				Available Sick Leave:	24.00 hours
				Gross Earnings:	\$774.85
				Total Deductions:	\$213.29
				Net Earnings:	\$561.56

Non-productive pay is for all time performing duties other than piece-rate work while under control of the employer, such as meetings, waiting for customers, production down time, training and transport between worksites. The rate for non-productive pay must be at least either the applicable state or local hourly minimum wage, whichever is higher.

*The hours indicated here should include all hours worked (including overtime and double-time hours, if any), which are used to compute the weighted-average regular rate of pay.

**The regular rate of pay for overtime purposes is calculated using the weighted-average method. Because all hours have been paid at their respective rates, the overtime premium portion of those hours is computed at a factor of either .5 (overtime) or 1 (double time).

For more information see the [DLSE Enforcement Policies and Interpretations Manual](#), section 49 (other sections may apply as well).

The wage statement must show all compensation paid to the employee.

Example itemized wage statement for a worker paid piece-rate, as required by Labor Code section 226(A) □
