HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer is Board Certified in Physical Medicine and Rehabilitation and is licensed to practice in Texas. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

Medical records reflect the claimant is a 57 year old female who sustained a work injury on 9-29-09. The claimant has a diagnosis of carpal metacarpal arthrosis in both thumbs and possible radial tunnel syndrome or posterior interosseous neuropathy. Office visit from 6-16-14 notes the claimant reports discomfort in the right arm. The claimant had tenderness along the posterior interosseous nerve and radial tunnel. The claimant has had 6 sessions of physical therapy.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Physical Therapy 2 times a week for 3 weeks RUE: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Physical Medicine Guidelines.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines physical medicine Page(s): 98-99. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) pain chapter - physical medicine.

Decision rationale: Chronic Pain Medical Treatment Guidelines as well as ODG notes that one should allow for fading of treatment frequency (from up to 3 visits per week to 1 or less), plus active self-directed home Physical Medicine. The claimant had been provided 6 physical therapy sessions recently. There is an absence in documentation noting that this claimant cannot perform

a home exercise program. There are no extenuating circumstances to support physical therapy at this juncture. Therefore, this request is not medically necessary.
