Re: Claim Number: 
Claims Administrator name: 
Date of Disputed Services: 2/5/2013 – 2/5/2013 
MAXIMUS IBR Case: CB13-0000208

Dear [REDACTED],

Determination
A Request for Independent Bill Review (IBR) was assigned to MAXIMUS Federal Services on 7/24/2013, by the Administrative Director of the California Division of Workers' Compensation pursuant to California Labor Code section 4603.6. MAXIMUS Federal Services has determined that the Claims Administrator’s determination is upheld. This determination finds that the Claims Administrator does not owe the Provider additional reimbursement.

Pertinent Records and Other Appropriate Information Relevant to the Determination Reviewed:
The following evidence was used to support the decision:

- The original billing itemization
- Supporting documents submitted with the original billing
- Explanation of Review in response to the original bill
- Request for Second Bill Review and documentation
- Supporting documents submitted with the request for second review
- The final explanation of the second review
- Other: Centers for Medicare & Medicaid Services National Correct Coding Initiative Guidelines 1/1/13
Supporting Analysis:
The dispute regards the denial of a laboratory service (83925) for date of service 2/5/2013. The Provider billed procedure codes 82145, 82205, 80154, 82520, 83840, 83992, 83925, 83925 (Modifier 59), 82145, 82055 and 82570. The Provider was reimbursed $198.98 and is requesting additional reimbursement of $27.98. The Claims Administrator reimbursed the provider on all of the billed procedure codes except for 83925 indicating "No separate payment was made because the value of the service is included within the value of another service performed on the same day (83925)."

The toxicology results submitted report a quantitative measure of each drug screened. Due to the complexity of the toxicology test performed, the levels tracked and results obtained the billed procedure codes shall be paid in accordance with HCPCS code G0431. The HCPCS code G0431 is reported with only one unit of service regardless of the number of drugs screened. The testing described by G0431 includes all CLIA high complexity urine drug screen testing as well as any less complex urine drug screen testing performed at the same patient encounter. The description of HCPCS code G0431 is "Drug screen, qualitative; multiple drug classes by high complexity test method (e.g. immunoassay, enzyme assay), per patient encounter."

The reimbursement for HCPCS G0431 is $101.95. The Claims Administrator reimbursed the Provider a total of $198.98 for the laboratory services billed on date of service 2/5/2013. The previously paid amount of $198.98 exceeds the recommended allowance of $101.95; therefore, no additional reimbursement is warranted for the Official Medical Fee Schedule code 83925.

The chart below provides a comparison of billed charges and reimbursement rates for the codes and dates of services at issue.

Chief Coding Specialist Decision Rationale:
This decision was based on CMS Correct Coding Initiative Guidelines and comparison with PPO Contract. This was determined correctly by the Claims Administrator and the payment of $0.00 is upheld.

This decision constitutes the final determination of the Division of Workers’ Compensation Administrative Director, is binding on all parties, and is not subject to further appeal except as specified in Labor Code section 4603.6(f)
