HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
State(s) of Licensure: North Carolina
Certification(s)/Specialty: Family Practice

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 62 year old female who sustained an industrial injury on 6-19-08. She had complaints of shoulder and neck pain. Treatments include: medication, physical therapy, exercise program and injections. Progress report dated 6-3-15 reports continued complaints of left shoulder pain. Diagnoses include: impingement syndrome and high grade partial thickness rotator cuff tear. Plan of care includes: injection performed and tolerated well, recommend surgery sub acromial decompression with rotator cuff repair biceps tenotomy. Work status: continue regular work.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Vascutherm Compression Device (Days) Qty 14: Upheld

Claims Administrator guideline: The Claims Administrator did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG).

MAXIMUS guideline: The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) cryotherapy.

Decision rationale: The California MTUS and the ACOEM do not specifically address the requested service. The ACOEM does recommend the at home local application of cold packs the first few days after injury and thereafter the application of heat packs. The Official Disability Guidelines section on cryotherapy states: Recommended as an option after surgery but not for nonsurgical treatment. The request is not for post-surgical use however the time limit for request is in excess of recommendations. Per the ODG, cold therapy is only recommended for 7 days post operatively. The request is in excess of this amount and therefore is not medically necessary.
