Subject: Comments: Workplace Violence Prevention in General Industry

Mr. Graulich,

The Board of Directors of the California State Association of Occupational Health Nurses (CSAOHN), supports improvement of the Workplace Violence Prevention Standard in General Industry. Following careful review of the draft, the board recommends the following for inclusion in the revision:

Assurance of a safe process for workers to submit Workplace Violence Reports that are private, protect confidentiality, and are streamlined and efficient.

Considering the sensitive nature of violent incidents, Employee Assistance Professionals, Occupational Health Nurses, and employees are ideally included in the development of the Workplace Violence Prevention Plan.

Questions are welcome. Thank you for your consideration,

Dawn Stone, PhD, RN, ANP-BC, COHN-S, FAAOHN
