HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:

State(s) of Licensure: New York

Certification(s)/Specialty: Neurological Surgery

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 51-year-old female, who sustained an industrial injury on April 24, 2014. The injured worker was diagnosed as having cervical and lumbar spondylosis and lumbar stenosis and radiculopathy. Treatment to date has included epidural steroid injection, physical therapy, magnetic resonance imaging (MRI) and medication. A progress note dated May 13, 2015 provides the injured worker complains of neck and back pain radiating to right arm and both legs. Physical exam notes lumbar tenderness with decreased range of motion (ROM) and decreased sensation. The plan includes lumbar surgery with related services.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

L3-L4 decompression: Upheld

Claims Administrator guideline: Decision based on MTUS ACOEM Chapter 12 Low Back Complaints.

MAXIMUS guideline: Decision based on MTUS ACOEM Chapter 12 Low Back Complaints
Page(s): 305-307.

Decision rationale: The California MTUS guidelines recommend surgery when the patient has had severe persistent, debilitating lower extremity complaints referable to a specific nerve root or spinal cord level corroborated by clear imaging, clinical examination and electrophysiological studies. Documentation does not furnish such evidence. The guidelines note the patient would have failed a trial of conservative therapy. The guidelines note the surgical repair proposed for the lesion must have evidence of efficacy both in the short and long term. The requested treatment: L3-L4 decompression is not medically necessary and appropriate.

Associated surgical service: inpatient stay x 2 days: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Pre-operative medical clearance with internist: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Pre-operative chest x-ray: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Pre-operative labs: not specified: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Pre-operative EKG: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Post-operative lumbar brace: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.
