HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer is a licensed Chiropractor, has a subspecialty in Acupuncture and is licensed to practice in California. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 32 year old male who reported low back pain from injury sustained on 09/03/13. Patient was lifting and felt sharp pull as he attempted to stand upright. There were no diagnostic imaging reports. Patient is diagnosed with lumbosacral disc, thoracic sprain/strain, and lumbar sprain/strain. Patient has been treated with medication. The only medical records provided for review were dated 09/03/13. Per medical records dated 09/03/13, patient complains of low back pain which is moderately severe. Pain is constant and is rated at 7/10. Patient does not complain of any numbness or tingling in the lower extremity. Provider requested initial trial of 8 acupuncture sessions which were modified to 6 visits by the utilization reviewer.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Acupuncture x 8: Upheld

Claims Administrator guideline: Decision based on MTUS Acupuncture Treatment Guidelines.

MAXIMUS guideline: Decision based on MTUS Acupuncture Treatment Guidelines.

Decision rationale: Per California Medical Treatment Utilization Schedule (MTUS)- Section 9792.24.1 Acupuncture Medical treatment Guidelines Page 8-9. "Acupuncture is used as an option when pain medication is reduced and not tolerated, it may be used as an adjunct to

physical rehabilitation and/or surgical intervention to hasten functional recovery". "Time to produce function improvement: 3-6 treatments. 2) Frequency: 1-3 times per week. 3) Optimum duration: 1-2 months. Acupuncture treatments may be extended if functional improvement is documented". Patient has not had prior Acupuncture treatment. Provider requested initial trial of 8 acupuncture sessions for low back pain which were modified to 6 by the utilization reviewer. Per guidelines 3-6 treatments are supported for initial course of Acupuncture with evidence of functional improvement prior to consideration of additional care. Requested visits exceed the quantity of initial acupuncture visits supported by the cited guidelines. Additional visits may be rendered if the patient has documented objective functional improvement. MTUS- Definition 9792.20 (f) Functional improvement means either a clinically significant improvement in activities of daily living or a reduction in work restrictions as measured during the history and physical exam. Per guidelines and review of evidence, 8 Acupuncture visits are not medically necessary.
