Priority:	Standard	Application Received:	10/13/2014

HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer is Board Certified in Orthopedic Surgery, has a subspecialty in Spine Surgery and is licensed to practice in California. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

According to the records made available for review, this is a 40-year-old female with an 11/27/12 date of injury and status post partial lateral meniscectomy of the left knee on 7/2/14. At the time (9/9/14) of request for authorization for 18 physical therapy sessions, there is documentation of subjective (improved left knee symptoms) and objective (edema of the left knee) findings, current diagnoses (left knee pain status post partial lateral meniscectomy of the left knee), and treatment to date (18 postoperative physical therapy sessions with improved symptoms).

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

18 physical therapy sessions: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Physical Medicine.

MAXIMUS guideline: Decision based on MTUS Postsurgical Treatment Guidelines Page(s): 24. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) Knee, Physical therapy Other Medical Treatment Guideline or Medical Evidence: Â§ 9792.24. 3. Postsurgical Treatment Guidelines; and Title 8, California Code of Regulations, section 9792.2011

Decision rationale: MTUS Postsurgical Treatment Guidelines identifies up to 12 visits of post-operative physical therapy over 12 weeks and post-surgical physical medicine treatment period of up to 6 months. In addition, MTUS Postsurgical Treatment Guidelines identifies that the initial course of physical therapy following surgery is 1/2 the number of sessions recommended for the general course of therapy for the specified surgery. MTUS-Definitions identifies that any treatment intervention should not be continued in the absence of functional benefit or improvement as a reduction in work restrictions; an increase in activity tolerance; and/or a reduction in the use of medications or medical services. ODG identifies that when treatment requests exceeds guideline recommendations, the physician must provide a statement of exceptional factors to justify going outside of guideline parameters. Within the medical information available for review, there is documentation of a diagnosis of left knee pain status post partial lateral meniscectomy of the left knee. In addition, there is documentation of status post partial lateral meniscectomy of the left knee on 7/2/14. However, given documentation of 18 postoperative physical therapy sessions completed to date, which exceeds guidelines, there is no documentation of remaining functional deficits that would be considered exceptional factors to justify exceeding guidelines. In addition, despite documentation of improved symptoms with previous physical therapy, there is no (clear) documentation of functional benefit or improvement as a reduction in work restrictions; an increase in activity tolerance; and/or a reduction in the use of medications or medical services as a result of physical therapy provided to date. Therefore, based on guidelines and a review of the evidence, the request for 18 physical therapy sessions is not medically necessary.
