### SCOPE OF WORK

Employees employed under the terms of this Agreement shall do all electrical construction, fabrication, installation, or erection work, and all electrical maintenance thereof; including the moving, lifting, and placing electric motors, generators, materials and equipment on the jobsite, and the final running tests thereof. This shall include all permanent and temporary electric lighting, heating, and power, and all photovoltaic systems including battery storage, [REDACTED] electronic communications systems, electric and electronic controls, and control circuits, and necessary conduits and raceways. This shall include operation of all power driven tools and equipment used for these installations.

All work of joining, splicing, and insulating, and the placing of all flameproof covering, where wiped lead joints are necessary, shall be performed by a cable splicer. Journeymen only shall be used in assisting cable splicers. Cable splicers shall not be required to work on wires or cables when difference in potential is over three hundred (300) volts between any two (2) conductors, or between any conductor and ground, unless assisted by another Journeyman. In no case shall cable splicers be required to work on energized cables carrying in excess of four hundred and forty (440) volts.

**SECTION 3.14: Handling of Material and Equipment.** Employees employed under the terms of this Agreement shall do all work of handling and moving any electrical material, equipment, and apparatus on the job to be installed by employees covered hereunder.
