### HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:  
State(s) of Licensure: California, Arizona, Maryland  
Certification(s)/Specialty: Psychiatry

### CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 68 year old female who sustained an industrial injury on 09/27/99. Initial complaints and diagnoses are not available. Treatments to date include psychiatric treatments and medications. Diagnostic studies are not addressed. Current complaints include a flare-up of back pain and frustration. She was described as upset. In a progress note dated 10/31/14 the treating provider state that she has completed 41 out of 45 certified treatments. The requested treatment is one individual psychiatric session.

### IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

**Individual psychology treatment; one (1) session per week for twenty (20) weeks:** Upheld

**Claims Administrator guideline:** Decision based on MTUS Chronic Pain Treatment Guidelines Psychological Treatment. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG), Mental Illness and Stress Chapter, Cognitive Behavioral Therapy.

**MAXIMUS guideline:** Decision based on MTUS Chronic Pain Treatment Guidelines Psychological treatment Page(s): 23, 100-102.

**Decision rationale:** California MTUS states that behavioral interventions are recommended. The identification and reinforcement of coping skills is often more useful in the treatment of pain than ongoing medication or therapy, which could lead to psychological or physical dependence. ODG Cognitive Behavioral Therapy (CBT) guidelines for chronic pain recommends screening for patients with risk factors for delayed recovery, including fear avoidance beliefs. Initial therapy for these "at risk" patients should be physical medicine for exercise instruction, using cognitive motivational approach to physical medicine. Consider separate psychotherapy CBT referral after 4 weeks if lack of progress from physical medicine alone: Initial trial of 3-4 psychotherapy visits over 2 weeks; With evidence of objective functional improvement, total of up to 6-10 visits over 5-6 weeks (individual sessions). Upon review of the submitted documentation, it is gathered that the injured worker has undergone treatment with psychotherapy sessions. The request for Individual psychology treatment; one (1) session per week for twenty (20) weeks exceeds the guideline recommendations for the maximum number of sessions recommended for chronic pain. Thus, the request is excessive and not medically necessary.
