HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
 State(s) of Licensure: California, Indiana, Oregon
 Certification(s)/Specialty: Orthopedic Surgery

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 54 year old female, who sustained an industrial injury on 6-3-2013. She reported left knee injury when she hit her leg into a metal desk with a subsequent right knee injury caused by a fall when the left leg gave way while ambulating. Diagnoses include left knee internal derangement, left knee degeneration and arthritis joint disease, and status post left knee arthroscopy 5-29-15. Treatments to date include activity modification, medication therapy, and physical therapy. Currently, she reported improvement from surgical repair and physiotherapy of the left knee. On 6-11-15, the physical examination documented physical findings in the left knee. The treating diagnoses included status post left knee arthroscopy and medial and lateral meniscal tears in the right knee. The plan of care included requests to authorize a right knee arthroscopy with meniscectomy and associated services including a pre-operative medical clearance evaluation, crutches, knee brace, cold therapy unit, and post-operative physical therapy treating the right knee.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Right knee arthroscopy with meniscectomy: Upheld

Claims Administrator guideline: Decision based on MTUS ACOEM.

MAXIMUS guideline: The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) knee.

Decision rationale: CAMTUS/ACOEM Chapter 13 Knee Complaints, pages 344-345, states regarding meniscus tears, “Arthroscopic partial meniscectomy usually has a high success rate for cases in which there is clear evidence of a meniscus tear” symptoms other than simply pain (locking, popping, giving way, recurrent effusion). According to ODG Knee and Leg section, Meniscectomy section, states indications for arthroscopy and meniscectomy include attempt at physical therapy and subjective clinical findings, which correlate with objective examination and MRI. In this case the MRI does not show clear evidence of meniscus tear. The request is not medically necessary.

Pre-op medical clearance: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated surgical service: Crutches: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated surgical service: Knee brace: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated surgical service: Cold therapy unit: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Post op Physical therapy 3x8 for right knee: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.
