**HOW THE IBR FINAL DETERMINATION WAS MADE**

MAXIMUS Federal Services Chief Coding Specialist reviewed the case file and researched pertinent coding and billing standards to reach a determination. In some cases a physician reviewer was employed to review the clinical aspects of the care to help make a determination. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services.

**ANALYSIS AND FINDING**

Based on review of the case file the following is noted:

- **ISSUE IN DISPUTE:** Provider is dissatisfied with denial of CPT 64484-RT-59.

- Claims administrator denied code indicating on the Explanation of Review “Billed service is not identified in the operative report.”

- Based on review of the operative report, provider documents epidural injections were performed at L4, L5 and S1 totaling three separate spinal segment levels. Billed codes included 64483 and 64484.

- 64484 - Injection(s), anesthetic agent and/or steroid, transforaminal epidural, with imaging guidance (fluoroscopy or CT); lumbar or sacral, each additional level (List separately in addition to code for primary procedure). Use 64484 in conjunction with 64483

- Based on information reviewed, reimbursement of code 64484 is warranted.
