Subject: Transmittal of Mine Safety Order Proposals for Meeting #8

Dear Advisory Committee Member,

Enclosed you will find the full revised MSO proposal, as well as several addendum pages at the back for your review, which will be the subject of our next meeting in Van Nuys on June 12th, at 6150 Van Nuys Boulevard, 9AM to 4 PM, in the ground floor auditorium. We will attempt to complete our initial review of all surface mining regulations. We have postponed the discussion on the Mine Arc Refuge until our June 25 meeting in Sacramento.

Thank you all again for your willingness to participate in this important process by reviewing the proposed language before the meeting.

Our final scheduled meeting (Meeting #9) will take place on Wednesday, June 25, 2014 in Sacramento, 9 AM to 4 PM. This meeting will review all remaining surface and underground issues, after which we will develop a final proposal of the Mine Safety Orders for review by the committee.

The notes from meetings #5, #6 and #7 are still in process.

I look forward to seeing everyone on June 12th in Van Nuys.

Sincerely,

Steve Hart
