED)

6. Knowledgeable of power requirements of various types of central office switching equipment.
7. Maintains operational fuel tanks to include the prevention and elimination of contaminants.
8. Testing and maintaining power alarms.
9. Operational testing and maintenance of wet cells, dry cells, rectifiers, ringing and tone plants, DC power boards, AC power panels and circuit breakers.
10. May observe vendor activities to insure Method of Procedures are followed and work is being performed safely.
11. Schedules and conducts annual DC operational evaluations of power plants.
12. Familiar with governmental regulations for the handling, monitoring and storing of petroleum fuels.
13. Familiar with Spill Prevention Control and Countermeasure and Hazardous Material Management Plans.

ENVIRONMENT

1. May work entire shift in a switching control center.
2. Power areas may be crowded with bays of equipment and narrow aisles.
3. The room temperature may rise above or fall below normal, and there is constant noise.
4. Control center environment may require prolonged periods of sitting with continuous ringing of telephone.
5. Spends most of shift moving about, standing and/or climbing ladders.
6. Wears safety glasses, rubber gloves and other protective equipment.
7. May work under pressure to meet deadlines.
8. May work with live voltages, AC and DC.
9. May be required to sit at VDT for long periods of time, researching orders in various systems.
10. Works with engines and Uninterruptible Power Supplies (UPS) equipment that are noisy.
11. Works with hazardous materials such as battery acid, diesel fuel and oil.
12. May work under pressure to prevent or restore service during a power interruption or commercial power failure.
13. May be required to work on engines in inclement weather.

COMMUNICATIONS TECHNICIAN (BROADBAND)

TIME-IN-TITLE 30
JOB DESCRIPTION NUMBER 01250

JOB FAMILY Technical

HOURS Day, evening and night shifts. Must be available for overtime, emergency callouts, weekends and Holiday work.

BASIC TEST Digital Technology Skill Assessment Test (DTSAT)

SOME OF THE TASKS AND DUTIES

1. Installation and maintenance of consumer Broadband headend equipment and associated equipment. Able to perform to FCC standards.
2. Works with amplitude modulation principles; modulation index; sidebands and the frequency domain; amplitude modulation power distribution; single-sideband communications, frequency conversion.
3. Performs automated 24-hour FCC testing procedures: creating test plan; selecting tuner configuration and CSO/CTB system measurement; formatting RAM card; making programming and reviewing test.

COMMUNICATIONS TECHNICIAN (BROADBAND)
JOB DESCRIPTION NUMBER 01250

SOME OF THE TASKS AND DUTIES

4. Uses required equipment: vector scope; wave form monitor; video measurements set; equipment set up and operation; video testing procedures: FCC proof-of-performance testing; chrominance/luminance delay; differential gain; differential phase.
5. Uses passive signal combining networks: splitters, directional couplers, taps, and signal combiners; active signal combining: combiner amplifiers, post amplifiers, and headend driver amplifiers; headend signal combining.
6. Uses basic concepts; processing requirements; over-the-air broadcast television. Single-channel FM terrestrial microwave; TVRO satellite; FM off-air; local origination; commercial insertion; satellite stereo TV audio; data services; AML microwave.
7. Must meet specific quality, production, and safety standards.
8. Install, repair and perform preventative maintenance functions on designed circuits, including electronic equipment for video, data and Audio applications.
9. Works with hand tools and a wide variety of electronic test equipment.
10. Works and coordinates with other groups and interfaces with customers, vendor and other communication companies.
11. Keeps accurate records (e.g., time reporting, repair tickets and installation logs).
12. Installs inside wiring and cable runs, and connects color coded wire in the cable to terminals in equipment mounting.
13. Tests to verify the service was installed properly, and makes notations on the service order to indicate changes and/or completion.
14. Drives a company vehicle.
15. Coordinates plug-ins, including unpacking, ordering, tracking, shipping, and storage.
16. Will be required to read and interpret broadband design and strand maps.

ENVIRONMENT

1. Works most of the time at Company locations, which requires the ability to interface with business people.
2. May spend long periods of time in cramped equipment areas.
3. Must climb ladders (maximum 28 feet).
4. Must wear safety glasses, safety helmet, heeled boots and appropriate safety attire as necessary.
5. Commutes daily from job to job (may involve long distances).
6. Crawls, pulls cable and works in confined spaces.
7. May be required to handle items weighing 26 - 60 pounds (test equipment, manhole covers, etc.).
8. Performs all assigned work in an effective and efficient manner to meet service deadlines, frequently under pressure.

BASIC TEST

Digital Technology Skill Assessment Test (DTSAT)

SOME OF THE TASKS AND DUTIES

1. Repairs and maintains electronic digital switching equipment in central offices using software analysis techniques.

COMMUNICATIONS TECHNICIAN (ESS)
NETWORK OPERATIONS
JOB DESCRIPTION NUMBER: 01241

SOME OF THE TASKS AND DUTIES (CONTINUED)

2. Locates trouble by inspecting and testing equipment and analyzing test data, trouble reports, and computer diagnostics and printouts.
3. May perform tedious, repetitious test procedures to locate trouble or to complete routine tasks.
4. Clears trouble by cleaning, adjusting, or replacing equipment; or by computer input commands; repairs faulty wiring.
5. Performs routine equipment maintenance such as inspecting, cleaning, testing and lubricating. May also use software to perform system evaluation routine maintenance.
6. Keeps detailed records of nature of work and item of equipment involved.
7. Complies with safety and housekeeping standards.
8. Will be dispatched to work at various locations by the Control Center and will be required to drive own or Company vehicle between locations. Ability to drive manual transmission may be required.
9. Interfaces with various computers. Tests, and controls equipment, using computer input/output devices such as teletypewriter and Video Display Terminal (VDT).
10. Will be required to use oscilloscopes and other sophisticated electronic test equipment to isolate trouble and test ESS equipment.
11. Coordinates trouble clearing with other work groups, e.g., outside repair forces or other communication companies. Some work groups are in distant offices.
12. Lifts test equipment weighing up to 45 lbs.
13. Modifies critical software routing memory requiring precise and accurate performance.

COMPLEX ORDER AND PROVISIONING:

1. Reviews and analyzes all customer service input requests for viability and translations requirements.
2. Negotiates due dates with originating department.
3. Formats, types and verifies complex and Centrex service order information for entry into Store Program Controlled Switches (SPCS). Requires a great deal of accuracy and attention to detail.
4. Works with several mechanized systems and switch types, each requiring different transactions and input formats.
5. Accesses mechanized system via an interface system to extract customer service order activity for input to the SPCS.
6. Inputs commands to mechanized systems to access the switch and send preformatted recent change messages to the switch.
7. Enters recent change information manually into the switch if system interface is unavailable.

**COMMUNICATIONS TECHNICIAN (ESS)
NETWORK OPERATIONS
JOB DESCRIPTION NUMBER: 01241**

SOME OF THE TASKS AND DUTIES (CONTINUED)

8. Verifies machine translations for accurate input, using mini-computer programs and raw data dumps (octal to binary to decimal).
9. Interfaces with other work groups within Operations and Marketing as a Subject Matter Expert on translation-related troubles, procedures and feature operations.
10. Prepares Centrex conversion (USOC to machine language) used by other departments for maintenance.
11. Puts information for Centrex service orders into mechanized system files to be used by other work groups to complete assignment of facilities.
12. Interfaces with various support systems through a single system access, windowing computer system (i.e., COSMOS, CCATS, SORD, APTOS, MARCH) as well as participates in coordination meetings to ensure customer request is met.
13. Sorts, matches and files service orders and worksheets obtained from various sources.
14. Handles telephone calls from various work groups to coordinate the input of certain service orders into the switch.
15. May handle a high volume of activity and will be expected to meet due dates and commitments to customer.
16. Uses various computer systems for data entry collection, analysis and verification of assignments.
17. May initiate or receive contacts to clarify and resolve any issues resulting from incomplete or inaccurate service request, or customer service affecting discrepancies. Analyzes and decides what action to take to resolve the discrepancy by verifying various computer systems and the switch.
18. Participates in working towards meeting group objectives.

ENVIRONMENT

1. Works with others in the Control Center or may work alone in central offices.
2. Spends most of shift walking, standing, or sitting in a confined environment.
3. May include extensive driving under all road and weather conditions.
4. May be loaned to work in various offices within the same exchange.
5. May wear eye protection.
6. May include repetitive bending and lifting of equipment.
7. May need to meet constant due dates.
8. May require climbing stairs to get to work location.
9. May require ladder climbing.
10. May require stooping, bending, and reaching while working on equipment.

COMMUNICATIONS TECHNICIAN (ESS)
NETWORK OPERATIONS
JOB DESCRIPTION NUMBER: 01241

ENVIRONMENT (CONTINUED)

COMPLEX ORDER AND PROVISIONING:

1. May spend long periods of time sitting at own desk in front of a PC.
2. Required to handle large volumes of work and meet constant deadlines.
3. Will work in a self-directed work team environment.
4. Should be a self-starter, self-motivated and work with minimal supervision.
5. Flexible to the needs of the customer (customer advocate).
6. Adaptable to change.

5. Installs A.C. lighting including conduit and other electrical fittings using vendor specifications and drawings.

EQUIPMENT INSTALLATION TECHNICIAN
CALIFORNIA MARKETS
JOB DESCRIPTION NUMBER: 12691

SOME OF THE TASKS AND DUTIES (CONTINUED)

6. Installs D.C. power equipment using vendor specifications and drawings.
7. Analyzes layout cabling and wiring schematics using vendor specifications and drawings in order to determine work to be done and sequence of tasks.
8. Prepares detailed connecting sheets of cable termination and equipment location to be used to run and connect interbay cabling.
9. Runs and connects interbay cabling using detailed connecting sheets.
10. Performs individual component tests and systems test using required test equipment.
11. Prepares and maintains test records (standard form) by manually entering information related to cases of trouble such as time, date, type of trouble, how cleared and by whom.
12. Distributes copies to Maintenance Engineer for use in performance evaluation and to recommend acceptance or denial of the system.
13. Coordinates activities with equipment maintenance forces and engineering personnel, on installation operations affecting working equipment according to specific guidelines outlined in the Methods of Procedures (MOP).
14. Makes appropriate corrections to office drawings and returns to Engineer for upgrades.

ENVIRONMENT

1. Primary duties will be performed in a central office environment.
2. Involves work operations which create dust and debris.
3. Requires the use of protective devices such as coveralls, hard hat, goggles, knee pads, gloves, etc. The use of these devices will be dictated by the specific work operation and the practices covering the work. Protective clothing and devices described above will be supplied by the Company.
4. Employees may be required to visit customer premises.

JOB KEY NUMBER

02024003

SOME OF THE TASKS AND DUTIES (CONTINUED)

3. Works with amplitude modulation principles; modulation index; sidebands and the frequency domain; amplitude modulation power distribution; single-sideband communications, frequency conversion.
4. Performs testing and aligns system components to specifications.
5. Uses passive signal combining networks: splitters, directional couplers, taps, and signal combiners; active signal combining: combiner amplifiers, post amplifiers, and headend driver amplifiers; headend signal combining.
6. Must meet specific quality, production, and safety standards.
7. Install, repair and perform preventative maintenance functions on designed circuits, including electronic equipment for video, data and Audio applications.
8. Works with hand tools and a wide variety of electronic test equipment.
9. Works and coordinates with other groups and interfaces with customers, vendor and other communication companies.
10. Maintain accurate records of performance calibrations, authorization and serial numbers.
11. Installs inside wiring and cable runs, and connects color coded wire in the cable to terminals in equipment mounting.
12. Tests to verify the service was installed properly, and makes notations on the service order to indicate changes and/or completion.
13. Drives a company vehicle.
14. Will be required to read and interpret headend system drawings.
15. May be required to handle items weighing up to 60 pounds.

ENVIRONMENT

1. Works outdoors and may be exposed to adverse weather conditions, e.g. cold, rain, snow, heat, etc.
2. May spend long periods of time in cramped equipment areas.
3. Must climb ladders (maximum 28 feet).
4. Must wear safety attire, e.g., safety glasses, hard hat, etc., as required when handling tools or equipment.
5. Commutes daily from job to job (may involve long distances).
6. Crawls, pulls cable and works in confined spaces.
7. Performs all assigned work in an effective and efficient manner to meet service deadlines, frequently under pressure.
8. Works without direct supervision.

ADDITIONAL BASIC TEST **Digital Technology Skill Assessment Test (DTSAT)**
Note: Effective May 1, 1996, this will become a BASIC TEST.

SOME OF THE TASKS AND DUTIES

1. May receive trouble reports from customers and other work groups in connection with maintenance of complex special services (e.g., data circuits, teletype circuits, mobile radio circuits, multiwire telephone circuits, fiber system, Hi-Cap Systems, ADN). Refers the trouble to the appropriate maintenance group for correction.

TESTING TECHNICIAN
CALIFORNIA MARKETS
MARKETING GROUP
JOB DESCRIPTION NUMBER: 09111

SOME OF THE TASKS AND DUTIES (CONTINUED)

2. Reviews and interprets complex special service orders, circuit diagrams, Bellcore Practices and methods and procedures.
3. Documents detailed trouble and referral information on trouble tickets.
4. Makes decision on trouble level and interfaces directly with computer terminals to set parameters and pull reports.
5. Coordinates requests for call traces through the network when analysis fails to identify exact location or cause of trouble.
6. Uses measuring devices and meters to test newly installed complex special services to assure proper functioning.
7. Uses various equipment to isolate trouble and coordinates trouble clearing with other, often distant, offices and outside repair forces.
8. Communicates frequently with other work groups and customers to coordinate provisioning and maintenance of various communication systems.
9. May be assigned to any one of three functions - testing data telephone and/or teletype special service circuits, Digital/Fiber Systems/Hi-Cap System.
10. Makes step-by-step notations of all work done and individuals communicated with in connection with work. Details are required to be complete and accurate, using proper format, to assure easy reference when required.
11. Performs repetitive tasks in performance of routine maintenance and clearing of trouble.
12. Uses knowledge of transmission and signaling to provide service to the customers.
13. Required to access a variety of computer systems and data bases to perform tests and other functions related to maintaining and provisioning of Special Service circuits via Video Display Terminals (VDT).
14. Complies with safety and housekeeping standards and office procedures.
15. Reads service orders or trouble tickets and other work documents to determine work to be done.
16. Works with the tariff requirements applicable to the services provided (IEC environment).
17. Could work in an RDAC environment which includes the assurance of digital cross-connects in DACS & DEXS systems in support of both provisioning and maintenance of associated services. Also, includes the monitoring of existing services following threshold parameters in support of performance monitoring.
18. Surveil, analyze and react to computer outputs and various other network trouble data in order to identify existing trouble patterns and the facilities location involved. Refers the trouble to the appropriate maintenance group for correction.
19. Documents detailed trouble and referral information on trouble tickets.

TESTING TECHNICIAN
CALIFORNIA MARKETS
MARKETING GROUP
JOB DESCRIPTION NUMBER: 09111

SOME OF THE TASKS AND DUTIES (CONTINUED)

20. Uses routing guides and utilizes knowledge of message trunking hierarchy and switching systems to diagnose trouble location and to determine most probable routing used by the calls being analyzed. Directs maintenance activity on identified patterns.
21. Coordinates requests for call traces through the network when analysis fails to identify exact location or cause of trouble.
22. Makes sample test calls to locate and hold troubles.

ENVIRONMENT

1. Spends most of shift at a computer/VDT terminal in an office with other employees doing similar work.
2. Communicates by telephone with other work groups for extended periods of time.
3. Some assignments completed alone while others require assistance.
4. Performs work to meet deadlines.
