HOW THE IBR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services Chief Coding Specialist reviewed the case file and researched pertinent coding and billing standards to reach a determination. In some cases a physician reviewer was employed to review the clinical aspects of the care to help make a determination. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services.

ANALYSIS AND FINDING

Based on review of the case file the following is noted:

- **ISSUE IN DISPUTE: Provider seeking full remuneration submitted 99205 New Patient Evaluation and Management Services performed on 02/16/2015.**
- Claims Administrator applied reimbursement relating to CPT 99203 with the following rational: “Better defining service.”
- The determination of an Evaluation and Management service for New Patients require **all three key components** in the following areas:
 - 1) **History:** Chief Complaint, History of Present Illness, Review of Systems (Inventory of Body Systems), Past Family and Social History.
 - 2) **Examination: All elements** in a general multi system examination, **or complete examination of a single organ system** and other symptomatic or related body area(s) or organ system(s)
 - 3) **Medical Decision Making Medical** decision making refers to the complexity of establishing a diagnosis and/or selecting a management option, which is determined by considering the following factors:
 - a. The number of possible diagnoses and/or the number of management options that must be considered;
 - b. The amount and/or complexity of medical records, diagnostic tests, and/or other information that must be obtained, reviewed, and analyzed; and

- c. The risk of significant complications, morbidity, and/or mortality as well as comorbidities associated with the patient's presenting problem(s), the diagnostic procedure(s), and/or the possible management options.

 - 99203: Expanded Problem Focused / Expanded Problem Focused / Low Complexity
 - 99204: Detailed History / Detailed Exam / Moderate Complexity

- **Time:** In the case where counseling and/or coordination of care dominates (more than 50%) of the physician/patient and/or family encounter (face-to-face time in the office or other outpatient setting or floor/unit time in the hospital or nursing facility), time is considered the key or controlling factor to qualify for a particular level of E/M services. The total length of time of the encounter (faced-to-face) should be documented and **the record should describe the counseling and/or activities to coordinate care.**
