HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:

State(s) of Licensure: Massachusetts

Certification(s)/Specialty: Anesthesiology, Pain Management

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 61 year old male, who sustained a work related injury on 7/6/11. He was in a motor vehicle accident. The diagnoses have included neck sprain, cervical spondylosis with bilateral upper extremity radiculopathy, herniated nucleus pulposus at C5-6 and C6-7 and cervical spine stenosis. Treatments to date have included cervical epidural steroid injection on 8/8/14 with 50-60% improvement, medications, aquatic therapy, home exercise program, MRI cervical spine 6/26/14 and cervical spine surgery on 1/21/15. In the PR-2 dated 2/3/15, the injured worker complains of intermittent postoperative neck pain with associated itching. He is wearing neck brace and is compliant. He states he is feeling much better and his pain is reduced. Treatment plan is to have the injured worker to continue wearing neck brace for two months.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Olympia rigid hard cervical collar purchase: Upheld

Claims Administrator guideline: Decision based on MTUS ACOEM Chapter 8 Neck and Upper Back Complaints Page(s): 173. Decision based on Non-MTUS Citation Official Disability Guidelines, Neck and Upper Back, Collars (cervical).

MAXIMUS guideline: Decision based on MTUS ACOEM Chapter 2 General Approach to Initial Assessment and Documentation Page(s): 45.

Decision rationale: According to ACOEM Chapter 2, Initial Approaches to treatment, inactivity and/or immobilization should be limited because they result in deconditioning and bone loss after relatively short periods of time. The request for the current treatment would result in immobilization in contrast to the recommendation above. Therefore, at this time, the requirements for treatment have not been met and medical necessity has not been established.
