HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
 State(s) of Licensure: Pennsylvania, Ohio, California
 Certification(s)/Specialty: Physical Medicine & Rehabilitation

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 45 year old female, who sustained an industrial injury on 10-1-2011. The mechanism of injury is unknown. The injured worker was diagnosed as having cervicalgia and left shoulder impingement. Left shoulder magnetic resonance imaging showed supraspinatus tendinopathy. Treatment to date has included injection, therapy and medication management. In a progress note dated 6-8-2015, the injured worker complains of left shoulder aching. Physical examination showed positive impingement sign in the left shoulder and gentle cervical compression caused pain. The treating physician is requesting Physical Therapy 12 visits for 30 days Left Upper Extremity.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Physical Therapy 12 visits for 30 days Left Upper Extremity: Upheld

Claims Administrator guideline: Decision based on MTUS Shoulder Complaints 2004. Decision based on Non-MTUS Citation Official Disability Guidelines, Treatment for Workers' Compensation, Online Edition, 2015, Shoulder: Neck and Upper Back, Physical Therapy.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Medical Treatment 2009, Section(s): Physical Medicine.

Decision rationale: MTUS encourages physical therapy with an emphasis on active forms of treatment and patient education. This guideline recommends transition from supervised therapy to active independent home rehabilitation. Given the timeline of this injury and past treatment, the patient would be anticipated to have previously transitioned to such an independent home rehabilitation program. The records do not provide a rationale at this time for additional supervised rather than independent rehabilitation. This request is not medically necessary.
