HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
 State(s) of Licensure: California
 Certification(s)/Specialty: Orthopedic Surgery

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a (n) 56 year old male, who sustained an industrial injury on 6/7/07. He reported pain in his right shoulder and neck after being struck by a falling object. The injured worker was diagnosed as having right rotator cuff arthropathy with severe loss of motion. Treatment to date has included physical therapy, a right shoulder MRI on 8/28/14 and a right shoulder arthroscopy on 2/19/08. As of the PR2 dated 4/6/15, the injured worker reports right shoulder pain. Objective findings include a positive Neer and Hawkins sign and marked weakness of the right shoulder to external rotation with a positive drop arm test. The treating physician requested a right shoulder repair of rotator cuff, bicep tendon tenodesis, possible Mumford procedure, an assistant physician's assistant, suture anchors and screws, post-operative physical therapy 3 x 4, pre-operative clearance, labs, chest x-ray, a shoulder ultrasling purchase, a pain pump purchase, a cold therapy unit purchase and an IF unit 30 day rental.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Right Shoulder Repair of rotator cuff tear, bicep tendon tenodesis, possible mumford procedure: Upheld

Claims Administrator guideline: Decision based on MTUS ACOEM Chapter 9 Shoulder Complaints Page(s): 209. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG); Shoulder Chapter (online version).

MAXIMUS guideline: Decision based on MTUS ACOEM Chapter 9 Shoulder Complaints Page(s): 209-210. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) Shoulder, Surgery for rotator cuff repair.

Decision rationale: According to the CA MTUS/ACOEM Shoulder Chapter, page 209-210, surgical considerations for the shoulder include failure of four months of activity modification and existence of a surgical lesion. In addition the guidelines recommend surgery consideration for a clear clinical and imaging evidence of a lesion shown to benefit from surgical repair. The ODG Shoulder section, surgery for rotator cuff repair, recommends 3-6 months of conservative care with a painful arc on exam from 90-130 degrees and night pain. There also must be weak or absent abduction with tenderness and impingement signs on exam. Finally there must be evidence of temporary relief from anesthetic pain injection and imaging evidence of deficit in rotator cuff. In this case the submitted notes from 4/6/15 do not demonstrate 4 months of failure of activity modification. The physical exam from 4/6/15 does not demonstrate a painful arc of motion, night pain or relief from anesthetic injection. Therefore the determination is not medically necessary for the requested procedure.

Assistant PA: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Suture anchors and screws: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Post-operative Physical Therapy 3 x 4: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Pre-operative Medical Clearance: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Labs: CBC, CMP, PT/PTT, UA & EKG: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Chest X-ray: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Shoulder ultrasling purchase: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Pain Pump (purchase): Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Cold Therapy Unit (purchase): Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

IF Unit 30 day rental: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.
