HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer is Board Certified in Physical Medicine and Rehabilitation and is licensed to practice in Texas. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

Medical records reflect the claimant is a 53-year old female who sustained a work injury on 5-28-02. Office visit on 8-4-14 notes the claimant had chronic low back pain will controlled with medications following a flare up from 6-6-14. The claimant continues to lose weight and diet. GI symptoms are adequately controlled with pantoprazole. The claimant was continued on medications.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

1 Prescription for baclofen 10mg #90: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Baclofen (Lioresal).

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines muscle relaxants Page(s): 63-67. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) pain chapter - muscle relaxants

Decision rationale: Chronic Pain Medical Treatment Guidelines as well as ODG does not support the long term use of muscle relaxants. There are no extenuating circumstances to support the long term use of this medication in this case. There is an absence in documentation noting

muscle spasms. Most recent office visit shows no documentation of examination. Therefore, the
1 Prescription for baclofen 10mg #90 is not medically necessary.
