HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer is Board Certified in Acupuncture, has a subspecialty in Addiction Detoxification and is licensed to practice in New York. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

On 12/12/13, date of the utilization review determination, the claims administrator did not find it reasonable for the applicant to receive acupuncture therapy and did not certify such stating as per MTUS guidelines acupuncture is used when medications are reduced or not tolerated, or in adjunct with another active physical rehabilitation therapy. The applicant is not involved in a physical therapy program.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

8 ACCUPUNCTURE SESSIONS (2 TIMES A WEEK FOR 4 WEEKS) TO CERVICAL AND LUMBAR SPINE: Upheld

Claims Administrator guideline: Decision based on MTUS Acupuncture Treatment Guidelines.

MAXIMUS guideline: Decision based on MTUS Acupuncture Treatment Guidelines.

Decision rationale: After reviewing multiple pages of notes and records, it is evident, the applicant is not currently involved in an active physical rehabilitation program or intolerant of his medication and thus involved in a medicine reduction program. Therefore, as noted in MTUS 9792.24.1. acupuncture therapy is not medically necessary for this applicant.
