**SUMMARY OF IMPORTANT NOTICES CONCERNING BURGLAR ALARM AND FIRE
ALARM INSTALLATION**

Dear Public Officials/Other Interested Parties:

The Department has issued several important notices between June 27, 2002, and October 27, 2015, specifying the prevailing rate of pay for the installation of burglar and fire alarms. The tables on the following two pages provide a summary of the applicable rates of pay for burglar and fire alarm installation by county as of September 23, 2016. The information in these tables summarizes but **does not** alter the applicable rates of pay issued in the aforementioned important notices.

Please note that minimum rate of pay determinations are issued on a “project-by-project basis.” If you have a public works project in one of the counties listed in the tables that indicates “project-by-project basis,” you may request a minimum rate of pay determination prior to the bid advertisement date of the project by sending a written request to the address below. Each request should include all the relevant documents that would assist the Department in issuing a determination. These documents include but are not limited to the contract, financial documents, plans, specifications, as well as contact information for the Awarding Body.

Please refer to the county determinations to find the rates associated with the craft(s)/classification(s) referenced in the tables. The scope of work for each classification is posted on the Internet at <http://www.dir.ca.gov/oprl/DPreWageDetermination.htm>. This information may also be requested from the Office of the Director – Research Unit by calling (415) 703-4774, by faxing a request to (415) 703-4771 or by writing to:

INSIDE
AGREEMENT

2014-2015-2016-2018

between

Local Union 617

International Brotherhood

of

Electrical Workers

AFL-CIO

and

The San Mateo Chapter

National Electrical

Contractors Association Inc.

Covering

San Mateo County

California

Effective June 1, 2014 through May 31, 2018

SCOPE OF WORK

Section 3.15. Workers employed under the terms of this agreement shall do all electrical work that is not covered by the 9th District Sound and Communications Agreement. This includes the handling, installing, or moving of all related material and equipment from the first point of drop at the jobsite through final installation. This installation shall include all electrical lighting, heating, and power systems. Controlling, using or producing electrical energy, such as management, photovoltaic or solar technology principles are to be included as part of this scope of work. All systems and related electrical equipment, such as, motor control centers, transformers, power supplies, and storage cells are to be installed and wired on site by the covered employees.

Also covered under this agreement, will be such work on site as the welding, brazing, burning, cutting, bending, drilling and shaping of all brackets, supports or fittings that are fabricated or prefabricated which are specific parts of the installation of the electrical work or equipment. Such work that has to be certified and/or x-rayed may be sublet. This section shall not apply to the use of catalog items, fabricated or prefabricated which are approved and are in conformance with applicable law. The installation of conduit, lighting poles and other electrical equipment will also be included under this scope. All related items above or below grade including cable tray, conduit, duct bank, ladder rack, and supports for electrical systems, shall be installed on-site by employees covered by this agreement.

Electrical Work as covered by this Agreement shall include the handling of all related materials and equipment from the first point of delivery at the job site through the final installation.

MATERIAL MAKEUP

Section 3.16. It is mutually agreed and understood that on any electrical and/or electronic construction job, the Electrical and/or Electronic Contractor shall install all electrical and/or electronic work, including the connecting of all fixtures, appliances, motors, equipment, electronic devices, electronic systems or communication systems, with all related control wiring and devices, to and including running a test and any related instrumentation work or radiation monitoring under prevailing construction scale. This shall also include such work as on-the-job welding, burning, brazing, bending, drilling, and shaping of all copper, channel iron, angle iron, eye beams, and brackets that are a specific part of the installation and erection of electrical work and equipment on the job site.

It is further agreed and understood by the parties that the work of assembling and installing electrical materials on the job site in order to complete an electrical system, such as circuit wiring to be supplied to electrical equipment and devices normally performed by qualified Inside Wiremen, shall be included in the scope of work covered by this Agreement.

The policy of the members of the Local Union is to promote the use of materials and equipment manufactured, processed, or repaired under economically sound wage hour and working conditions by other members of the International Brotherhood of Electrical Workers.

(c) HIGH VOLTAGE SAFETY-On all energized circuits of 440 volts or over, two (2) or more Journeymen must work together except testing and replacing fuses. This provision excludes any Apprentice working on or around energized circuits of 440 volts or over as a safety measure.
