HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
 State(s) of Licensure: Arizona, California
 Certification(s)/Specialty: Family Practice

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The 41-year-old male injured worker suffered an industrial injury on 04/07/2005. The diagnoses included low back pain post- surgery. The injured worker had been treated with functional restoration program, aqua therapy, spinal surgery and medications. On 4/10/2015, the treating provider reported low back pain. On exam there was a flat affect, lumbar spine reduced range of motion along with decreased sensation to the left leg. The treatment plan included Norco and Flexeril.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Norco 10/325 mg #150: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Opioids. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG), Pain Chapter, Opioids.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines opioids
 Page(s): 82-92.

Decision rationale: Norco is a short acting opioid used for breakthrough pain. According to the MTUS guidelines, it is not indicated as 1st line therapy for neuropathic pain, and chronic back pain. It is not indicated for mechanical or compressive etiologies. It is recommended for a trial basis for short-term use. Long Term-use has not been supported by any trials. In this case, the claimant had been on Norco for several months without routine documentation of pain levels. There was no mention of Tylenol, lower dose Norco or Tricyclic failure. Continued Norco is not medically necessary.

Flexeril 10 mg #90: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Muscle Relaxants.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines muscle relaxants Page(s): 63.

Decision rationale: According to the MTUS guidelines, Cyclobenzaprine (Flexeril) is more effective than placebo for back pain. It is recommended for short course therapy and has the greatest benefit in the first 4 days suggesting that shorter courses may be better. Those with fibromyalgia were 3 times more likely to report overall improvement, particularly sleep. Treatment should be brief. There is also a post-op use. The addition of Cyclobenzaprine to other agents is not recommended. The claimant had been on Flexeril for several months in combination with Norco, Continued and chronic use of Flexeril is not medically necessary.
