Cal/OSHA Urges Employers to Protect Outdoor Workers as Temperatures Rise across the State

Oakland—Cal/OSHA urges all employers with outdoor workers to protect their employees by ensuring they are properly trained on how to prevent heat illness. The <u>National Weather Service</u> has issued excessive heat warnings for Southern California today through Thursday, and excessive heat watches for Central and Northern California from Tuesday through Thursday.

"Supervisors and outdoor workers must be trained on how to recognize and respond to the signs and symptoms of heat illness," said Cal/OSHA Chief Juliann Sum. "Cal/OSHA continues our outreach, consultation and training for workers and employers to ensure that workers are protected from the heat."

California's <u>heat illness prevention regulation</u> requires employers with outdoor workers to take the following four steps to prevent heat illness:

- Plan Develop and implement an effective written heat illness prevention plan that includes emergency response procedures.
- Training Train all employees and supervisors on heat illness prevention.
- Water Provide drinking water that is fresh, pure, suitably cool and free of charge so that each worker can drink at least 1 quart per hour, and *encourage workers to do so.*
- Shade Provide shade when workers request it or when temperatures exceed 80 degrees. Encourage workers to take a cool-down rest in the shade for at least five minutes. *They should not wait until they feel sick to cool down.*

Cal/OSHA urges workers experiencing possible overheating to take a preventative cooldown rest in the shade until symptoms are gone. Workers who have existing health problems or medical conditions that reduce tolerance to heat, such as diabetes, need to be extra vigilant. Some high blood pressure and anti-inflammatory medications can also increase a worker's risk for heat illness. In addition to the other requirements outlined by <u>California's heat illness prevention</u> <u>regulation</u>, it is crucial that supervisors are effectively trained on emergency procedures in case a worker does get sick. This helps ensure sick employees receive treatment immediately and that the symptoms do not develop into a serious illness or death.

Cal/OSHA's Heat Illness Prevention special emphasis program, the first of its kind in the nation, includes enforcement of heat regulations as well as multilingual outreach and training programs for California's employers and workers. Online information on heat illness prevention requirements and training materials are available on Cal/OSHA's <u>Heat Illness Prevention web page</u> and the <u>Water. Rest. Shade. campaign site</u>. A <u>Heat Illness Prevention e-tool</u> is also available on Cal/OSHA's website.

Cal/OSHA helps protect workers from health and safety hazards on the job in almost every workplace in California. Employers and workers who have questions or need assistance with workplace health and safety programs can call <u>Cal/OSHA's</u> <u>Consultation Services Branch</u> at 800-963-9424.

Complaints about workplace safety and health hazards can be filed confidentially with <u>Cal/OSHA district offices</u>. Employees with work-related questions or complaints may contact DIR's Call Center in English or Spanish at 844-LABOR-DIR (844-522-6734).

Members of the press may contact Erika Monterroza or Lucas Brown at (510) 286-1161, and are encouraged to <u>subscribe to get email alerts</u> on DIR's press releases or other departmental updates.
