HOW THE IBR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services Chief Coding Specialist reviewed the case file and researched pertinent coding and billing standards to reach a determination. In some cases a physician reviewer was employed to review the clinical aspects of the care to help make a determination. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services.

ANALYSIS AND FINDING

Based on review of the case file the following is noted:

- **ISSUE IN DISPUTE**: Office Visit 99214-25 was denied services by the Claim Administrator because it was submitted with code 90833.
- The CMS 1997 Guidelines and the American Medical Association (AMA), CPT 2014 Edition were reviewed.
- Based on review of the National Correct Coding Initiative, code 99213 can be assigned with code 90833.
- Based on review of the medical record documentation the services rendered satisfied the requirements for CPT code 99213-25 not 99214-25 as originally submitted. The physician provided Evaluation and Management services with Psychotherapy services.
- The PR-2 documentation for date of service 5/13/14 included History elements that were Expanded Problem Focused. The “subjective complaints “included associated signs, modifying factors, timing and one Review of Systems. These elements satisfy requirements for an Expanded Problem Focused History. The examination was Detailed based on 9 bullet points using the 1997 E/M Coding Guidelines for a Psychiatric Examination. Medical Decision Making was Low based on two problems that were improving and medical management. The final key components are Expanded Problem Focused History, Detailed Exam and Low Medical Decision Making. Per CPT 2014, a Level 99213 meets the
requirements for the three key components. By adding the modifier 25 to the E/M code, the physician is entitled to submit a separately identifiable services provided on the same day such as Psychotherapy, 90833. The physician documented 18 minutes of Psychotherapy. He provided interventions such as “non-pharmacologic interventions including motivations for some walking and stretches ... and continue pool therapy”. He provided interactive communications with the patient. This meets the requirements for CPT code 90833.

The table below describes the pertinent claim line information.
