### HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:  
 State(s) of Licensure: Pennsylvania, Ohio, California  
 Certification(s)/Specialty: Physical Medicine & Rehabilitation

### CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 70-year-old female with an industrial injury dated February 1, 2003. The injured worker diagnoses include complex regional pain syndrome of right shoulder and status post right rotator cuff repair, decompression, distal clavicle resection on 12/3/2014. Treatment consisted of diagnostic studies, home exercise therapy and periodic follow up visits. In a progress note dated 1/30/2015, the treating physician noted excellent wound healing with no signs of infection and hypersensitivity with allodynia about the anterolateral arthroscopic portal. The treating physician prescribed services for water aerobics therapy; eighteen (18) sessions (2x6, then 1x6) now under review.

### IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

**18 Water Aerobics Therapy Sessions 2 Times A Week for 6 Weeks then 1 Time A Week for 6 Weeks:** Upheld

**Claims Administrator guideline:** Decision based on MTUS Chronic Pain Treatment Guidelines.

**MAXIMUS guideline:** Decision based on MTUS Chronic Pain Treatment Guidelines Physical Medicine and Aquatic Therapy Page(s): 98-99, 22.

**Decision rationale:** MTUS encourages physical therapy with an emphasis on active forms of treatment and patient education. This guideline recommends transition from supervised therapy to active independent home rehabilitation. Given the timeline of this injury and past treatment, the patient would be anticipated to have previously transitioned to such an independent home rehabilitation program. The records do not provide a rationale at this time for additional supervised rather than independent rehabilitation. This request is not medically necessary.
