### HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:

State(s) of Licensure: California, Montana

Certification(s)/Specialty: Chiropractor, Oriental Medicine

### CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 51-year-old female who sustained an industrial injury on 10-11-13. The injured worker reported leg swelling and left hip burning. A review of the medical records indicates that the injured worker is undergoing treatments for left hip greater trochanteric bursitis and history of deep vein thrombosis left lower extremity. Medical records dated 8-24-15 indicate moderate and constant pain rated at 6 to 7 out of 10. Provider documentation dated 8-24-15 noted the work status as return to usual and customary duties on 8-24-15. Treatment has included Coumadin and ultrasound lower extremity venous duplex (5-11-15). Objective findings dated 8-24-15 were not recorded on the provided PR2. The original utilization review (9-1-15) denied a request for Acupuncture (times 12) left hip and Acupuncture (times 12) left ankle.

### IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

**Acupuncture (x12) (L) Hip:** Upheld

**Claims Administrator guideline:** Decision based on MTUS Acupuncture Treatment 2007.

**MAXIMUS guideline:** Decision based on MTUS Acupuncture Treatment 2007.

**Decision rationale:** Provider requested initial trial of 12 acupuncture sessions for the left hip which were non-certified by the utilization review. Per guidelines, 3-6 treatments are supported for initial course of Acupuncture with evidence of functional improvement prior to consideration of additional care. Requested visits exceed the quantity of initial acupuncture visits supported by the cited guidelines. Additional visits may be rendered if the patient has documented objective functional improvement. MTUS- Definition 9792.20 (f) Functional improvement means either a clinically significant improvement in activities of daily living or a reduction in work restrictions as measured during the history and physical exam. Per guidelines and review of evidence, 12 Acupuncture visits are not medically necessary.

**Acupuncture (x12) (L) Ankle:** Upheld

**Claims Administrator guideline:** Decision based on MTUS Acupuncture Treatment 2007.

**MAXIMUS guideline:** Decision based on MTUS Acupuncture Treatment 2007.

**Decision rationale:** Provider requested initial trial of 12 acupuncture sessions for the left ankle which were non-certified by the utilization review. Per guidelines, 3-6 treatments are supported for initial course of Acupuncture with evidence of functional improvement prior to consideration of additional care.
