HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer is Board Certified in Family Medicine and is licensed to practice in Arizona. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

Patient is a 37 year old male with a date of injury on 12/12/2009. Patient has been treated for ongoing symptoms from injuries sustained to multiple body parts (shoulders, ribs, right ankle). Subjective complaints are of moderate-severe right shoulder pain, worse with lifting. Physical exam shows rounded shoulders and decreased range of motion of the right shoulder. Medications include Norco 10/325 5 times a day, ibuprofen, Viibryd, and Xanax. Submitted documentation indicates that Norco provides up to 75% pain relief, and provides functional improvement.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Hydrocodone /APAP 10/325 #150 x2: Overturned

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Opioids for chronic pain Page(s): 80-81.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines OPIOIDS Page(s): 74-96.

Decision rationale: The patient in question has been on chronic opioid therapy. CA Chronic Pain Guidelines has specific recommendations for the ongoing management of opioid therapy. Clear evidence should be presented about the degree of analgesia, level of activity of daily

living, adverse side effects, or aberrant drug taking behavior. For this patient, documentation shows stability on medication, increase functional ability, and no adverse side effects. Furthermore, documentation is present of MTUS opioid compliance guidelines, including updated urine drug screen, risk assessment, and ongoing efficacy of medication. Therefore, the use of this medication is consistent with guidelines and is medically necessary for this patient.
