Dear [Provider Name]

Determination
A Request for Independent Bill Review (IBR) was assigned to MAXIMUS Federal Services on 04/02/2014, by the Administrative Director of the California Division of Workers' Compensation pursuant to California Labor Code section 4603.6. MAXIMUS Federal Services has determined that the Claims Administrator’s determination is upheld. This determination finds that the Claims Administrator does not owe the Provider additional reimbursement.

Pertinent Records and Other Appropriate Information Relevant to the Determination Reviewed:
The following evidence was used to support the decision:
- The original billing itemization
- Supporting documents submitted with the original billing
- Explanation of Review in response to the original bill
- Request for Second Bill Review and documentation
- Supporting documents submitted with the request for second review
- The final explanation of the second review
- Other: Centers for Medicare & Medicaid Services National Correct Coding Initiative Guidelines 1/1/13
Supporting Analysis:

Pursuant to Labor Code section 5307.1(g)(2), the Administrative Director of the Division of Workers’ Compensation orders that the pathology and clinical laboratory fee schedule portion of the Official Medical Fee Schedule (OMFS) contained in title 8, California Code of Regulations, section 9789.50, has been adjusted to conform to the changes to the Medicare payment system that were adopted by the Centers for Medicare & Medicaid Services (CMS) for calendar year 2013. Effective for services rendered on or after January 1, 2013, the maximum reasonable fees for pathology and laboratory services shall not exceed 120% of the applicable California fees set forth in the calendar year 2012 Clinical Laboratory Fee Schedule. Based on the adoption of the CMS payment system, CMS coding guidelines and fee schedule were referenced during the review of this Independent Bill Review (IBR) case.

The dispute regards the payment amount for laboratory services (82486) for date of service 02/11/2013 and 05/13/2013. The provider billed CPT code 82486 x 40 (units) for each date of service. The provider was reimbursed $239.88 for the laboratory service codes and is requesting an additional reimbursement of $1571.00.

The Claims Administrator bundled the billed procedure code 82486 into HCPCS G0431 for both dates of service (02/11/2013 and 05/13/2013) with the following explanation codes:

- Included in another procedure
- Documentation doesn’t support the level of service
- Based on the documentation submitted, the service performed is a Routine Drug Screen. Per CMS the Drug Screen CPTs were changed to G0431 for labs and G0434 for physicians. The service is PER patient encounter CPT. Refer to CMS.GOV for more info.

2013 AMA Current Procedural Terminology (CPT) code definitions:

- **CPT 82486**: Chromatography, qualitative; column (e.g., gas liquid or HPLC), analyte not elsewhere specified

The Provider submitted laboratory results for the CPT codes documenting qualitative test results for the following drug categories: Narcotics/Analgesics; Opiates; Oxycodone; Methadone; Benzodiazepines; Barbiturates; Amphetamines; Tricyclic Antidepressants; Antidepressants; Neuropathic; and Sedatives/ Hypnotics. The Provider billed the laboratory services on a CMS-1500 form: Date of service 02/11/2013 CPT 80102 x 4; 82486 x 40; and ICD-9 V58.83: Encounter for therapeutic drug monitoring; and date of service 05/13/2013 CPT 80102 x 4; 82486 x 40; and ICD-9 V58.83: Encounter for therapeutic drug monitoring. It is noted that the documentation to support the need for CPT 82486 X 40 units has yet to be submitted; as such, only the provided CMS-1500 form and 2 page lab results of the aforementioned chemicals can be taken into consideration during this review. In addition, the ICD.9 code is not coded to the highest specificity for CPT 82486 X40.

The Provider conducted drug screening tests utilizing the Chromatography method. The HCPCS code G0431 can be used for any method. The HCPCS code G0431 is reported with only one unit of service regardless of the number of drugs screened. The testing described by G0431 includes all
CLIA high complexity urine drug screen testing as well as any less complex urine drug screen testing performed at the same patient encounter.

HCPCS G0431: Drug screen, qualitative; multiple drug classes by high complexity test method (e.g. immunoassay, enzyme assay), per patient encounter

Based on the documentation submitted, the code assignment and reimbursement of HCPCS G0431 by the Claims Administrator was correct. No additional reimbursement is recommended for CPT 82486.

There is no additional reimbursement warranted for the Official Medical Fee Schedule code 82486 (G0431).

The chart below provides a comparison of billed charges and reimbursement rates for the codes and dates of services at issue.

**Chief Coding Specialist Decision Rationale:**

IBR Final Determination Upheld
Form Effective Date 7.23.13
This decision was based on medical record, explanation of review and comparison with Official Medical Fee Schedule Pathology and Clinical Laboratory Fee Schedule. This was determined correctly by the Claims Administrator and the payment of $239.88 is upheld.

This decision constitutes the final determination of the Division of Workers' Compensation Administrative Director, is binding on all parties, and is not subject to further appeal except as specified in Labor Code section 4603.6(f)

Sincerely,

[Redacted], RHIT
Chief Coding Reviewer
