Subject: Transmittal of Mine Safety Order Proposals for Meeting #9

Dear Advisory Committee Member,

Enclosed you will find the full revised MSO proposal, as well as several addendum pages at the back for your review, which will be the subject of our next meeting in Sacramento on June 25th, at 2424 Arden Way, Room 465 (a new room called the "Video Conference Room"), 9AM to 4 PM. We will attempt to complete our review of all remaining mining regulations, including the often-postponed subject of underground rescue chambers proposed by the Mine-Arc company.

Thank you all again for your willingness to participate in this important process by reviewing the proposed language before the meeting. Note: this is the same packet we distributed at the last meeting, so you don't have to copy new documents!

This will be our final scheduled meeting. After this meeting, John Leahy and myself will develop a final proposal for your review. Then we will schedule a final approval meeting in Sacramento.

The notes from meetings #5, #6, #7 and 8 are still in process.

I look forward to seeing everyone on June 25th in Sacramento

Sincerely,

Steve Hart
