Date Assigned:	07/25/2014	Date of Injury:	10/01/2007
Decision Date:	08/28/2014	UR Denial Date:	06/18/2014
Priority:	Standard	Application Received:	06/24/2014

HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer is Board Certified in Physical Medicine & Rehabilitation and is licensed to practice in Nevada. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The records, presented for review, indicate that this 42-year-old male was reportedly injured on 10/1/2007. The mechanism of injury was not listed in these records reviewed. The most recent progress note, dated 4/4/2014, indicated that there were ongoing complaints of chronic pain syndrome and right shoulder pain. The physical examination demonstrated unremarkable physical exam of bilateral upper and lower extremities. No recent diagnostic studies were available for review. Previous treatment included previous surgery, and medications. A request had been made for cyclobenzaprine 10 mg #30 with 2 refills and was not certified in the pre-authorization process on 6/18/2014.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Cyclobenzaprine 10mg QTY 30, 2 refills: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Page(s): 63.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines 8: C.C.R. 9792.20 - 9792.26, (Effective July 18, 2009): Muscle relaxants, pages 41, 64 of 127 Page(s): 41, 64 of 127.

Decision rationale: MTUS supports the use of skeletal muscle relaxants for the short-term treatment of pain but advises against long-term use. Given the claimant's date of injury and clinical presentation, the guidelines do not support this request for chronic pain. As such, the request is not medically necessary.
