HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:

State(s) of Licensure: California

Certification(s)/Specialty: Chiropractor, Oriental Medicine

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 55 year old female, who sustained an industrial injury on 06/26/2003. The injured worker is currently diagnosed as having lumbar herniated nucleus pulposus. Treatment to date has included lumbar surgery, postoperative MRI of the lumbar spine, physical therapy, and medications. In a progress note dated 01/05/2015, the injured worker presented with complaints of no change in symptoms with previous complaints of low back pain. The treating physician reported tenderness to palpation to lumbar area with spasms and requested physical therapy to the lumbar spine and to follow up in one month.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

11 Acupuncture sessions for the lumbar spine: Upheld

Claims Administrator guideline: Decision based on MTUS Acupuncture Treatment Guidelines.

MAXIMUS guideline: Decision based on MTUS Acupuncture Treatment Guidelines.

Decision rationale: Per medical records provided, patient has not had prior Acupuncture treatment. Provider requested initial trial of 12 acupuncture sessions which were non-certified by

the utilization review. Per guidelines 3-6 treatments are supported for initial course of Acupuncture with evidence of functional improvement prior to consideration of additional care. Requested visits exceed the quantity of initial acupuncture visits supported by the cited guidelines. Additional visits may be rendered if the patient has documented objective functional improvement. MTUS- Definition 9792.20 (f) Functional improvement means either a clinically significant improvement in activities of daily living or a reduction in work restrictions as measured during the history and physical exam. Per guidelines and review of evidence, 12 Acupuncture visits are not medically necessary.
