§ 9792.20. Medical Treatment Utilization Schedule—Definitions

As used in this Article:

(a) “American College of Occupational and Environmental Medicine (ACOEM)” is a medical society of physicians and other health care professionals specializing in the field of occupational and environmental medicine, dedicated to promoting the health of workers through preventive medicine, clinical care, research, and education.

(c) “Chronic pain” means any pain that persists beyond the anticipated time of tissue healing.

(ed) “Claims administrator” is a self-administered workers' compensation insurer, a self-administered self-insured employer, a self-administered legally uninsured employer, a self-administered joint powers authority, a third-party claims administrator, or the California Insurance Guarantee Association.

(de) “Evidence-based” means based, at a minimum, on a systematic review of literature published in medical journals included in MEDLINE.

(ef) “Functional improvement” means either a clinically significant quantifiable improvement in activities of daily living or a reduction in work restrictions as measured during the history and physical exam, performed and documented as part of the evaluation and management visit billed under the Official Medical Fee Schedule (OMFS) pursuant to §§ sections 9789.10-9789.111; and a reduction in the dependency on continued medical treatment.

(fg) “Medical treatment” is care which is reasonably required to cure or relieve the employee from the effects of the industrial injury consistent with the requirements of sections 9792.20-9792.236.

(gh) “Medical treatment guidelines” means the most current version of written recommendations revised within the last five years which are systematically developed.
by a multidisciplinary process through a comprehensive literature search to assist in
decision-making about the appropriate medical treatment for specific clinical
circumstances.

(hi) “MEDLINE” is the largest component of PubMed, the U.S. National Library of
Medicine’s database of biomedical citations and abstracts that is searchable on the Web.
Its website address is www.pubmed.gov.

(ij) “Nationally recognized” means published in a peer-reviewed medical journal; or
developed, endorsed and disseminated by a national organization with affiliates based in
two or more U.S. states; or currently adopted for use by one or more U.S. state
governments or by the U.S. federal government; and is the most current version.

(ik) “Peer reviewed” means that a medical study’s content, methodology and results have
been evaluated and approved prior to publication by an editorial board of qualified
experts.

(kl) “Scientifically based” means based on scientific literature, wherein the body of
literature is identified through performance of a literature search in MEDLINE, the
identified literature is evaluated, and then used as the basis for the guideline.

(lm) “Strength of Evidence” establishes the relative weight that shall be given to
scientifically based evidence.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code.
Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.

§ 9792.21. Medical Treatment Utilization Schedule

(a) The Administrative Director adopts the Medical Treatment Utilization Schedule
(MTUS) consisting of Sections 9792.20 through 9792.236. The Administrative
Director adopts and incorporates by reference the following medical treatment guidelines
into the Medical Treatment Utilization Schedule:

[Section 9792.21(a)(1) was moved to new Section 9792.22(a) and amended.]

[Section 9792.21(a)(2) was moved to new Section 9792.24.1 and amended.]

(b) The Medical Treatment Utilization Schedule MTUS is intended to assist in the
provision of medical treatment by offering an analytical framework for the evaluation and
treatment of injured workers and to help those who make decisions regarding the medical
treatment of injured workers understand what treatment has been proven effective in
providing the best medical outcomes to those workers, in accordance with section 4600
of the Labor Code.
(c) Treatment shall not be denied on the sole basis that the condition or injury is not addressed by the Medical Treatment Utilization Schedule MTUS. In this situation, the claims administrator shall authorize treatment if such treatment is in accordance with other scientifically and evidence-based, peer-reviewed, medical treatment guidelines that are nationally recognized by the medical community, in accordance with subdivisions (b) and (c) of section 9792.225, and pursuant to the Utilization Review Standards found in §9792.6 through §9792.10.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code.
Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.

[Section 9792.22. Presumption of Correctness, Burden of Proof and Strength of Evidence was moved to new Section 9792.25 and amended.]

§ 9792.22. General Approaches

(a) The Administrative Director adopts and incorporates by reference into the MTUS specific guidelines set forth below from (1) the American College of Occupational and Environmental Medicine’s Occupational Medicine Practice Guidelines (ACOEM Practice Guidelines), Second Edition (2004) for the following chapters. A copy may be obtained from the American College of Occupational and Environmental Medicine, 25 Northwest Point Blvd., Suite 700, Elk Grove Village, Illinois, 60007-1030 (www.acoem.org).

(3) Initial Approaches to Treatment (ACOEM Practice Guidelines, 2nd Edition (2004), Chapter 3).

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code.
Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.

[Section 9792.23. Medical Evidence Evaluation Advisory Committee was moved to new Section 9792.26 and amended.]
§ 9792.23. Clinical Topics

(a) The Administrative Director adopts and incorporates by reference into the MTUS specific clinical topic medical treatment guidelines in the series of sections commencing with 9792.23.1 et seq. Clinical topics apply to the initial management and subsequent treatment of presenting complaints specific to the body part.

(b) For all treatment not addressed in the MTUS, the authorized treatment and diagnostic services in the initial management and subsequent treatment for presenting complaints shall be in accordance with other scientifically and evidence-based medical treatment guidelines that are nationally recognized by the medical community pursuant to section 9792.25(b).

(1) In providing treatment using other guidelines pursuant to subdivision (b) above and in the absence of any surgical options for the complaint in the patient with chronic pain, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.

(2) In providing treatment using other guidelines pursuant to subdivision (b) above and if surgery is performed, the postsurgical treatment guidelines in section 9792.24.3 for postsurgical physical medicine shall apply.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code.
Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.

§ 9792.23.1 Neck and Upper Back Complaints

(a) The Administrative Director adopts and incorporates by reference the Neck and Upper Back Complaints Chapter (ACOEM Practice Guidelines, 2nd Edition (2004), Chapter 8) into the MTUS from the ACOEM Practice Guidelines.

(b) In the course of treatment for neck and upper back complaints where acupuncture or acupuncture with electrical stimulation is being considered, the acupuncture medical treatment guidelines in section 9792.24.1 shall apply.

(c) If recovery has not taken place with respect to pain by the end of algorithm 8-5, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.

(d) If surgery is performed in the course of treatment for neck and upper back complaints, the postsurgical treatment guidelines in section 9792.24.3 for postsurgical physical medicine shall apply. In the absence of any surgical options for the complaint and the patient has chronic pain, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.
§ 9792.23.2 Shoulder Complaints

(a) The Administrative Director adopts and incorporates by reference the Shoulder Complaints Chapter (ACOEM Practice Guidelines, 2nd Edition (2004), Chapter 9) into the MTUS from the ACOEM Practice Guidelines.

(b) If recovery has not taken place with respect to pain by the end of algorithm 9-5, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.

(c) If surgery is performed in the course of treatment for shoulder complaints, the postsurgical treatment guidelines in section 9792.24.3 for postsurgical physical medicine shall apply. In the absence of any surgical options for the complaint and the patient has chronic pain, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code.
Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.

§ 9792.23.3 Elbow Complaints

(a) The Administrative Director adopts and incorporates by reference the Elbow Disorders Chapter (ACOEM Practice Guidelines, 2nd Edition (Revised 2007), Chapter 10) into the MTUS from the ACOEM Practice Guidelines.

(b) In the course of treatment for elbow complaints where acupuncture or acupuncture with electrical stimulation is being considered, the acupuncture medical treatment guidelines in section 9792.24.1 shall apply.

(c) If recovery has not taken place with respect to pain by the end of the Elbow Algorithm 10-5, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.

(d) If surgery is performed in the course of treatment for elbow complaints, the postsurgical treatment guidelines in section 9792.24.3 for postsurgical physical medicine shall apply. In the absence of any surgical options for the complaint and the patient has chronic pain, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code.
Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.
§ 9792. 23.4. Forearm, Wrist, and Hand Complaints

(a) The Administrative Director adopts and incorporates by reference the Forearm, Wrist, and Hand Complaints Chapter (ACOEM Practice Guidelines, 2nd Edition (2004), Chapter 11) into the MTUS from the ACOEM Practice Guidelines.

(b) In the course of treatment for forearm, wrist, and hand complaints where acupuncture or acupuncture with electrical stimulation is being considered, the acupuncture medical treatment guidelines in section 9792.24.1 shall apply.

(c) If recovery has not taken place with respect to pain by the end of algorithm 11-5, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.

(d) If surgery is performed in the course of treatment for forearm, wrist, and hand complaints, the postsurgical treatment guidelines in section 9792.24.3 for postsurgical physical medicine shall apply. In the absence of any surgical options for the complaint and the patient has chronic pain, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code.
Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.

§ 9792. 23.5. Low Back Complaints

(a) The Administrative Director adopts and incorporates by reference the Low Back Complaints (ACOEM Practice Guidelines, 2nd Edition (2004), Chapter 12) into the MTUS from the ACOEM Practice Guidelines.

(b) In the course of treatment for low back complaints where acupuncture or acupuncture with electrical stimulation is being considered, the acupuncture medical treatment guidelines in section 9792.24.1 shall apply.

(c) If recovery has not taken place with respect to pain by the end of algorithm 12-5, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.

(d) If surgery is performed in the course of treatment for low back complaints, the postsurgical treatment guidelines in section 9792.24.3 for postsurgical physical medicine shall apply. In the absence of any surgical options for the complaint and the patient has chronic pain, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code.
Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.
§ 9792. 23.6. Knee Complaints

(a) The Administrative Director adopts and incorporates by reference the Knee Complaints Chapter (ACOEM Practice Guidelines, 2nd Edition (2004), Chapter 13) into the MTUS from the ACOEM Practice Guidelines.

(b) In the course of treatment for knee complaints where acupuncture or acupuncture with electrical stimulation is being considered, the acupuncture medical treatment guidelines in section 9792.24.1 shall apply.

(c) If recovery has not taken place with respect to pain by the end of algorithm 13-5, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.

(d) If surgery is performed in the course of treatment for knee complaints, the postsurgical treatment guidelines in section 9792.24.3 for postsurgical physical medicine shall apply. In the absence of any surgical options for the complaint and the patient has chronic pain, the treating physician shall refer to the chronic pain medical treatment guidelines in section 9792.24.2.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code.
Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.

§ 9792. 23.7. Ankle and Foot Complaints

(a) The Administrative Director adopts and incorporates by reference the Ankle and Foot Complaints Chapter (ACOEM Practice Guidelines, 2nd Edition (2004), Chapter 14) into the MTUS from the ACOEM Practice Guidelines.

(b) In the course of treatment for ankle and foot complaints where acupuncture or acupuncture with electrical stimulation is being considered, the acupuncture medical treatment guidelines in section 9792.24.1 shall apply.

(c) If recovery has not taken place with respect to pain by the end of algorithm 14-5, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.

(d) If surgery is performed in the course of treatment for ankle and foot complaints, the postsurgical treatment guidelines in section 9792.24.3 for postsurgical physical medicine shall apply. In the absence of any surgical options for the complaint and the patient has chronic pain, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code.
Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.
§ 9792. 23.8. Stress Related Conditions

(a) The Administrative Director adopts and incorporates by reference the Stress Related Conditions Chapter (ACOEM Practice Guidelines, 2nd Edition (2004), Chapter 15) into the MTUS from the ACOEM Practice Guidelines.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code. Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.

§ 9792. 23.9. Eye

(a) The Administrative Director adopts and incorporates by reference the Eye Chapter (ACOEM Practice Guidelines, 2nd Edition (2004), Chapter 16) into the MTUS from the ACOEM Practice Guidelines.

(b) If recovery has not taken place with respect to pain by the end of algorithm 16-6, the chronic pain medical treatment guidelines in section 9792.24.2 shall apply.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code. Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.

§ 9792.24. Special Topics

(a) Special topics refer to clinical topic areas where the Administrative Director has determined that the clinical topic sections of the MTUS require further supplementation.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code. Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.

§ 9792.24.1. (2)-Acupuncture Medical Treatment Guidelines

The Acupuncture Medical Treatment Guidelines set forth in this subdivision shall supersede the text in the ACOEM Practice Guidelines, Second Edition, relating to acupuncture, except for shoulder complaints, and shall address acupuncture treatment where not discussed in the ACOEM Practice Guidelines.

(aA) As used in this section, the following definitions apply:

(i) “Acupuncture” is used as an option when pain medication is reduced or not tolerated, it may be used as an adjunct to physical rehabilitation and/or surgical intervention to hasten functional recovery. It is the insertion and removal of filiform needles to stimulate acupoints (acupuncture points). Needles may be inserted, manipulated, and retained for a
period of time. Acupuncture can be used to reduce pain, reduce inflammation, increase blood flow, increase range of motion, decrease the side effect of medication-induced nausea, promote relaxation in an anxious patient, and reduce muscle spasm.

(ii) “Acupuncture with electrical stimulation” is the use of electrical current (micro-amperage or milli-amperage) on the needles at the acupuncture site. It is used to increase effectiveness of the needles by continuous stimulation of the acupoint. Physiological effects (depending on location and settings) can include endorphin release for pain relief, reduction of inflammation, increased blood circulation, analgesia through interruption of pain stimulus, and muscle relaxation. It is indicated to treat chronic pain conditions, radiating pain along a nerve pathway, muscle spasm, inflammation, scar tissue pain, and pain located in multiple sites.

(iii) “Chronic pain for purposes of acupuncture” means pain that persists for at least 30 days beyond the usual course of an acute disease or a reasonable time for an injury to heal or that is associated with a chronic pathological process that causes continuous pain (e.g., reflex sympathetic dystrophy). The very definition of chronic pain describes a delay or outright failure to relieve pain associated with some specific illness or accident. Chronic pain as defined in section 9792.20(c).

(B) Indications for acupuncture or acupuncture with electrical stimulation include the following—presenting complaints in reference to the following ACOEM Practice Guidelines Chapter Headings:

(i) Neck and Upper Back Complaints

(ii) Elbow Complaints

(iii) Forearm, Wrist, and Hand Complaints

(iv) Low Back Complaints

(v) Knee Complaints

(vi) Ankle and Foot Complaints

(vii) Pain, Suffering, and the Restoration of Function

(b) Application

(1) These guidelines apply to acupuncture or acupuncture with electrical stimulation when indicated in the clinical topic medical treatment guidelines in the series of sections commencing with 9792.23.1 et seq., or in the chronic pain medical treatment guidelines (DWC 2008) contained in section 9792.24.2.
(Eç) Frequency and duration of acupuncture or acupuncture with electrical stimulation may be performed as follows:

(i1) Time to produce functional improvement: 3 to 6 treatments.

(ii2) Frequency: 1 to 3 times per week.

(iii3) Optimum duration: 1 to 2 months.

(Dd) Acupuncture treatments may be extended if functional improvement is documented as defined in Section 9792.20(ef).

(Ee) It is beyond the scope of the Acupuncture Medical Treatment Guidelines to state the precautions, limitations, contraindications or adverse events resulting from acupuncture or acupuncture with electrical stimulations. These decisions are left up to the acupuncturist.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code.
Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.

§ 9792.24.2. Chronic Pain Medical Treatment Guidelines (DWC 2008)

(a) The Chronic Pain Medical Treatment Guidelines (DWC 2008), consisting of two parts, are adopted and incorporated by reference into the MTUS. Part 1 is entitled Introduction. Part 2 is entitled Pain Interventions and Treatments. These guidelines replace Chapter 6 of the ACOEM Practice Guidelines, 2nd Edition (2004). Where the clinical topic sections of the MTUS in the series of sections commencing with 9792.23.1 et seq., make reference to Chapter 6 or when there is a reference to the “pain chapter,” or “pain assessment,” the chronic pain medical treatment guidelines will apply instead of Chapter 6. A copy of the chronic pain medical treatment guidelines and citations listed in the guidelines may be obtained from the Medical Unit, Division of Workers’ Compensation, P.O. Box 71010, Oakland, CA 94612-1486, or from the DWC web site at http://www.dwc.ca.gov.

(b) The chronic pain medical treatment guidelines apply when the patient has chronic pain as determined by following the clinical topics.

(c) When a patient is diagnosed with chronic pain and the treatment for the condition is covered in the clinical topics sections but is not addressed in the chronic pain medical treatment guidelines, the clinical topics section applies to that treatment.

(d) When the treatment is addressed in both the chronic pain medical treatment guidelines and the specific guideline found in the clinical topics section of the MTUS, the chronic pain medical treatment guideline shall apply.
§ 9792.24. 3. Postsurgical Treatment Guidelines (DWC 2008)

(a) As used in this section, the following definitions apply:

1. “General course of therapy” means the number of visits and/or time interval which shall be indicated for postsurgical treatment for the specific surgery in the postsurgical physical medicine treatment recommendations set forth in subdivision (d)(1) of this section.

2. “Initial course of therapy” means one half of the number of visits specified in the general course of therapy for the specific surgery in the postsurgical physical medicine treatment recommendations set forth in subdivision (d)(1) of this section.

3. “Postsurgical physical medicine period” means the time frame that is needed for postsurgical treatment and rehabilitation services beginning with the date of the procedure and ending at the time specified for the specific surgery in the postsurgical physical medicine treatment recommendations set forth in subdivision (d)(1) of this section. For all surgeries not covered by these guidelines the postsurgical physical medicine period is six (6) months.

4. “Surgery” means a procedure listed in the surgery chapter of the Official Medical Fee Schedule with follow-up days of 90 days.

5. “Visit” means a date of service to provide postsurgical treatment billed using the physical medicine section of the Official Medical Fee Schedule.

(b) Application

1. The postsurgical treatment guidelines apply to visits during the postsurgical physical medicine period only and to surgeries as defined in these guidelines. At the conclusion of the postsurgical physical medicine period, treatment reverts back to the applicable 24-visit limitation for chiropractic, occupational and physical therapy pursuant to Labor Code section 4604.5(d)(1).

(c) Postsurgical Patient Management

1. Only the surgeon who performed the operation, a nurse practitioner, or physician assistant working with the surgeon, or a physician designated by that surgeon can make a determination of medical necessity and prescribe postsurgical treatment under this guideline.

2. The medical necessity for postsurgical physical medicine treatment for any given patient is dependent on, but not limited to, such factors as the comorbid medical
conditions; prior pathology and/or surgery involving same body part; nature, number and
complexities of surgical procedure(s) undertaken; presence of surgical complications; and
the patient’s essential work functions.

3. If postsurgical physical medicine is medically necessary, an initial course of therapy
may be prescribed. With documentation of functional improvement, a subsequent course
of therapy shall be prescribed within the parameters of the general course of therapy
applicable to the specific surgery. If it is determined that additional functional
improvement can be accomplished after completion of the general course of therapy,
physical medicine treatment may be continued up to the end of the postsurgical physical
medicine period.

4. Patients shall be reevaluated following continuation of therapy when necessary or no
later than every forty-five days from the last evaluation to document functional
improvement to continue physical medicine treatment. Frequency of visits shall be
gradually reduced or discontinued as the patient gains independence in management of
symptoms and with achievement of functional goals.

(A) In the event the patient sustains an exacerbation related to the procedure performed
after treatment has been discontinued and it is determined that more visits are medically
necessary, physical medicine treatment shall be provided within the postsurgical physical
medicine period.

(B) In cases where no functional improvement is demonstrated, postsurgical treatment
shall be discontinued at any time during the postsurgical physical medicine period.

5. Treatment is provided to patients to facilitate postsurgical functional improvement.

(A) The surgeon who performed the operation, a nurse practitioner or physician assistant
working with the surgeon, or physician designated by that surgeon, the therapist, and the
patient should establish quantifiable, functional goals achievable within a specified
timeframe.

(B) Patient education regarding postsurgical precautions, home exercises, and self-
management of symptoms should be ongoing components of treatment starting with the
first visit. Intervention should include a home exercise program to supplement therapy
visits.

(C) Modalities (CPT codes 97010 through 97039) should only be performed in
conjunction with other active treatments. Although these modalities are occasionally
useful in the post surgical physical medicine period, their use should be minimized in
favor of active physical rehabilitation and independent self-management.

(d) Postsurgical Physical Medicine Treatment Recommendations
(1) The postsurgical physical medicine treatment recommendations, as listed below, indicate frequency and duration of postsurgical treatment for specific surgeries. The specified surgeries in these guidelines are not all inclusive. Requests for postsurgical physical medicine treatment not included in these guidelines shall be considered pursuant to section 9792.21(c). The physical medicine treatment recommendations (listed alphabetically) are adapted from the Official Disability Guidelines (ODG) except where developed by the Division of Workers’ Compensation and indicated as “[DWC].” The postsurgical physical medicine period is identified by an asterisk [*] as developed by DWC. A copy of citations listed in the postsurgical treatment guidelines may be obtained from the Medical Unit, Division of Workers’ Compensation, P.O. Box 71010, Oakland, CA 94612-1486, or from the DWC web site at http://www.dwc.ca.gov.

Postsurgical Treatment Guidelines

Ankle & Foot

Exercise program goals should include strength, flexibility, endurance, coordination, and education. Patients can be advised to do early passive range-of-motion exercises at home by a physical therapist. (Colorado, 2001) (Aldridge, 2004)

Achilles tendon rupture (ICD9 727.67):
Postsurgical treatment: 48 visits over 16 weeks
*Post surgical physical medicine treatment period: 6 months

Ankle Sprain (ICD9 845.0):
Postsurgical treatment: 34 visits over 16 weeks
*Post surgical physical medicine treatment period: 6 months

Anterior tibial tendon [DWC]:
Postsurgical treatment: 8 visits over 3 months
*Post surgical physical medicine treatment period: 6 months

Amputation of foot (ICD9 896);
Post-replantation surgery: 48 visits over 26 weeks
*Post surgical physical medicine treatment period: 12 months

Post-amputation treatment [DWC]: 48 visits over 26 weeks
*Post surgical physical medicine treatment period: 12 months

Amputation of toe (ICD9 895):
Post-replantation surgery: 20 visits over 12 weeks
*Post surgical physical medicine treatment period: 6 months

Dislocation of the peroneal tendons [DWC]:
Postsurgical treatment: 8 visits over 3 months
Enthesopathy of ankle and tarsus (ICD9 726.7):
Postsurgical treatment: 9 visits over 8 weeks
*Postoperative physical medicine treatment period: 4 months

Fracture of ankle (ICD9 824):
Postsurgical treatment: 21 visits over 16 weeks
*Postoperative physical medicine treatment period: 6 months

Fracture of ankle, Bimalleolar (ICD9 824.4):
Postsurgical treatment (ORIF): 21 visits over 16 weeks
*Postoperative physical medicine treatment period: 6 months

Fracture of ankle, Trimalleolar (ICD9 824.6):
Postsurgical treatment: 21 visits over 16 weeks
*Postoperative physical medicine treatment period: 6 months

Fracture of one or more phalanges of foot (ICD9 826):
Postsurgical treatment: 12 visits over 12 weeks
*Postoperative physical medicine treatment period: 6 months

Special Consideration [DWC]: Postsurgical physical medicine is rarely needed for ganglionectomy.

Fracture of tibia and fibula (ICD9 823):
Postsurgical treatment (ORIF): 30 visits over 12 weeks
*Postoperative physical medicine treatment period: 6 months

Hallux rigidus (ICD9 735.2):
Postsurgical treatment: 9 visits over 8 weeks
*Postoperative physical medicine treatment period: 4 months

Hallux valgus (ICD9 735.0):
Postsurgical treatment: 9 visits over 8 weeks
*Postoperative physical medicine treatment period: 4 months

Hallux varus (ICD9 735.1):
Postsurgical treatment: 9 visits over 8 weeks
*Postoperative physical medicine treatment period: 4 months

Metatarsal stress fracture (ICD9 825):
Postsurgical treatment: 21 visits over 16 weeks
*Postoperative physical medicine treatment period: 6 months
Other hammer toe (ICD9 735.4):
Postsurgical treatment: 9 visits over 8 weeks
*Postsurgical physical medicine treatment period: 4 months

Peroneal tendon repair [DWC]:
Postsurgical treatment: 8 visits over 3 months
*Postsurgical physical medicine treatment period: 6 months

Posterior tibial tendonitis [DWC]:
Postsurgical treatment: 8 visits over 3 months
*Postsurgical physical medicine treatment period: 6 months

Posterior tibial tenosynovitis (partial or complete rupture) [DWC]:
Postsurgical treatment: 8 visits over 3 months
*Postsurgical physical medicine treatment period: 6 months

Burns

Burns (ICD9 949):
Postsurgical treatment: 16 visits over 8 weeks
*Postsurgical physical medicine treatment period: 6 months

Cardiopulmonary [DWC]:

Coronary Stenting [DWC]:
Postsurgical treatment: 36 visits over 18 weeks
*Postsurgical physical medicine treatment period: 6 months

Heart Valve repair/replacement [DWC]:
Postsurgical treatment: 36 visits over 18 weeks
*Postsurgical physical medicine treatment period: 6 months

Percutaneous transluminal coronary angioplasty (PTCA) [DWC]:
Postsurgical treatment: 36 visits over 18 weeks
*Postsurgical physical medicine treatment period: 6 months

Carpal Tunnel Syndrome

Carpal tunnel release surgery is a relatively simple operation that also should not require extended multiple physical therapy office visits for recovery. Of course, these statements do not apply to cases of failed surgery and/or misdiagnosis (e.g.,

Title 8, California Code of Regulations, section 9792.20 et seq.
(Proposed Regulations—June 2008)
CRPS I instead of CTS). (Feuerstein, 1999) (O'Conner-Cochrane, 2003) (Verhagen-Cochrane, 2004) (APTA, 2006) (Bilic, 2006) Post surgery, a home physical therapy program is superior to extended splinting. (Cook, 1995) Therapy should include education in a home program, work discussion and suggestions for modifications, lifestyle changes, and setting realistic expectations. Passive modalities, such as heat, iontophoresis, phonophoresis, ultrasound and electrical stimulation, should be minimized in favor of active treatments.

**Carpal tunnel syndrome** (ICD9 354.0):
Post surgical treatment (endoscopic): 3-8 visits over 3-5 weeks
*Postsurgical physical medicine treatment period: 3 months

Post surgical treatment (open): 3-8 visits over 3-5 weeks
*Postsurgical physical medicine treatment period: 3 months

**Elbow & Upper Arm**

**Arthropathy, unspecified** (ICD9 716.9):
Post surgical treatment, arthroplasty, elbow: 24 visits over 8 weeks
*Postsurgical physical medicine treatment period: 4 months

**Cubital tunnel release [DWC]:**
Post surgical treatment: 20 visits over 3 months
*Postsurgical physical medicine treatment period: 6 months

**Dislocation of elbow** (ICD9 832):
Unstable dislocation, postsurgical treatment: 10 visits over 9 weeks
*Postsurgical physical medicine treatment period: 4 months

**ECRB/ ECRL debridement [DWC]:**
Post surgical treatment: 10 visits over 4 months
*Postsurgical physical medicine treatment period: 6 months

**ECRB/ ECCRL tenotomy [DWC]:**
Post surgical treatment: 10 visits over 4 months
*Postsurgical physical medicine treatment period: 6 months

**Elbow diagnostic arthroscopy and arthroscopic debridement [DWC]:**
Post surgical treatment: 20 visits over 2 months
*Postsurgical physical medicine treatment period: 4 months

**Elbow collateral ligament repair [DWC]:**
Post surgical treatment: 14 visits over 6 months
*Postsurgical physical medicine treatment period: 8 months

**Enthesopathy of elbow region** (ICD9 726.3):
Postsurgical treatment: 12 visits over 12 weeks
*Postsurgical physical medicine treatment period: 6 months

**Fracture of humerus** (ICD9 812):
Postsurgical treatment: 24 visits over 14 weeks
*Postsurgical physical medicine treatment period: 6 months

**Fracture of radius/ulna** (ICD9 813):
Postsurgical treatment: 16 visits over 8 weeks
*Postsurgical physical medicine treatment period: 4 months

**Lateral epicondylitis/Tennis elbow** (ICD9 726.32):
Postsurgical treatment: 12 visits over 12 weeks
*Postsurgical physical medicine treatment period: 6 months

**Medial epicondylitis/Golfers' elbow** (ICD9 726.31):
Postsurgical treatment: 12 visits over 12 weeks
*Postsurgical physical medicine treatment period: 6 months

**Muscle or tendon transfers for elbow flexion [DWC]**:
Postsurgical treatment: 30 visits over 5 months
*Postsurgical physical medicine treatment period: 8 months

**Rupture of biceps tendon** (ICD9 727.62):
Postsurgical treatment: 24 visits over 16 weeks
*Postsurgical physical medicine treatment period: 6 months

**Sprains and strains of elbow and forearm** (ICD9 841):
Postsurgical treatment/ligament repair: 24 visits over 16 weeks
*Postsurgical physical medicine treatment period: 6 months

**Traumatic amputation of arm** (ICD9 887):

Post-amputation treatment: without complications, no prosthesis [DWC]: 18 visits over 4 months
*Postsurgical physical medicine treatment period: 6 months

Post-amputation treatment: without complications, with prosthesis [DWC]: 30 visits over 6 months
*Postsurgical physical medicine treatment period: 9 months

Post-amputation treatment: with complications, no prosthesis [DWC]: 30 visits over 5 months
*Postsurgical physical medicine treatment period: 7 months

---

Title 8, California Code of Regulations, section 9792.20 et seq.
(Proposed Regulations—June 2008)
Post-amputation treatment: with complications and prosthesis [DWC]: 40 visits over 8 months
*Post-surgical physical medicine treatment period: 12 months

Post-replantation surgery [ODG]: 48 visits over 26 weeks
*Post-surgical physical medicine treatment period: 12 months

**Triceps repair [DWC]:**
Post-surgical treatment: 24 visits over 4 months
*Post-surgical physical medicine treatment period: 6 months

**Ulnar nerve entrapment/Cubital tunnel syndrome (ICD9 354.2):**
Post-surgical treatment: 20 visits over 10 weeks
*Post-surgical physical medicine treatment period: 6 months

**Forearm, Wrist, & Hand**
(Not including Carpal Tunnel Syndrome –see separate post surgical guideline.)

Used after surgery and amputation. During immobilization, there was weak evidence of improved hand function in the short term, but not in the longer term, for early occupational therapy, and of a lack of differences in outcome between supervised and unsupervised exercises. Post-immobilization, there was weak evidence of a lack of clinically significant differences in outcome in patients receiving formal rehabilitation therapy, passive mobilization or whirlpool immersion compared with no intervention. There was weak evidence of a short-term benefit of continuous passive motion (post external fixation), intermittent pneumatic compression and ultrasound. There was weak evidence of better short-term hand function in patients given physical therapy than in those given instructions for home exercises by a surgeon. (Handoll-Cochrane, 2002)
(Handoll-Cochrane, 2006) Hand function significantly improved in patients with rheumatoid arthritis after completion of a course of occupational therapy (p<0.05). (Rapoliene, 2006)

**Amputation of arm, below the elbow [DWC]:**
Post-amputation treatment: without complications, no prosthesis: 18 visits over 4 months
*Post-surgical physical medicine treatment period: 6 months

Post-amputation: without complications, with prosthesis: 30 visits over 6 months
*Post-surgical physical medicine treatment period: 9 months

Post-amputation: with complications, no prosthesis: 30 visits over 5 months
*Post-surgical physical medicine treatment period: 7 months

Post-amputation: with complications and prosthesis: 40 visits over 8 months
*Post-surgical physical medicine treatment period: 12 months

Title 8, California Code of Regulations, section 9792.20 et seq.
(Proposed Regulations—June 2008)
Amputation of hand (ICD9 887):

Post-amputation treatment: without complications, no prosthesis [DWC]: 18 visits over 4 months
*Postsurgical physical medicine treatment period: 6 months

Post-amputation treatment: with complications, no prosthesis [DWC]: 24 visits over 5 months
*Postsurgical physical medicine treatment period: 7 months

Post-replantation surgery [ODG]: 48 visits over 26 weeks
*Postsurgical physical medicine treatment period: 12 months

Amputation of thumb; finger (ICD9 885; 886):
Post-replantation surgery: 36 visits over 12 weeks
*Postsurgical physical medicine treatment period: 6 months

Post-amputation: Amputation of fingers without replantation [DWC]: 14 visits over 3 months
*Postsurgical physical medicine treatment period: 6 months

Post-amputation: Amputation of thumb without replantation [DWC]: 16 visits over 3 months
*Postsurgical physical medicine treatment period: 6 months

Arthropyathy, unspecified (ICD9 716.9):
Post-surgical treatment, arthroplasty/fusion, wrist/finger: 24 visits over 8 weeks
*Postsurgical physical medicine treatment period: 4 months

Contracture of palmar fascia (Dupuytren's) (ICD9 728.6):
Post-surgical treatment: 12 visits over 8 weeks
*Postsurgical physical medicine treatment period: 4 months

Digital nerve repair [DWC]:
Post-surgical treatment: 8 visits over 4 months
*Postsurgical physical medicine treatment period: 6 months

DIP joint intraarticular fracture at middle or distal phalanx [DWC]:
Post-surgical treatment: 14 visits over 4 months
*Postsurgical physical medicine treatment period: 6 months

Dislocation of finger (ICD9 834):
Post-surgical treatment: 16 visits over 10 weeks
*Postsurgical physical medicine treatment period: 4 months

Dislocation of wrist (ICD9 833):
Postsurgical treatment (TFCC reconstruction): 16 visits over 10 weeks
*Postoperative physical medicine treatment period: 4 months

**Extensor tendon repair or tenolysis [DWC]:**
Postoperative treatment: 18 visits over 4 months
*Postoperative physical medicine treatment period: 6 months

**Extensor tenosynovectomy [DWC]:**
Postoperative treatment: 14 visits over 3 months
*Postoperative physical medicine treatment period: 6 months

**Flexor tendon repair or tenolysis Zone 2 and other than Zone 2 [DWC]:**
Postoperative treatment: Flexor tendon repair or tenolysis Zone 2: 30 visits over 6 months
*Postoperative physical medicine treatment period: 8 months
Postoperative treatment: Other than Zone 2: 20 visits over 3 months
*Postoperative physical medicine treatment period: 6 months

**Flexor tenosynovectomy [DWC]:**
Postoperative treatment: 14 visits over 3 months
*Postoperative physical medicine treatment period: 6 months

**Flexor tendon repair (forearm) [DWC]:**
Postoperative treatment: 12 visits over 4 months
*Postoperative physical medicine treatment period: 6 months

**Fracture of carpal bone (wrist) (ICD9 814):**
Postoperative treatment: 16 visits over 10 weeks
*Postoperative physical medicine treatment period: 4 months

**Fracture of metacarpal bone (hand) (ICD9 815):**
Postoperative treatment: 16 visits over 10 weeks
*Postoperative physical medicine treatment period: 4 months

**Fracture of one or more phalanges of hand (fingers) (ICD9 816):**
Postoperative treatment: Complicated, 16 visits over 10 weeks
*Postoperative physical medicine treatment period: 4 months

**Fracture of radius/ulna (forearm) (ICD9 813):**
Postoperative treatment: 16 visits over 8 weeks
*Postoperative physical medicine treatment period: 4 months

**Ganglion and cyst of synovium, tendon, and bursa (ICD9 727.4):**
Postoperative treatment: 18 visits over 6 weeks
*Special Consideration: Postsurgical physical medicine is rarely needed for ganglionectomy.

**Intersection syndrome [DWC]:**
Postsurgical treatment: 9 visits over 3 months
*Postsurgical physical medicine treatment period: 6 months

**Median Nerve Repair: Forearm –Wrist [DWC]:**
Postsurgical treatment: 20 visits over 6 weeks
*Postsurgical physical medicine treatment period: 6 months

**PIP and MCP capsulotomy/capsulectomy [DWC]:**
Postsurgical treatment: 24 visits over 2 months
*Postsurgical physical medicine treatment period: 4 months

**PIP and MCP collateral ligament reconstruction [DWC]:**
Postsurgical treatment: 18 visits over 4 months
*Postsurgical physical medicine treatment period: 6 months

**PIP and MCP collateral ligament repairs [DWC]:**
Postsurgical treatment: 12 visits over 4 months
*Postsurgical physical medicine treatment period: 6 months

**PIP joint intraarticular fracture and or dislocation at proximal or middle phalanx [DWC]:**
Postsurgical treatment: Postsurgical treatment: 20 visits over 6 months
*Postsurgical physical medicine treatment period: 8 months

**Proximal row carpectomy [DWC]:**
Postsurgical treatment:20 visits over 6 months
*Postsurgical physical medicine treatment period: 8 months

**Radial Nerve Repair: Elbow –Wrist [DWC]**
Postsurgical treatment: 20 visits over 6 weeks
*Postsurgical physical medicine treatment period: 8 months

**Radial styloid tenosynovitis (de Quervain's) (ICD9 727.04):**
Postsurgical treatment: 14 visits over 12 weeks
*Postsurgical physical medicine treatment period: 6 months

**Synovitis and tenosynovitis (ICD9 727.0):**
Postsurgical treatment: 14 visits over 12 weeks
*Postsurgical physical medicine treatment period: 6 months

**Tendon transfer forearm, wrist or hand [DWC]:**
Postsurgical treatment: 14 visits over 4 months
*Postsurgical physical medicine treatment period: 6 months

**Tendon transfers - thumb or finger [DWC]:**
Postoperative treatment: 26 visits over 4 months
*Postsurgical physical medicine treatment period: 6 months

**TFCC injuries-debridement (arthroscopic) [DWC]:**
Postoperative treatment: 10 visits over 10 weeks
*Postsurgical physical medicine treatment period: 4 months

**Trigger finger (ICD9 727.03):**
Postoperative treatment: 9 visits over 8 weeks
*Postsurgical physical medicine treatment period: 4 months

**Ulnar nerve entrapment/Cubital tunnel syndrome (ICD9 354.2):**
Postoperative treatment: 20 visits over 10 weeks
*Postsurgical physical medicine treatment period: 4 months

**Wrist - intercarpal ligament reconstruction or repair [DWC]:**
Postoperative treatment 20 visits over 6 months
*Postsurgical physical medicine treatment period: 8 months

**Head**

Patient rehabilitation after traumatic brain injury is divided into two periods: acute and subacute. In the beginning of rehabilitation physical therapist evaluates patient's functional status, later he uses methods and means of treatment, and evaluates effectiveness of rehabilitation. Early ambulation is very important for patients with coma. Physical therapy consists of prevention of complications, improvement of muscle force, and range of motions, balance, movement coordination, endurance and cognitive functions. Early rehabilitation is necessary for traumatic brain injury patients and use of physical therapy methods can help to regain lost functions and to come back to the society. (Colorado, 2005) (Brown, 2005) (Franckeviciute, 2005) (Driver, 2004) (Shiel, 2001)

**Fracture of skull (ICD9 801):**
Postoperative treatment: 34 visits over 16 weeks
*Postsurgical physical medicine treatment period: 6 months

**Hernia**

Not recommended. No evidence of successful outcomes compared to surgery.
Hip, Pelvis and Thigh (femur)

Arthrodesis [DWC]:
Postsurgical treatment: 22 visits over 3 months
*Post surgical physical medicine treatment period: 6 months

Arthropathy, unspecified (ICD9 716.9):
Postsurgical treatment, arthroplasty/fusion, hip: 24 visits over 10 weeks
*Post surgical physical medicine treatment period: 4 months

Fracture of neck of femur (ICD9 820):
Postsurgical treatment: 24 visits over 10 weeks
*Post surgical physical medicine treatment period: 4 months

Fracture of pelvis (ICD9 808):
Postsurgical treatment: 24 visits over 10 weeks
*Post surgical physical medicine treatment period: 4 months

Synovectomy [DWC]:
Postsurgical treatment: 14 visits over 3 months
*Post surgical physical medicine treatment period: 6 months

Knee

Controversy exists about the effectiveness of physical therapy after arthroscopic partial meniscectomy. (Goodwin, 2003) Functional exercises after hospital discharge for total knee arthroplasty result in a small to moderate short-term, but not long-term, benefit. In the short term physical therapy interventions with exercises based on functional activities may be more effective after total knee arthroplasty than traditional exercise programs, which concentrate on isometric muscle exercises and exercises to increase range of motion in the joint. (Lowe, 2007)

Amputation of leg (ICD9 897):
Post-replantation surgery: 48 visits over 26 weeks
*Postsurgical physical medicine treatment period: 12 months
Post-amputation [DWC]: 48 visits over 6 months
*Postsurgical physical medicine treatment period: 8 months

**Arthritis (Arthropyathy, unspecified) (ICD9 716.9):**
Post-surgical treatment, arthroplasty, knee: 24 visits over 10 weeks
*Postsurgical physical medicine treatment period: 4 months

**Dislocation of knee; Tear of medial/lateral cartilage/meniscus of knee; Dislocation of patella (ICD9 836; 836.0; 836.1; 836.2; 836.3; 836.5):**
Post-surgical treatment: (Meniscectomy): 12 visits over 12 weeks
*Postsurgical physical medicine treatment period: 6 months

**Fracture of neck of femur (ICD9 820):**
Post-surgical treatment: 18 visits over 8 weeks
*Postsurgical physical medicine treatment period: 6 months

**Fracture of other and unspecified parts of femur (ICD9 821):**
Post-surgical treatment: 30 visits over 12 weeks
*Postsurgical physical medicine treatment period: 6 months

**Fracture of patella (ICD9 822):**
Post-surgical treatment: 10 visits over 8 weeks
*Postsurgical physical medicine treatment period: 4 months

**Fracture of tibia and fibula (ICD9 823):**
Post-surgical treatment (ORIF): 30 visits over 12 weeks
*Postsurgical physical medicine treatment period: 6 months

**Manipulation under Anesthesia (knee) [DWC]:**
Post-surgical treatment: 20 visits over 4 months
*Postsurgical physical medicine treatment period: 6 months

**Old bucket handle tear; Derangement of meniscus; Loose body in knee; Chondromalacia of patella; Tibialis tendonitis (ICD9 717.0; 717.5; 717.6; 717.7; 726.72):**
Post-surgical treatment: 12 visits over 12 weeks
*Postsurgical physical medicine treatment period: 4 months

**Sprains and strains of knee and leg; Cruciate ligament of knee (ACL tear) (ICD9 844; 844.2):**
Post-surgical treatment: (ACL repair): 24 visits over 16 weeks
*Postsurgical physical medicine treatment period: 6 months

**Low Back**
Artificial Disc [DWC]:
Postoperative treatment: 18 visits over 4 months
*Postoperative physical medicine treatment period: 6 months

Fracture of vertebral column with spinal cord injury (ICD9 806):
Postoperative treatment: 48 visits over 18 weeks
*Postoperative physical medicine treatment period: 6 months

Fracture of vertebral column without spinal cord injury (ICD9 805):
Postoperative treatment: 34 visits over 16 weeks
*Postoperative physical medicine treatment period: 6 months

Intervertebral disc disorder with myelopathy (ICD9 722.7):
Postoperative treatment: 48 visits over 18 weeks
*Postoperative physical medicine treatment period: 6 months

Intervertebral disc disorders without myelopathy (ICD9 722.1; 722.2; 722.5; 722.6; 722.8):
Postoperative treatment (discectomy/laminectomy): 16 visits over 8 weeks
*Postoperative physical medicine treatment period: 6 months

Postoperative treatment (fusion): 34 visits over 16 weeks
*Postoperative physical medicine treatment period: 6 months

Spinal stenosis (ICD9 724.0):
See 722.1 for postoperative visits
*Postoperative physical medicine treatment period: 6 months

Neck & Upper Back

Displacement of cervical intervertebral disc (ICD9 722.0):
Postoperative treatment (discectomy/laminectomy): 16 visits over 8 weeks
*Postoperative physical medicine treatment period: 6 months

Postoperative treatment (fusion): 24 visits over 16 weeks
*Postoperative physical medicine treatment period: 6 months

Degeneration of cervical intervertebral disc (ICD9 722.4):
See 722.0 for postoperative visits
*Postoperative physical medicine treatment period: 6 months

Fracture of vertebral column without spinal cord injury (ICD9 805):
Postoperative treatment: 34 visits over 16 weeks
*Postoperative physical medicine treatment period: 6 months

Fracture of vertebral column with spinal cord injury (ICD9 806):
Postsurgical treatment: 48 visits over 18 weeks
*Postsurgical physical medicine treatment period: 6 months

Shoulder

**Acromioclavicular joint dislocation** (ICD9 831.04):
AC separation, type III+: 8 visits over 8 weeks
*Postsurgical physical medicine treatment period: 6 months

**Adhesive capsulitis** (IC9 726.0):
Postsurgical treatment: 24 visits over 14 weeks
*Postsurgical physical medicine treatment period: 6 months

**Arthritis (Osteoarthrosis; Rheumatoid arthritis; Arthropathy, unspecified)** (ICD9 714.0; 715; 715.9; 716.9):
Postsurgical treatment, arthroplasty, shoulder: 24 visits over 10 weeks
*Postsurgical physical medicine treatment period: 6 months

**Brachial plexus lesions (Thoracic outlet syndrome)** (ICD9 353.0):
Postsurgical treatment: 20 visits over 10 weeks
*Postsurgical physical medicine treatment period: 6 months

**Complete rupture of rotator cuff** (ICD9 727.61; 727.6):
Postsurgical treatment: 40 visits over 16 weeks
*Postsurgical physical medicine treatment period: 6 months

**Dislocation of shoulder** (ICD9 831):
Postsurgical treatment (Bankart): 24 visits over 14 weeks
*Postsurgical physical medicine treatment period: 6 months

**Fracture of humerus** (ICD9 812):
Postsurgical treatment: 24 visits over 14 weeks
*Postsurgical physical medicine treatment period: 6 months

**Rotator cuff syndrome/Impingement syndrome** (ICD9 726.1; 726.12):
Postsurgical treatment, arthroscopic: 24 visits over 14 weeks
*Postsurgical physical medicine treatment period: 6 months

Postsurgical treatment, open: 30 visits over 18 weeks
*Postsurgical physical medicine treatment period: 6 months

**Sprained shoulder; rotator cuff** (ICD9 840; 840.4):
Postsurgical treatment (RC repair/acromioplasty): 24 visits over 14 weeks
*Postsurgical physical medicine treatment period: 6 months

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code.
§ 9792.25. Presumption of Correctness, Burden of Proof and Strength of Evidence.

(a) The Medical Treatment Utilization Schedule MTUS is presumptively correct on the issue of extent and scope of medical treatment and diagnostic services addressed in the Medical Treatment Utilization Schedule MTUS for the duration of the medical condition. The presumption is rebuttable and may be controverted by a preponderance of scientific medical evidence establishing that a variance from the schedule is reasonably required to cure or relieve the injured worker from the effects of his or her injury. The presumption created is one affecting the burden of proof.

(b) For all conditions or injuries not addressed by the Medical Treatment Utilization Schedule MTUS, authorized treatment and diagnostic services shall be in accordance with other scientifically and evidence-based medical treatment guidelines that are nationally recognized by the medical community.

(c)(1) For conditions or injuries not addressed by either subdivisions (a) or (b) above; for medical treatment and diagnostic services at variance with both subdivisions (a) or (b) above; or where a recommended medical treatment or diagnostic service covered under subdivision (b) is at variance with another treatment guideline also covered under subdivision (b), the following ACOEM’s strength of evidence rating methodology is adopted and incorporated as set forth below, and shall be used to evaluate scientifically based evidence published in peer-reviewed, nationally recognized journals to recommend specific medical treatment or diagnostic services:

(A) Table A – Criteria Used to Rate Randomized Controlled Trials

Studies shall be rated using the following 11 criteria. Each criterion shall be rated 0, 0.5, or 1.0, thus the overall ratings range from 0-11. A study is considered low quality if the composite rating was 3.5 or less, intermediate quality if rated 4-7.5, and high quality if rated 8-11.

<table>
<thead>
<tr>
<th>Criteria</th>
<th>Rating Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Randomization:</strong></td>
<td>Rating is “0” if the study is not randomized or reports that it was and subsequent analyses of the data/tables suggest it either was not randomized or was unsuccessful.</td>
</tr>
<tr>
<td>Assessment of the degree that randomization was both reported to have been performed and successfully* achieved through analyses of comparisons of variables between the two groups.</td>
<td>Rating is “0.5” if there is mention of randomization and it appears as if it was performed, however there are no data on the success of randomization, it appears incomplete, or other questions about randomization cannot be adequately addressed.</td>
</tr>
<tr>
<td></td>
<td>Rating is “1.0” if randomization is specifically stated and</td>
</tr>
</tbody>
</table>
*Simply allocating individuals to groups does not constitute sufficient grounds to assess the success of randomization. The groups must be comparable; otherwise, the randomization was unsuccessful.

<table>
<thead>
<tr>
<th>Treatment Allocation Concealed:</th>
<th>Data reported on subgroups suggests that the study did achieve successful randomization.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Concealment of the allocation scheme from all involved, not just the patient.</td>
<td>Rating is “0” if there is no description of how members of the research team or subjects would have not been able to know how they were going to receive a particular treatment, or the process used would not be concealed.</td>
</tr>
<tr>
<td></td>
<td>Rating is “0.5” if the article mentions how allocation was concealed, but the concealment was either partial involving only some of those involved or other questions about it are unable to be completely addressed.</td>
</tr>
<tr>
<td></td>
<td>Rating is “1.0” if there is a concealment process described that would conceal the treatment allocation to all those involved.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Baseline Comparability:</th>
<th>Rating is “0” if analyses show that the groups were dissimilar at baseline or it cannot be assessed.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Measures how well the baseline groups are comparable (e.g., age, gender, prior treatment).</td>
<td>Rating is “0.5” if there is general comparability, though one variable may not be comparable.</td>
</tr>
<tr>
<td></td>
<td>Rating is “1.0” if there is good comparability for all variables between the groups at baseline.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Patient Blinded</th>
<th>Rating is “0” if there is no mention of blinding of the patient.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Rating is “0.5” if it mentions blinding, but the methods are unclear.</td>
</tr>
</tbody>
</table>
| **Provider Blinded** | Rating is “0” if there is no mention of blinding of the provider.  
Rating is “0.5” if it mentions blinding, but the methods are unclear.  
Rating is “1.0” if the study reports blinding, describes how that was carried out and would plausibly blind the patient. |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| **Assessor Blinded** | Rating is “0” if there is no mention of blinding of the assessor.  
Rating is “0.5” if it mentions blinding, but the methods are unclear.  
Rating is “1.0” if the study reports blinding, describes how that was carried out and would plausibly blind the assessor. |
| **Controlled for Co-interventions:** The degree to which the study design controlled for multiple interventions (e.g., a combination of stretching exercises and anti-inflammatory medication or mention of not using other treatments during the study). | Rating is “0” if there are multiple interventions or no description of how this was avoided.  
Rating is “0.5” if there is brief mention of this potential problem.  
Rating is “1.0” if there is a detailed description of how co-interventions were avoided. |
| **Compliance Acceptable:** Measures the degree of non-compliance. | Rating is “0” if there is no mention of non-compliance.  
Rating is “0.5” if non-compliance is briefly addressed and the description suggests that there was compliance, but a complete assessment is not possible. |
<table>
<thead>
<tr>
<th><strong>Rating</strong></th>
<th><strong>Description</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Rating is “1.0” if there are specific data and the non-compliance rate is less than 20%.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Rating</strong></th>
<th><strong>Description</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Rating is “0” if there is no mention of drop-outs or it cannot be inferred from the data presented.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Rating</strong></th>
<th><strong>Description</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Rating is “0.5” if the drop-out issue is briefly addressed and the description suggests that there were few drop-outs, but a complete assessment is not possible.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Rating</strong></th>
<th><strong>Description</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Rating is “1.0” if there are specific data and the drop-out rate is under 20%.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Rating</strong></th>
<th><strong>Description</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Rating is “0” if the timing of the evaluations is different between the groups.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Rating</strong></th>
<th><strong>Description</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Rating is “0.5” if the timing is nearly identical (e.g., one day apart).</td>
<td></td>

(B) Table B – Strength of Evidence Ratings

Levels of evidence shall be used to rate the quality of the body of evidence. The body of evidence shall consist of all studies on a given topic that are used to develop evidence-based recommendations. Levels of evidence shall be applied when studies are relevant to the topic and study working populations. Study outcomes shall be consistent and study data shall be homogeneous.

<table>
<thead>
<tr>
<th></th>
<th>Strong evidence-base: One or more well-conducted systematic reviews or meta-analyses, or two or more high-quality studies.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Moderate evidence-base: At least one high-quality study, a well-conducted systematic review or meta-analysis of lower quality studies or multiple lower-quality studies relevant to the topic and the working population.</td>
</tr>
<tr>
<td></td>
<td>Limited evidence-base: At least one study of intermediate quality.</td>
</tr>
<tr>
<td></td>
<td>Insufficient Evidence: Evidence is insufficient or irreconcilable.</td>
</tr>
</tbody>
</table>

(2) Evidence shall be given the highest weight in the order of the strength of evidence.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code.
Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.

§ 9792.26. Medical Evidence Evaluation Advisory Committee

(a)(1) The Medical Director shall create a medical evidence evaluation advisory committee to provide recommendations to the Medical Director on matters concerning the medical treatment utilization schedule MTUS. The recommendations are advisory only and shall not constitute scientifically based evidence.
(A) If the Medical Director position becomes vacant, the Administrative Director shall appoint a competent person to temporarily assume the authority and duties of the Medical Director as set forth in this section, until such time that the Medical Director position is filled.

(2) The members of the medical evidence evaluation advisory committee shall be appointed by the Medical Director, or his or her designee, and shall consist of 17 members of the medical community holding the following licenses: Medical Doctor (M.D.) board certified by an American Board of Medical Specialties (ABMS) approved specialty board; Doctor of Osteopathy (D.O.) board certified by an ABMS or American Osteopathic Association (AOA) approved specialty board; M.D. board certified by a Medical Board of California (MBC) approved specialty board; Doctor of Chiropractic (D.C.); Physical Therapy (P.T.); Occupational Therapy (O.T.); Acupuncture (L.Ac.); Psychology (PhD.); or Doctor of Podiatric Medicine (DPM), and representing the following specialty fields:

(A) One member shall be from the orthopedic field;

(B) One member shall be from the chiropractic field;

(C) One member shall be from the occupational medicine field;

(D) One member shall be from the acupuncture medicine field;

(E) One member shall be from the physical therapy field;

(F) One member shall be from the psychology field;

(G) One member shall be from the pain specialty field;

(H) One member shall be from the occupational therapy field;

(I) One member shall be from the psychiatry field;

(J) One member shall be from the neurosurgery field;

(K) One member shall be from the family physician field;

(L) One member shall be from the neurology field;

(M) One member shall be from the internal medicine field;

(N) One member shall be from the physical medicine and rehabilitation field;

(O) One member shall be from the podiatrist field;
(P) Two additional members shall be appointed at the discretion of the Medical Director or his or her designee.

(3) In addition to the seventeen members of the medical evidence evaluation advisory committee appointed under subdivision (a)(2) above, the Medical Director, or his or her designee, may appoint an additional three members to the medical evidence evaluation advisory committee as subject matter experts for any given topic.

(b) The Medical Director, or his or her designee, shall serve as the chairperson of the medical evidence evaluation advisory committee.

(c) To evaluate evidence when making recommendations to revise, update or supplement the medical treatment utilization schedule MTUS, the members of the medical evidence evaluation advisory committee shall:

(1) Apply the requirements of subdivision (b) of § 9792.225 in reviewing medical treatment guidelines to insure that the guidelines are scientifically and evidence-based, and nationally recognized by the medical community;

(2) Apply the ACOEM’s strength of evidence rating methodology to the scientific evidence as set forth in subdivision (c) of § 9792.225 after identifying areas in the guidelines which do not meet the requirements set forth in subdivision (b) of § 9792.225;

(3) Apply in reviewing the scientific evidence, the ACOEM’s strength of evidence rating methodology for treatments where there are no medical treatment guidelines or where a guideline is developed by the Administrative Director, as set forth in subdivision (c) of § 9792.225.

(d) The members of the medical evidence evaluation advisory committee, except for the three subject matter experts, shall serve a term of two year period, but shall remain in that position until a successor is selected. The subject matter experts shall serve as members of the medical evidence evaluation advisory committee until the evaluation of the subject matter guideline is completed. The members of the committee shall meet as necessary, but no less than four (4) times a year.

(g) The Administrative Director, in consultation with the Medical Director, may revise, update, and supplement the medical treatment utilization schedule MTUS as necessary.

Authority: Sections 133, 4603.5, 5307.3, and 5307.27, Labor Code.
Reference: Sections 77.5, 4600, 4604.5, and 5307.27, Labor Code.
