SUBJECT: Updated draft of the Division of Occupational Safety and Health’s Group V Elevator Safety Orders

Dear Stakeholder,

Attached is an updated draft of the Division of Occupational Safety and Health’s Group V Elevator Safety Orders. The 2022 draft regulatory language is based on the current (2019) version of ASME A17.1 and other consensus standards. The format has been simplified from the previous draft from 2021.

This 2022 draft sets forth the general requirements in one place, resulting in a more streamlined set of regulations, and remains aligned with the underlying principles from the prior drafts. It is intended to keep the public and workers safe and provide clear guidelines to the conveyance industry.

We look forward to receiving your feedback. If you would like to provide feedback you can do so by emailing us at GVcomments@dir.ca.gov by November 1st, 2022. We plan to submit the 2022 draft to the Occupational Safety and Health Standards Board in early November and therefore begin formal rulemaking early next year. All stakeholders will have ample opportunity to provide comment and participate in the formal rulemaking process.

Sincerely,

Dan Barker  
Lead Safety Engineer  
DOSH Elevator Unit
