HOW THE IBR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services Chief Coding Specialist reviewed the case file and researched pertinent coding and billing standards to reach a determination. In some cases a physician reviewer was employed to review the clinical aspects of the care to help make a determination. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services.

ANALYSIS AND FINDING

Based on review of the case file the following is noted:

- **ISSUE IN DISPUTE: Provider seeking additional remuneration for compound medication J2278 NDC418860072010, Prialt & J1170 NDC38779073105, Hydromorphone HCL Powder utilized for pain pump refill on 03/18/2014.**
- Claims Administrator reimbursement rationale: “This charge is reduced or denied because medical documentation does not support the number of units billed. “
- Per Labor Code Section 5307 (e)(2) compounded drug products are to be billed by the pharmacy or dispensing physician at the **ingredient level** by National Drug Code (NDC) and quantity.
- CMS 1500 form reflects Prialt J2278 N418860072010 x 600 units and Hydromorphone (Dilaudid) J1170 NDC38779-0731-05 x 38 units.
- Code Description:
 - J2278 Prialt Injection
 - J1170 Hydromorphone Injection
- Red Book indicates **NDC 38779073105 Hydromorphone Powder per gram.**
- Code **J1170** does not adequately represent documented medication as the reported NDC reflects the pharmaceutical in powder form, not a premixed solution represented by J1170. As such, The NDCs and Metric Decimal Units (MDU) for **the grams of powder utilized** were entered into the Workers’ Compensation Pharmacy Compound Prescription Calculator.
 - Hydromorphone 7.5 mg ‘at the ingredient level’ equates to 0.007500000 **grams** of powder.
- EOR 1/9/2015 reflects \$83.60 reimbursement for NDC38779-0731-05 Hydromorphone.
- Based on the documentation and guidelines, additional reimbursement is not indicated for NDC38779-0731-05 Hydromorphone.
- **J2278-KD NDC 418860072010** documentation indicates Prialt 100 mcg/1 ml x 6 vials of single dose ampule administered to Intrathecal Pain Pump.
- DWC Simple Medication Calculator utilized to calculate 1 ml of Prialt x 6 vials NDC 418860072010 for Date of Service 03/18/2014. Calculations reflected in reimbursement table below.
- EOR 1/9/2015 reflects \$108.00 reimbursement for NDC 418860072010 Prialt.
