LOCALITY

Fresno, Kern, Kings, Madera, and Tulare Counties

METAL ROOFING SYSTEMS WORK

This advisory scope of work does not apply to metal roofing systems work in the counties where the Department has issued prevailing wage rates for the Metal Roofing Systems Installer. Please refer to the statewide general prevailing wage determinations for the Metal Roofing Systems Installer.

SCOPE OF WORK

ARTICLE II

Covered Work Jurisdiction

Section 1. The Local Union shall be composed of and have jurisdiction over all their membership composed of skilled roofers and damp and waterproof workers, including apprentices, allied workers, other classifications of workers and any person performing the duties of all safety monitoring of work performed within the jurisdiction of this Article. The work jurisdiction of this International Union shall be all roofing, dampproofing, waterproofing [REDACTED] systems, [REDACTED], whenever the primary function of such systems or products is to prevent the intrusion or migration of moisture, vapor [REDACTED], as well as all applications and materials [REDACTED] related to the prevention of intrusion or migration of water and/or moisture. These systems or products shall include, but are not be limited to all those outlined in this article.

Section 2. Steep roofers shall include in their work jurisdiction the following work processes and types of materials including, but not limited to:

All Slate where used for roofing of any size, shape or color, including flat or promenade slate, with necessary metal flashing on any kind of liquid applied membranes to extend the roof life or to make water-tight.

All Tile where used for roofing of any [REDACTED] shape or color, and in any manner laid including flat or promenade tile, with necessary metal flashing on any kind of liquid applied membranes to extend the roof life or to make water-tight.

All Shingles where used for roofing of any type, size, shape or color, and in any manner, laid with necessary metal flashing on any kind of liquid applied membranes to extend the roof life or to make water-tight.

All cementing in, on or around the said slate or tile roof.

All laying of felt, paper, membranes, ice shields, [REDACTED] vapor intrusion mitigation and moisture intrusion barriers or similar underlayments on sloped roof structures.

All dressing, punching and cutting of all roof slate or tile.

All operation of slate cutting or punching machinery.

All substitute material taking the place of slate or tile, as asbestos slate or tile, cement or composition or Spanish tile, composition, [REDACTED] wood shingles, or shakes, metal shingles and tile, or other substitute materials used on steep roofs. All removal of slate or tile roofing as defined above where the same is to be reapplied in their place.

[REDACTED]

All removal of roofing including, but not limited to the materials defined above when a roof is to be replaced.

Section 3. Composition roofers shall include in their work jurisdiction the following work processes and types of materials including, but not limited to:

All organic or inorganic felts and fabrics that comprise the reinforcing membrane of built-up roofing and waterproofing systems.

All waterproofing using bituminous products whether structures are above or below grade [REDACTED].

All forms of plastic, slate, slag, gravel or rock roofing, including all types of aggregates, blocks, bricks, stones or pavers, [REDACTED] used to ballast or protect built-up roofing systems or protect Inverted Roof Membrane Assembly (IRMA) roofs, or roofs of similar construction where the insulation is laid over the roof membrane.

All kinds of asphalt, asphaltic, rubberized and composition roofing and waterproofing.

All base flashings, curb flashings, and counter-flashings of bituminous composition used to roof or waterproof intersections of horizontal surfaces.

All components of composition roofing systems used to seal the roof including, but not limited to compression seal, termination bars, [REDACTED], ballast [REDACTED], reinforcement, preformed panels, protection boards, [REDACTED] pavers, [REDACTED] drain flashings, scupper flashings, flashing, roof to wall flashing, [REDACTED], lath, roof cement and reinforcements, caulking and sealants.

All kinds of coal tar pitch and coal tar bitumen roofing and waterproofing.

All cleaning, preparing, priming and sealing of roof decks and surfaces that receive roofing, dampproofing, [REDACTED] and/or waterproofing.

All rock asphalt and composition roofing.

[REDACTED]

All epoxy materials used for roofing and waterproofing.

All rock asphalt mastic when used for damp and waterproofing.

All prepared paper roofing.

All laying of felt, paper, membrane, ice and water shields, [REDACTED], vapor, intrusion mitigation and moisture barriers of similar underlayments.

All mineral surfaced roofing, including ninety (90) lb., and SIS [REDACTED] whether nailed, mopped with bitumen, or applied with mastic or adhesive [REDACTED].

All compressed paper, chemically prepared paper and burlap when used for roofing or damp and waterproofing purposes, with or with coating.

All substrates used on the roof deck for fireproofing or any materials used as a support or nailing surface for the roofing system over the deck.

All materials and substrates used on the roof deck for fireproofing or any materials used as a support, nailing surface or any means of attachment for the roofing system over the deck.

All damp resisting preparations when applied with a mop, brush, roller, swab, trowel, or spray system inside or outside of any structure.

All damp course, sheeting or coating on all foundation work.

All tarred floors.

[REDACTED]

[REDACTED]

All laying of tile, woodblock or brick, when laid in pitch, tar, asphalt mastic, marmolite, or any forms of bituminous products.

All lining and/or waterproofing of [REDACTED] reservoirs, holding ponds, [REDACTED] waste treatment structures, landfills, fountains, planter boxes [REDACTED] and similar structures regardless of the material being used.

All forms of insulation used as a part of or in connection with, roofing, waterproofing or dampproofing including, but not limited to thermal and/or acoustical purposes.

All forms of composite insulations having nailable surfaces or other means of attachments (e.g. plywood, pressboard, chipboard, drywall, or other laminates) bonded

to the insulation wherever such composite insulations are used as an integral thermal insulating component of the roofing system.

All forms of protection boards, walkway pads and roof treads, fleece [REDACTED] used in composition roofing or waterproofing to protect the membranes from damage.

All types of coatings, toppings and finishes used on the roofing, dampproofing, waterproofing, [REDACTED], vapor intrusion mitigation and moisture intrusion barrier systems.

All components of [REDACTED] systems, including but not limited to membranes, insulations, [REDACTED], filters, fleece, vegetation blankets, plantings and soils, [REDACTED].

[REDACTED]

[REDACTED]

[REDACTED]

All types of material used for roofing, waterproofing, [REDACTED].

Section 4. Composition roofers and waterproofers shall also include in their work jurisdiction the following work processes and types of material including, but not limited to:

- 1) All form of [REDACTED], elasto-plastic, urethane and thermos-plastic roofing systems, [REDACTED], both sheet and liquid applied whether single-ply or multi-ply or seamless. These shall include, but not be limited to:
 - a) PVC (Polyvinyl chloride systems)
 - b) Butyl Rubber
 - c) EPDM (ethylene propylene diene monomer)
 - d) PIB (polyisobutylene)
 - e) CPE (chlorinated polyethylene)
 - f) CSPE (chlorosulfonated polyethylene)
 - g) Modified Bitumens (rubberized asphalt or non-asphalt membranes)
 - h) Neoprene
 - i) NBP (nitrile alloy)
 - j) EIP (ethylene interpolymers)
 - k) TPO (thermoplastic polyolefins)
 - [REDACTED]
 - t) epoxy
- (2) All base flashings, curb flashings and counter flashings of [REDACTED], elasto-plastic composition as outlined in Section 5(1) used to roof or waterproof intersections of horizontal surfaces.

All components of [REDACTED], elasto-plastic and thermos-plastic roofing systems used to seal the roof, including but not limited to, [REDACTED], ballast [REDACTED], reinforcements, preformed panels, protection boards, [REDACTED] pavers, [REDACTED], scupper flashings, drain flashings, flashing, roof to wall flashings, [REDACTED], compression seals, termination bars, caulking and sealants.

- (3) All insulation applied with the above systems, whether laid dry, mechanically fastened, or attached with adhesives.
- (4) All forms of composite insulations having nailable surfaces or any other means of attachment (e.g. plywood, pressboard, chipboard, drywall, or other laminates) bonded to the insulation wherever such composite insulation are used as an integral thermal insulating component of the roofing system.
- (5) [REDACTED]
- (6) [REDACTED]
- (7) [REDACTED]
- (8) All sealing and caulking of seams and joints on these [REDACTED], elastoplastic and thermos-plastic systems to ensure that these systems are watertight.
- (9) All liquid-type elastoplastic [REDACTED] preparation for roofing, damp or waterproofing when applies with a squeegee, trowel, roller or spray equipment, whether applied inside or outside of a building.
- (10) All sheet-type elasto-plastic, [REDACTED] and thermos-plastic systems, whether single or multi-ply for waterproofing, dampproofing, [REDACTED], vapor intrusion mitigation and moisture intrusion barrier systems either inside or outside of any structure.
- (11) All cleaning, sand blasting, [REDACTED], preparing, priming, and sealing of surfaces to be roofed, dampproofed or waterproofed, whether done by roller, mop, swab, three-knot brush, squeegee, spray systems or any other means of application.
- (12) All types of pre-formed panels used in waterproofing (Volclay, etc.)
- (13) All application of protection board to prevent damage to the dampproofing or waterproofing membrane by other crafts or during backfilling operations.
- (14) All handling of roofing, damp and waterproofing materials.
- (15) All hoisting, [REDACTED] and storing of roofing damp and waterproofing materials.

- (16) All types of spray-in-place foams such as urethane, polyurethane, or polyisocyanurate, the machinery and equipment used to apply them, and the coatings that are applied over them.
- (17) All types of resaturants, coatings, mastics and toppings when used for roof maintenance and repairs.
- (18) All wrapping and/or coating of underground piping with bitumastic enamel or cold process, polykin tape, tapecoat, or other asphaltic coatings, or tapes and the preparation of surface by sand blasting or wire brushing.
- (19) All operations of jeeper or holiday detectors.
- (20) All materials laminated to roofing and/or insulation systems.
- (21) All materials and substrates used on the roof for fireproofing or any materials used as a support or means of attachment for the roofing systems.
- (22) All [REDACTED], vapor intrusion mitigation and moisture intrusion barriers that are applied with materials that are traditionally used on roofing, waterproofing, and dampproofing systems including, but not limited to sprays, epoxies, [REDACTED], PVC or [REDACTED] and bituminous products.
- (23) [REDACTED]
- (24) [REDACTED]
- (25) All maintenance, repair and inspection to all roofing, waterproofing and dampproofing systems.

[REDACTED]

[REDACTED]

Section 7. All tear-off, sand blasting and/or removal of any type of roofing and waterproofing including ballast [REDACTED], all spudding, sweeping, vacuuming and/or cleanup of any and all areas of any type where a roof is to be relaid, or any cleanup of any materials [REDACTED] and operation of equipment such as kettles, pumps, tankers, or any heating devices that are used on roofing or waterproofing systems coming under the scope of jurisdiction as outlined above in Article II.

Section 8. All substitutions, improvements, changes, modifications and/or alternatives to the jurisdiction or materials set out in this or any other Article.

Section 9. All other materials, equipment and/or applications necessary or appropriate to complete, perform or apply the processes and/or materials in this or any other Article.
