FIRST CAUSE FOR DISCIPLINE

(Gross negligence)

6. Respondent Renato Francisco Guzman, M.D. is subject to disciplinary action under section 2234, subdivision (b), of the Code in that Respondent negligently performed a surgery that resulted in the perforation of patient P.E.’s bowels. Respondent then failed to timely recognize the negative post-surgery symptoms that resulted in the patient’s death. The circumstances are as follows:

7. On or about August 15, 2011, Respondent performed a laparoscopic cholecystectomy on P.E. Prior to the date of surgery, P.E. completed a battery of tests that indicated she was healthy to proceed with surgery.

8. During the surgery, Respondent removed P.E.’s gallbladder and attempted to “divide” adhesions “in the lower right quadrant.” However, Respondent elected to not remove the adhesions due to the close proximity to the bowels. The surgery lasted approximately one hour and concluded at 10:36 AM.

9. After the surgery, P.E. was taken to the recovery room and was admitted for observation at 12:30 PM because of her high blood pressure and complaints of pain. P.E. was given morphine via intravenous drip at 1:15 PM, an oral dose of hydrocodone at 5:15 PM, a Demerol drip at 7:55 PM, and a second oral dose of hydrocodone at 10:10 PM.

//

1 In this Accusation, the patient is referred to by initial to protect her right to privacy.
10. Respondent did not visit or conduct a post-operative exam on P.E. on August 15, 2011.

11. On August 16, 2011, P.E. continued to complain of pain and received Dilaudid at 3:05 AM and 10:20 AM, Vicodin at 5:55 AM, and Zofran for nausea at 5:55 AM and 3:30 PM.

12. Respondent's first, and only, visit with P.E. occurred on August 16, 2011, at 4:45 PM. Respondent noted that P.E. reported incisional pain of 6/10, that her incision sites were dry, that she was seated upright and her blood pressure was 97/66. Respondent ordered various lab tests, and requested that P.E.'s blood pressure be taken while seated upright. Respondent noticed that P.E.'s blood pressure dropped to 64/50 with a heart rate of 118. Respondent ordered additional tests and a 500 ml saline drip. Respondent then left P.E.

13. At 8:00 PM, Respondent was informed that P.E.'s blood pressure had dropped to 82/64 with a heart rate of 123. Respondent ordered a second saline drip, a cardiac enzyme test, and an EKG. The results of testing suggested that P.E. either was experiencing a severe stress response or was developing an infection. Respondent ordered a catheter and additional testing because he was concerned with possible internal bleeding.

14. At 8:15 PM, the on duty nurse placed the catheter and administered additional Vicodin because of continued complaints of pain. Further, the nurse documented that P.E. was "clammy" and had vomited.

15. At 8:45 PM, P.E.'s nurse contacted Respondent to report that the cardiac enzyme level was normal. Additionally, Respondent ordered an EKG test and asked P.E.'s nurse to contact the cardiology department if the results were abnormal. The EKG test was reported as normal.

16. At 9:50 PM, P.E. still complained of pain and felt dizzy when standing. P.E. attempted to walk, but was too weak and dizzy.

17. At 12:45 AM on August 17, 2011, P.E. reported more abdominal pain and received additional Vicodin.

18. At 1:25 AM, P.E. had trouble breathing and had a blood pressure of 70/40.

19. Respondent was again contacted regarding P.E.'s condition at 1:40 AM. Respondent
ordered P.E. to be transferred to the intensive care unit (ICU).

20. En route to the ICU, P.E. vomited again and had cardiopulmonary arrest. Hospital staff intubated and attempted to resuscitate P.E. However, P.E. died at 2:10 AM.

21. Hospital staff informed Respondent about P.E.'s death. Respondent then called P.E.'s spouse and reported the death.

22. The pathologist who conducted the post-mortem examination determined that the cause of death was peritonitis due to a small bowel perforation. The pathologist also concluded that P.E.'s subsequent clinical course resulted in sepsis and vomiting with aspiration, cardiopulmonary arrest, and ultimately death.

SECOND CAUSE FOR DISCIPLINE
(Unprofessional Conduct)

23. Respondent Renato Francisco Guzman, M.D. is subject to disciplinary action under section 2234, of the Code in that Respondent improperly performed a surgery which resulted in the perforation of patient P.E.'s bowel during surgery and Respondent failed to timely recognize the negative post-surgery symptoms, which resulted in the patient's death, as more particularly alleged in paragraphs 6 through 22 above, which are incorporated by reference and realleged as if fully set forth herein.

DISCIPLINARY CONSIDERATIONS

24. On or about March 25, 2011 and In the matter of the Public Letter of Reprimand Issued to: Renato Guzman, M.D., Case No. 09-2009-198148, a public letter of reprimand was issued to Respondent by the Board. Specifically, Respondent was reprimanded after the Board determined that in August 2005, Respondent failed to adequately discuss the range of potential post-surgical complications with his patient. Additionally, Respondent failed to admit the same patient to the hospital after the first or second postoperative emergency room presentations. Respondent's failure to discuss potential complications relating to surgery and inadequate postsurgical care for his patient was deemed to be grossly negligent and incompetent as defined in Business and Professions Code sections 2234, subdivisions (b) and (d) respectively. According to the letter of reprimand, the Board issued Respondent a letter of reprimand in lieu of prosecuting a
formal Accusation against his license.

PRAYER

WHEREFORE, Complainant requests that a hearing be held on the matters herein alleged, and that following the hearing, the Medical Board of California issue a decision:
