Date Assigned:	03/19/2015	Date of Injury:	06/30/2008
Decision Date:	04/24/2015	UR Denial Date:	02/18/2015
Priority:	Standard	Application Received:	03/12/2015

HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
State(s) of Licensure: North Carolina, Georgia
Certification(s)/Specialty: Family Practice

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 32-year-old male, who sustained an industrial injury on 06/30/2008 after complaining of lower back pain. He was diagnosed with paracentral disc protrusion at L5-S1. On provider visit dated 02/12/2015 the injured worker has reported lumbar spine pain. On examination, he was noted to have increased pain with range of motion, paraspinal spasms, tenderness to palpation L4-L5 and positive straight leg raise. The diagnoses have included lumbar spine HNP. Treatment to date has included MRI's, neurosurgeon, lumbar injections, pain management, electromyogram/nerve conduction velocity of the lower extremities, laminotomy and medication including Norco and Soma. The provider prescribed Norco and Soma.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Norco 10/325mg, #40: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Section 2 Page(s): 74-89.

Decision rationale: CA MTUS allows for the use of opioid medication, such as Norco, for the management of chronic pain and outlines clearly the documentation that would support the need for ongoing use of an opioid. These steps include documenting pain and functional improvement using validated measures at 6 months intervals, documenting the presence or absence of any adverse effects, documenting the efficacy of any other treatments and of any other medications used in pain treatment. The medical record in this case does not use any validated method of recording the response of pain to the opioid medication or of documenting any functional improvement. It does not address the efficacy of concomitant medication therapy. Therefore, the record does not support medical necessity of ongoing opioid therapy with Norco.

Soma 350mg, #30: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Section 2 Page(s): 63-66.

Decision rationale: The CA MTUS allows for the use, with caution, of non-sedating muscle relaxers as second line treatment for acute exacerbations of chronic low back pain. While they may be effective in reducing pain and muscle tension, most studies show no benefits beyond NSAIDs in pain relief. Efficacy diminishes over time and prolonged use may lead to dependency. There is no recommendation for ongoing use in chronic pain. The medical record in this case does not document an acute exacerbation and the request is for ongoing regular daily use of Soma. This is not medically necessary and the original UR decision is upheld.
