HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
State(s) of Licensure: New Jersey, New York
Certification(s)/Specialty: Family Practice

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 48 year old male, who sustained an industrial injury on 01/22/2015. On provider visit dated 01/22/2015 the injured worker has reported left knee pain after a left knee total knee arthroplasty on 07/16/2014. On examination he was noted to be in no acute distress. The diagnoses have included insomnia. Treatment to date has included medication, home exercise, bracing and physical therapy. The provider requested Ambien 10mg #30 with 3 refills.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Ambien 10mg #30 with 3 refills: Upheld

Claims Administrator guideline: The Claims Administrator did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines, Pain Chapter, Ambien; FDA (Ambien).

MAXIMUS guideline: The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) Pain Chapter, Ambien.

Decision rationale: The request for Ambien is not medically necessary. MTUS guidelines do not address the use of Ambien. As per ODG, Ambien is a hypnotic that is approved for short-term treatment of insomnia, from 2-6 weeks. It can be habit-forming and may impair function and memory. It may also increase pain and depression over the long-term. There is no documentation that patient has failed a trial of proper sleep hygiene. The risk of long-term use of Ambien currently outweighs benefit and is considered medically unnecessary.
