HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:

State(s) of Licensure: California

Certification(s)/Specialty: Orthopedic Surgery

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 30 year old female who sustained an industrial injury on September 22, 2014. She has reported left upper extremity pain and has been diagnosed with left wrist positive for carpal tunnel syndrome, sprains and strains of other specified sites of the elbow and forearm, and lesion of the ulnar nerve. Treatment has included medical imaging, injections, physical therapy, sling, and a TENS unit. Currently, 2/25/15, the injured workers left wrist showed a positive Durkan's test and Phalen's test. Range of motion was well preserved. The treatment request included surgery.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Left Carpal Tunnel Surgery for Tenosynovectomy, Release of the Longitudinal Ligament, Neurolysis of the Median Nerve and Possible Palmar Fascial Release: Upheld

Claims Administrator guideline: Decision based on MTUS ACOEM Chapter 11 Forearm, Wrist, and Hand Complaints.

MAXIMUS guideline: Decision based on MTUS ACOEM Chapter 11 Forearm, Wrist, and Hand Complaints Page(s): 270.

Decision rationale: Per the CA MTUS/ACOEM guidelines, Chapter 11 Forearm, Wrist and Hand Complaints page 270, Electrodiagnostic testing is required to evaluate for carpal tunnel and stratify success in carpal tunnel release. In addition, the guidelines recommend splinting and medications as well as a cortisone injection to help facilitate diagnosis. In this case there is lack of evidence in the records from 2/25/15 of clear electrodiagnostic evidence of carpal tunnel syndrome or definitive evidence of failed bracing or injections in the records. Therefore the determination is for not medically necessary.

12 Initial Post-Operative Physical Therapy for the Left Wrist, 3 times per week for 4 weeks, status post left wrist surgery: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated surgical service: Smart Glove: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated surgical service: Home Exercise Kit: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated surgical service: Compression Pump with Calf Cuffs: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated surgical service: Complete Blood Count (CBC): Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated surgical service: Urinalysis: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated surgical service: Prothrombin Time, Partial Thromboplastin Time: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated surgical service: Chem 12: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.
