HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
 State(s) of Licensure: New Jersey, Michigan, California
 Certification(s)/Specialty: Neurology, Neuromuscular Medicine

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 36 year old male who sustained an industrial injury on 6/10/09. The injured worker reported symptoms in the multiple body parts. The injured worker was diagnosed as having cervical disc displacement without myelopathy and lumbar disc displacement without myelopathy. Treatments to date have included functional restoration program, oral pain medication, home exercise program, injection, cane, and physical therapy. Currently, the injured worker complains of chronic pain in multiple body parts. The plan of care was for medication prescriptions and a follow up appointment at a later date.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Tramadol Acetaminophen 37.5/325mg quantity 90: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Opioids for Chronic Pain Page(s): 80.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Tramadol Page(s): 113.

Decision rationale: According to MTUS guidelines, Ultracet (Tramadol) is a central acting analgesic that may be used in chronic pain. Ultracet is a synthetic opioid affecting the central nervous system. It is not classified as a controlled substance by the DEA. It is not recommended as a first-line oral analgesic. There is no documentation about the efficacy and adverse reaction profile of previous use of Tramadol. There is no documentation for recent urine drug screen to assess compliance. Therefore, the prescription of Tramadol Acetaminophen 37.5/325mg #90 is not medically necessary.
