

SURVEYORS WORKING ALONE
(Operating Engineers, Local 3 Draft proposal)

Field Survey Work

All field surveyors shall work within the vocal range of other employees when working on rural or at remote locations, areas of travel, during pre and post construction activities or projects with a high volume of construction equipment and traffic. Procedures shall also be established for periodically checking on employees' welfare and all employees shall be accounted for at the end of each workday.

A minimum of two people working together as prescribed above shall both obtain and maintain a current CPR and first aid certification from an accredited training course.
