HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
 State(s) of Licensure: California, Indiana, Oregon
 Certification(s)/Specialty: Orthopedic Surgery

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 60 year old female, who sustained an industrial injury on 11/3/2014. The mechanism of injury is unknown. The injured worker was diagnosed as having right knee internal derangement. There is no record of a recent diagnostic study. Treatment to date has included injections, therapy and medication management. In a progress note dated 6/9/2015, the injured worker complains of right knee and left hip pain. Physical examination showed right knee lateral joint tenderness and an antalgic gait. The treating physician is requesting arthroscopic evaluation with possible treatment for meniscal injury or articular cartilage defect for right knee, associated surgical service: Anesthesia, preoperative laboratory studies-CMP with differential, urinalysis, chemistry panel and clotting studies, electrocardiogram, history and physical, 12 postoperative physical therapy visits for the right knee.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Arthroscopic evaluation with possible treatment for meniscal injury or articular cartilage defect for right knee: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) knee.

Decision rationale: CAMTUS/ACOEM Chapter 13 Knee Complaints, pages 344-345, states regarding meniscus tears, Arthroscopic partial meniscectomy usually has a high success rate for cases in which there is clear evidence of a meniscus tear symptoms other than simply pain (locking, popping, giving way, recurrent effusion). According to ODG Knee and Leg section, Meniscectomy section, states indications for arthroscopy and meniscectomy include attempt at physical therapy and subjective clinical findings, which correlate with objective examination and MRI. In this case, there is no imaging evidence of a meniscus tear or significant chondral lesion treatable with arthroscopy. Based on this the request is not medically necessary.

Associated surgical service: Anesthesia-Mark Hestin MD-Intrepid anesthesia: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) knee.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Pre-op Labs: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) knee.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated surgical service: EKG: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) knee.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated surgical service: History and Physical: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) knee.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Post-op Physical therapy 3x4 right knee: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) knee.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated surgical service: CBC with Diff, UA, Chem Panel (CMP, PT and PTT): Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) knee.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.
