Approved California Community Colleges Bachelor's Degrees

67 programs at 50 colleges (as of October 2026)

Community college bachelor's degrees are workforce-aligned programs that create economic mobility for students in a direct path from their associate degree. More than **2,790 students have earned a community college bachelor's degree** since the pilot programs began ten years ago. California is creating access by growing the currently approved **sixty-seven programs at fifty community colleges**.
