18	323	008	330	FILLER (not currently used)	A/N		-
*	Each Record Type '013' can contain up to 10 significant events. The first '013' record will start off with the first Significant Events associated for the WCAB case in Significant Event #1. Each following Significant Event will be placed in Significant Event #2-10. If there are more than 10 Significant Events then a second '013' record will be produced for Significant Events 11-20 and so on until all Significant Events have been written. Significant Event code translations are available under a separate attachment.						
**	Record sequence will increment by 1 for subsequent response records where there were more than 10 events.						
NOTE: Service Level for "Full History Inquiry" has been changed to 'B'.							
NOTE: The SSN will no longer be provided in the 013 transaction set. In its place will be the EAMS Reference # for the injured worker.							
NOTE: The EAMS ADJ Case Reference Number is the primary identifier for ADJ cases. It replaces the DWC Legacy Case Number.							
NOTE: Error codes reduced from 5 to only 3 provided.							
NOTE: The DWC Legacy Case Number has been carved from space provided for the last two Error Codes (error code #4 and error code #5) since there was no other place provided.
