HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:

State(s) of Licensure: California

Certification(s)/Specialty: Preventive Medicine, Occupational Medicine

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 50 year old male, who sustained an industrial injury on 1-10-14. The injured worker has complaints of right wrist and hand pain. The documentation noted that the injured workers 4th and 5th fingers are very stiff, hard to move and radiates to right arm. The diagnoses have included right hand crush injury with volar laceration and right small finger trigger finger. Treatment to date has included acupuncture; physical therapy and right hand surgery. The request was for functional capacity evaluation. Several documents within the submitted medical records are difficult to decipher.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Functional capacity evaluation: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) Fitness for Duty/ Functional Capacity Evaluations and Other Medical Treatment Guidelines ACOEM 2nd ed. Chapter 7, Independent Medical Evaluations pages(s) 137, 138.

Decision rationale: MTUS Guidelines do not specifically address the medical necessity of Functional Capacity Evaluations (FCEs). Other Guidelines do address this issue and are consistent with their recommendations. FCEs are only recommended if communications are established with an employer and there is a specific job task(s) offered and available. Under these circumstances, the purpose of the FCE is to evaluate the safety and suitability of predetermined job task(s). In this instance, there is no evidence of any employer communications and there is no evidence of predetermined job tasks that have been made available. There are no unusual circumstances that justify an exception to Guideline recommendations. The requested FCE is not medically necessary.
