

September 2, 2014

Subject: Agenda Clarification, Advisory Committee meetings scheduled for September 9-10, 2014–  
CDAC Recombine of Construction Safety Orders (CSO) into General Industry Safety Orders (GISO)

The “Proposed Order of Review” included with the invitation lists the proposed sequence of review for subjects of the proposed consolidation. This sequence was developed in order to assure that all components of the federal crane standard are reviewed in a logical and orderly manner. The subject of “Operator Qualification and Certification” comes up well over half-way through the list (and also in 29 CFR 1926 Subpart CC). Due to the volume of material scheduled for review prior to this subject, crane operator qualifications and certification WILL NOT be a subject for discussion at the Advisory Committee scheduled for September 9-10, 2014. Parties wishing to participate in a future discussion of this subject may indicate their interest to the committee chair.

Thank you.

Conrad Tolson, Senior Engineer  
Occupational Safety and Health Standards Board  
916-274-5722
