HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
 State(s) of Licensure: Arizona, California
 Certification(s)/Specialty: Family Practice

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 45 year old female, who sustained an industrial injury on July 23, 2001. Notes stated she has been diagnosed with post traumatic stress disorder, depression, fibromyalgia and migraine headaches as a result of abuse by her employer. Treatment to date has included medications, physical therapy and psychotherapy. On February 23, 2015, the injured worker complained of pain, headache, anxiety and depression. The treatment plan included physical therapy, psychotherapy, home care assistance and medications.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Norco 10/325 mg, 120 count: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines opioids Page(s): 82-92.

Decision rationale: Norco is a short acting opioid used for breakthrough pain. According to the MTUS guidelines, it is not indicated as 1st line therapy for neuropathic pain, and chronic back

pain. It is not indicated for mechanical or compressive etiologies. It is recommended for a trial basis for short-term use. Long Term-use has not been supported by any trials. In this case, the claimant had been on Norco for several months without documentation of pain scores or opioid agreement. There was no indication of Tylenol failure. Continued use of Norco is not medically necessary.
