EXECUTIVE SUMMARY

The Cal/OSHA annual report documents progress toward achieving the Cal/OSHA strategic vision of becoming a model agency that promotes workplace safety and health by motivating employers and employees to be actively involved in preventing hazards, which would lead to reduced injuries and illnesses on the job.

The role of Cal/OSHA is to enforce safety and health regulations for employers who are not in compliance with the law through enforcement efforts, and to provide compliance assistance through targeted outreach, education and training and to emphasize increased awareness on the part of both employers and employees of the importance of a safety and health culture.

Cal/OSHA strives to provide as many employers as possible with assistance in achieving voluntary compliance with Cal/OSHA standards before enforcement measures become necessary—and, more importantly, before an employee is injured or killed. Traditional enforcement methods are supplemented by incentive and education programs and targeted outreach that encourage voluntary compliance.

Partnership and cooperative programs leverage Cal/OSHA’s resources.

In accordance with the requirements of the Government Performance and Results Act (GPRA), California developed a Five-Year Strategic Plan covering the period 2013 through 2017. The Five Year Strategic Plan, which was extended for an additional year, incorporated the three federal OSHA goals as its direction.

The three overall strategic goals are:

Goal 1. Secure safe and healthy workplaces, particularly in high-risk industries, and improve workplace safety and health through enforcement and consultative assistance.

Goal 2. Promote workplace cultures that increase employee and employer awareness of, commitment to, and involvement in, safety and health.

Goal 3. Maximize Cal/OSHA’s effectiveness and enhance public confidence.

The Fiscal Year (FY) 2018 Annual Performance Plan developed by Cal/OSHA was intended to support the overall goals of the five-year Strategic Plan. The 2018 Performance Plan included specific performance goals designed to produce measurable progress toward realization of Cal/OSHA’s strategic goals.

Performance goals include:

- Reducing fatalities and occupational injuries in construction and agriculture;
- Reducing injuries, illnesses and fatalities in selected high hazard industries with a goal of removing the industry from the High Hazard Industries list due to decreased injury and illness rates;
- Reducing fatalities and occupational injuries and illnesses in petroleum refineries and other industries which fall under the requirements of the Process Safety Management standard;
- Raising awareness of heat illness prevention among employees and employer groups in outdoor places of employment;
- Promoting, involving and communicating with high-risk vulnerable worker or organizations and workers to increase their knowledge about workplace safety and health;
- Promoting voluntary compliance by offering employers a variety of partnerships including recognition and exemption programs; and
- Responding effectively to mandates by responding timely to formal complaints and fatalities, as well as timely issuance of citations, so that workers are provided full protection under Cal/OSHA.

This annual report for Cal/OSHA Enforcement reflects the integrated approach to achieving goals which were stated in the Cal/OSHA Strategic Plan. Cal/OSHA Enforcement programmed and self-referral activities have continued to be coordinated to ensure the greatest impact on selected industries with the highest preventable injury, illness and workers’ compensation rates.
FY 2018 ACCOMPLISHMENTS

After several years of challenges posed by budgetary constraints at state and federal level, that created obstacles for Cal/OSHA in hiring personnel, in most recent years the Department of Industrial Relations (DIR) and Cal/OSHA were successful in obtaining state authorization and funding for significantly increasing staffing. Each consecutive year starting July 2013 authority was granted initially to backfill previously vacant positions, then to establish new positions in Enforcement and Enforcement-support units. Most recently, starting on October 1, 2018, Cal/OSHA obtained approval and funding for six new positions to conduct inspections addressing the hazards posed by heat at indoor places of employment.

Starting in October 2017 and throughout this reporting period, many parts of California were severely impacted by wildfires, which burned millions of acres, causing massive property damage, widespread evacuations and high levels of smoke-related pollutants in the air. Cal/OSHA took a multifaceted approach responding to each of the stages of these unprecedented natural disasters, from providing relevant health and safety information on the website to participating in compliance assistance, outreach and consultation, and conducting enforcement activities when necessary.

During this past fiscal year, Cal/OSHA in collaboration with the Occupational Safety and Health Standards Board developed, proposed, amended and promulgated a significant number of regulations, some of which are the first in the nation, broadening the range of hazards from which workers are to be protected.

One of the most notable regulations adopted requires employers in hotels and other lodging establishments to protect housekeeping employees from musculoskeletal injuries.

Also during this reporting period, the first in the nation Process Safety Management for Petroleum Refineries regulation became effective, requiring employers engaged in oil refining operations to develop and implement a comprehensive set of measures to protect the safety and health of refinery workers and surrounding communities.

In FY 2018, Cal/OSHA continued to strengthen its outreach and educational efforts. The reactivated Publications Unit developed numerous educational materials and online resources, including posters, fact sheets and webpages. Educational materials are primarily drafted or revised by the two permanent full-time 23(g) staff members in the Publications Unit. The draft documents are then further reviewed and edited by Research and Standards staff, the Cal/OSHA Legal Unit, senior management, Cal/OSHA leadership, and lastly by selected stakeholders and the DIR Public Information Office.

Educational materials and online resources that were developed or updated, and made available to the public in FY 2018 include the following:

- Cannabis Industry Health and Safety (Internet webpage)
- Cal/OSHA Guidance for Construction Employers (Internet webpage)
- Cal/OSHA Jurisdiction (Internet webpage)
- Easy Ergonomics for Desktop Computer Users (Guidance document)
- Injury and Illness Prevention Program (IIPP) Models for employers in different of industries in both English and Spanish (Model Programs)
- Lead in Construction (Fact sheet)

Page 3 of 37
Last year’s achievements in the training and professional development of Cal/OSHA staff continued through FY 18, by ensuring that newly-hired employees and staff promoted to compliance safety and health officers participated in the Division-mandated and technical training courses. This was accomplished by coordinating, facilitating, and contracting a significant number of training courses over the fiscal year.

Another area of continued progress has been in developing, updating, and expanding educational material and guidance information on Cal/OSHA’s internet pages for all stakeholders, including the public, and intranet webpages for internal staff.

### Enforcement and Outreach/Educational Activities

As illustrated in the table below, this federal fiscal year, Cal/OSHA Enforcement opened 7,972 inspections, exceeding the goal to conduct 7,410 inspections. The aforementioned inspections comprise of 7,516 private industry inspections and 456 public sector inspections. During this time, Cal/OSHA identified approximately 19,718 hazards, potentially affecting the estimated 3.5 million workers employed at these establishments.

Of the hazards identified, 4,465 resulted in serious, 21 willful, 179 in repeat, and 12 in failure-to-abate citations.

---

1 OIS Inspection and Scan Summary Reports dated December 20, 2018.
While enforcement activities are critical to the Cal/OSHA program, educational outreach is also a valuable component to the success of fulfilling its mission. To achieve this, Cal/OSHA has a dedicated enforcement Outreach Coordination Program, which includes a Bilingual Outreach Team (BOT). The program focuses on providing educational outreach to high-risk, vulnerable employee populations.

In FY 2018, Enforcement Branch staff and the BOT provided educational outreach to small and large audiences, including those from unions, other worker-based organizations, university programs, professional organizations, Mexican and Guatemalan Consulates, and organizations serving persons who primarily speak Spanish.

Topics covered during these outreach events included agricultural safety, general industry safety, construction safety, heat illness prevention, tree worker safety, worker’s rights, and other industry specific topics.

In FY 2018, Cal/OSHA’s Recruiting Committee members comprised of managers and senior professional staff continued their efforts to forecast future vacancies, and monitor and track vacant positions in the professional staff classifications. These functions assisted with identifying where to allocate resources to recruit prospective employees. Members of the committee shared employment benefits and opportunities at local societal events and advertised in trade magazines and journals. The variety of marketing options selected and used by the committee furthered the goals of educating and successfully recruiting prospective applicants for the program.
Injuries, Illnesses and Fatalities

California's already low on-the-job total recordable case (TRC) injury and illness incidence rate of 3.6 per 100 full-time workers in CY 2017. Please see the following graph.

---

Nonfatal injury and illness incidence rates by case type, 1996-2017

All industries (incl. State and Local Govt.)

[Graph showing incidence rates from 1996 to 2017]

---

California Fatality Rates, 1999-2017

All industries (incl. State and Local Govt.)

[Graph showing fatality rates from 1999 to 2017]

2 Table 1. Incidence rates of nonfatal occupational injuries and illnesses by selected industries and case types, 2017 at [www.dir.ca.gov/OPRL/Injuries/2017/2017Table1.pdf](http://www.dir.ca.gov/OPRL/Injuries/2017/2017Table1.pdf).

California’s CY 2017 fatality rate of 2.2 is also lower than the national rate of fatal work injuries for civilian workers in CY 2017 of 3.5 per 100,000 full-time equivalent (FTE) workers.

The tables below provide a quick comparison of fatality rates between the national and California data by industry type, and show that except for transportation/utilities, the fatality rates in all other industries were equal to or lower than the national average.

4 Fatal occupational injuries, total hours worked, and rates of fatal occupational injuries by selected worker characteristics, occupations, and industries, civilian workers 2016 and 2017 available at [www.bls.gov/iif/oshcfoi1.htm#rates](http://www.bls.gov/iif/oshcfoi1.htm#rates).
The Appeals Board’s OASIS case management and scheduling system has now been in place for two years and continues to bring greater efficiency to the adjudication of cases. Throughout 2018, the Board continued to seek service improvement for stakeholders.

Litigation: The Board prevailed in 12 of 13 cases concluded in 2018. At the Superior Court level, the Board won nine cases. At the appellate court level, the Board won three of four cases adjudicated.

Regulations: The Appeals Board is in the process of amending several of its procedural regulations. Most significantly, the Board is in the process of amending its regulations governing the docketing and perfection of an employer’s appeal. Currently, in order for an appeal to be docketed and deemed perfected, the employer must provide the Board copies of the citations it is appealing. The Board proposes modifications to its regulations that will eliminate the requirement that the employer provide the Board copies of the citations it is appealing and instead require that the Division provide copies of the appealed citations. The Board proposes to modify several regulations to accomplish this change. The Board also proposes to modify its regulations to allow licensed members of the California State Bar, acting in a representative capacity, to issue subpoenas for attendance at hearing in Board proceedings. Finally, due to certain inefficiencies created by the regulation, the Board proposes repeal of a rule that requires that the Division provide employers copies of all documents and evidence in its possession within a specified 30-day period.

ALJ Training: OSHAB Administrative Law Judges from both the Sacramento and West Covina (Los Angeles area) offices participated in a 3-day training session in Sacramento. Professors from the National Judicial College provided a daylong session on Admitting Evidence in Administrative Hearings and Ruling on Objections. Other topics discussed included Settlements, Decision Making, Decision Writing, Statutory and Regulatory Interpretation and Affirmative Defenses. Amber Rose from the Oakland Federal OSHA office presented an overview of the federal health and safety program to the judges.

OASIS case management system: Continuing a trend from the previous year, 61% of docketed cases were initiated by employers through the OASIS online portal, with the remainder filed by mail. The Board’s volume of appeals showed a slight uptick from the previous year with an average of 245 appeals docketed each month (last year’s average was 239).

Heat Illness Prevention

According to the National Oceanic and Atmospheric Administration (NOAA) the summer of 2018 saw average summer temperatures in the U.S. at 2.1 degrees above average. California continues to see record-breaking high summer temperatures, with the summer of 2018 having the hottest month ever on record. California’s last five summers are among its six warmest recorded.

Cal/OSHA continued its highly effective heat illness prevention special emphasis program in 2018. The program combines a multifaceted approach that includes components of education and targeted enforcement.

In addition, Cal/OSHA worked alongside agricultural and construction industry groups, insurance carriers and others in 2018 and provided highly effective training and outreach to employers, supervisors and work crews on heat illness prevention. By the end of FY 2018, Cal/OSHA staff participated in over 150 events where heat illness was discussed.

As in past years, bilingual training efforts were augmented with television interviews and regular participation in radio programs to raise awareness of the Cal/OSHA program, how to file a complaint, heat illness prevention and field sanitation issues. Cal/OSHA also participated in the yearly Heat Illness Prevention Network call, which connects over 100 employer associations, employers and worker advocate groups.

In addition to issuing five heat advisories, the outreach campaign included multilingual public service announcements on approximately 40 billboards, 79 wall posters, 56 lunch trucks and 40 moving vans in areas extending from Yuba City through the Central Valley and out to Riverside County. More than 4,400 multilingual ads in Spanish, Hmong and Punjabi aired on 20 radio stations in the target areas as well.

Outreach materials and resources continued to be highly useful in assisting both employees and employers in the prevention of heat-related illness and death. Many of these materials are available online at either the Cal/OSHA heat page at: http://www.dir.ca.gov/dosh/heatillnessinfo.html or at the

High Temperature Forecast

Mon Jul 23

Tue Jul 24
Throughout the year, enforcement staff evaluated compliance with the heat standard (last revised in 2015) when inspecting employers in industries that had employees working outdoors. Enforcement efforts peaked just prior to and during high-heat events, particularly during the summer months. The overall compliance rate for 2018 will be determined once all of the 2018 cases are closed. The overall compliance rate in 2017 was 61.1%; compared to 60.2% in 2016.

The following graph represents the year-round enforcement and outreach activities from calendar year (CY) 2005 through CY 2017.

Note: The S18HEAT coding of inspections indicates that heat hazards were evaluated in those inspections in addition to other safety and health hazards.

5 The percentage of inspections opened in 2017 and completed in 2017 or later where no violations of section 3395 were cited, compared to all inspections opened in 2016 and completed in 2016 or later where compliance with section 3395 was evaluated.
32% decrease in reported heat fatalities during this same time, from 47 to 32.6. Please see the following graph.

To date for 2018, California has had two medically-confirmed fatality cases related to outdoor heat exposure. Eleven suspect heat fatalities are pending medical records review as of this writing. Final enforcement outcomes are still pending at this time. The following table indicates the distribution of fatalities due to outdoor heat exposure, by industry, for the 2005-2018 YTD period.

---

6 The national statistics may not be entirely comparable in that they may include cases of indoor heat-related fatalities, while California’s are focused on outdoor heat cases. "USA" Source: United States Department of Labor - Bureau of Labor Statistics.
Tree Work Safety Emphasis Program

Following several tree trimming workplace fatalities, in January 2017 Cal/OSHA launched a safety awareness campaign aimed to protect the lives of tree service workers. These efforts continued through FY 18, as serious and fatal accidents continued to occur in these operations. Employers in this high-risk industry need to be aware of, and take steps to minimize, the hazards to their workers. As part of the Tree Work Safety Emphasis Program, Cal/OSHA uses the combined approach of awareness campaign and making resources available for employers and employees, including a Tree Work Safety Guide, fact sheet and checklist, and enhanced enforcement, with Cal/OSHA inspectors throughout the state investigating possible violations when they observe unsafe tree trimming or tree removal operations, in addition to inspections of complaints and accidents.

Wildfires Response

Between October 2017 and the end of summer of 2018 several massive wildfires ignited large areas across Northern and Southern California, with catastrophic effects on almost any aspect of life in the state. Along with other federal, state and local agencies, Cal/OSHA was called to assist with the response to these disasters both at the time of the active emergencies, and during the cleanup, remediation and reconstruction phases. Cal/OSHA developed an advisory on worker safety for regions affected by wildfire smoke, which is posted and featured on the Department of Industrial Relation’s homepage (https://www.dir.ca.gov/dosh/Worker-Health-and-Safety-in-Wildfire-Regions.html) and sent media advisories to the public during wildfire events, in addition to providing compliance assistance by phone to numerous callers. In response to complaints about smoke exposures, Cal/OSHA conducted more than 40 onsite inspections and more than ten investigations by letter.
Cal/OSHA safety and health staff was assigned for various lengths of time to the Office of Emergency Services (OES) operations centers, both regional and state. During cleanup operations, Cal/OSHA provided compliance assistance in areas affected by wildfires, by deploying field staff to do spot-checks of cleanup operations, answering questions on cleanup hazards and providing assistance over the phone to callers, and by staffing OES centers and field offices. Cal/OSHA has also provided safety training to contractors involved in cleanup operations.

Enforcement activities also occurred in response to complaints and accident reports, and based on referrals from compliance assistance staff, on employers who demonstrated continued non-compliance, with over 50 inspections of cleanup and rebuilding operations having been conducted.

Communicating with the Limited and Non-English Speaking Workforce

Direct communication with limited and non-English speaking workers and their employers continues to be a high priority for Cal/OSHA. Starting in 2002, Cal/OSHA sought to overcome language barriers between Cal/OSHA staff and the limited and non-English speaking workforce by increasing the number of in-house certified bilingual employees, which at the time were 26. By October 2018, Cal/OSHA's bilingual staff (in various languages) had risen to 60 employees who passed the state's language certification exam. These efforts were supplemented by contracting with an external translation service, providing a network of native-speaking language interpreters telephonically available for over 100 languages and dialects for those instances where an in-house bilingual employee was not readily available or staff was unable to identify the language spoken.

Cal/OSHA's commitment to serve the growing number of limited and non-English speaking workers in California was reaffirmed in 2011 by the introduction of the Language Learning Project. The Cal/OSHA Language Learning Project provides tuition fees, books, and paid study time for employees interested in learning a second language after work hours at a community college, UC/CSU extension, or other local provider (on-line courses excluded). Cal/OSHA continued to make this program available to employees in FY 2018. Although Spanish is the current priority, Cal/OSHA is also considering other languages as well.
Professional Training and Certification

The Professional Development and Training Unit (PDTU) is responsible for administering the Professional Development and Training Program. The goal of the program is to assist Compliance Safety and Health Officers (CSHOs) and their supervisors with direction, guidance, and training options that directly contribute to their ability to perform their duties and represent Cal/OSHA with a high degree of professional expertise.

Throughout FY 2018, PDTU worked tirelessly to provide Division-mandated and technical training to CSHOs statewide. The unit contracted with outside vendors, forecasted, planned, scheduled, and delivered training to meet the training needs of Cal/OSHA staff throughout the state. Training included in-person courses, online webinars conducted by Cal/OSHA staff, and out-service courses taught by academic institutions, professional organizations, and highly respected professionals who are experts in their field.

During FY 2018, PDTU coordinated and facilitated 25 total courses, comprised of both mandatory and technical training courses and webinars in which a total of 1331 managers, senior professional staff, and CSHOs participated.

As in previous years, PDTU and Cal/OSHA leadership continue to encourage and support qualified staff in obtaining professional certifications. Staff that elect to participate in these opportunities are reimbursed tuition, books, and other related fees and expenses.
Employment Education and Outreach (EMPLEO)

The Employment Education and Outreach (EMPLEO) was established as an alliance to provide Spanish-speaking employees and employers with information on federal and state workplace laws. This partnership is two-fold: helping workers know what rights and protections they have, and helping employers know what resources there are available to them. Partners in the EMPLEO program include the U.S. Department of Labor's Wage and Hour Division; OSHA; the U.S. Equal Opportunity Commission; California Division of Labor Standards Enforcement; Cal/OSHA; the consulates of Mexico, El Salvador, Guatemala, Honduras, Nicaragua and Costa Rica; the regional Hispanic Chamber of Commerce; and the Coalition of Human Immigration Rights in Los Angeles, among others.

Cal/OSHA is proud to be part of this program since its inception in 2004, providing information and assistance to Spanish-speaking workers and employers regarding their rights and responsibilities, and responding to workplace complaints.

Hispanic Arborist Association (HAA)

In early April 2018, PDTU partnered with the Hispanic Arborist Association (HAA) to provide training on Tree Worker Safety for Cal/OSHA Enforcement and Consultation staff and California State Compensation Insurance Fund loss prevention engineers. The training was held at the Laborers’ Training and Retraining and Trust Fund for Northern California in San Ramon. Demonstrations were given using common tools and equipment in the industry, including ropes and saddle equipment, tree chipper operations, aerial lift truck maneuvers, and tree trimming methods using a chainsaw while up in a tree. Cal/OSHA staff assisted by providing training on the applicability of California’s Tree Work, Maintenance or Removal regulations for operations involving tree work exposures.
Cross Referrals with the Division of Labor Standards Enforcement (DLSE)

Under California law, the Division of Labor Standards Enforcement (DLSE) has responsibility for investigating worker complaints related to unpaid wages, lack of rest breaks, and other labor law violations. Unlike the federal system, DLSE—not Cal/OSHA—is responsible for investigating worker complaints of retaliation, reprisal, and discrimination by employers against employees who express concern about and/or contact Cal/OSHA regarding unsafe and unhealthy working conditions.

In May 2012, DLSE and Cal/OSHA established a streamlined system involving new forms and a centralized processing point for cross-referrals between the two agencies so that all referrals are logged and tracked. Cal/OSHA refers complaints of labor law violations and employer discrimination to DLSE, while DLSE refers worker complaints, and the observations of its own employees conducting DLSE inspections of work sites, regarding unsafe and unhealthy working conditions to Cal/OSHA. The new procedures have resulted in more reliable and rapid cross-referrals between Cal/OSHA and DLSE.

During the FY 2018, the cross referral process continued for the benefit of the workers covered by these two Divisions of the Department of Industrial Relations, with Cal/OSHA forwarding 107 referrals for investigation to DLSE (82 concerning labor law violations, and 25 concerning employer retaliation and discrimination), and receiving four referrals from DLSE concerning working conditions.

Alliance with the Mexican Consulate

In 2018, DIR signed a new alliance agreement between the Department of Industrial Relations’ (DIR) Cal/OSHA and the Mexican Consulates in California, to continue assisting in educating Mexican workers on their labor rights. For the tenth year, DIR joined the Mexican Consulates in launching the annual Labor Rights Week, during which DIR and its representatives from Cal/OSHA, the Labor Commissioner’s Office and Division of Workers’ Compensation participated in seminars at all ten Mexican Consulates across the state.
Citations to Six Construction Companies for Exposing Workers to Valley Fever
McCarthy Building Companies, Inc. (#1235941)
Papich Construction Co., Inc. (#1236440)
Granite Construction Co., Inc. (#1235643)
Sachs Electric Company (#1234467)
Dudek (#1243386)
Althouse and Meade, Inc. (#1243804)

On November 16, 2017, the Cal/OSHA Bakersfield district office issued general and serious citations with total penalties assessed $241,950 to six construction companies at a multiemployer solar project construction site located in Monterey County, California, after reports that workers contracted Valley Fever.

In May 2017, Cal/OSHA opened inspections of the construction activities that were conducted at the California Flats Solar Project in Cholame Hills, which involved disturbance of soil contaminated with the microscopic fungus known as Coccidioides immitis. When inhaled, this pathogen causes Coccidioidomycosis (Valley Fever), an illness that ranges in severity from mild to very serious, even fatal, when it becomes chronic. The fungal spores reside in the top two to 12 inches of soil in many parts of the state. When soil is disturbed by digging, driving, or high winds, fungal spores can become airborne and may be inhaled by workers.

All six employers inspected were issued serious citations for failing to provide respiratory protection to their employees who were exposed to harmful dust contaminated with coccidioides fungal spores as a result of dust-generating activities, and while working in windy environments at the solar project construction site. Additionally, four of the employers were cited for serious violations (one of which was classified as repeat) for failing to implement procedures under the Injury and Illness Prevention Program requirements to control the unhealthy conditions present at the project site due to the soil contamination. General citations were also issued to most of the employers for failures to provide medical evaluations, and all required training, to employees assigned to wear respirators.

Citations to Three Contractors for Catastrophic Structure Collapse
Largo Concrete, Inc. (#1237900)
N.M.N. Construction, Inc. (#1270658)
Johnstone Moyer, Inc. (#1237922)

On November 22, 2017, the Cal/OSHA Oakland district office issued general and serious citations with total penalties assessed $147,315 to three construction companies at a multiemployer large mixed-use construction project located in Oakland, California. On May 26, 2017, 13 workers were sent to the hospital, two of them with serious injuries, as they fell approximately 20 feet when the temporary mold (formwork) and vertical shoring they were working on collapsed during concrete placement.

All three contractors received three general citations, for failing to ensure that the falsework and vertical shoring system constructed at the site was inspected by a California registered civil engineer; for failing to maintain a written certification of conformity of the falsework and vertical shoring system to the working drawings; and for not following manufacturer’s specifications when using metal shore clamps.

Two of the employers were cited for three serious accident-related violations, for failing to ensure that the formwork and falsework or vertical shoring used to support concrete and employees was designed, constructed and maintained so as to assure its ability to safely withstand all intended loads during construction of a...
Citations in Fatal Bee Attack on Tree Worker
Hadley Date Gardens Inc. (#1245472)

On December 28, 2007, the Cal/OSHA San Bernardino district office issued one regulatory, one general and two serious accident-related citations with total penalties assessed $41,310 to Hadley Date Gardens Inc., located in Thermal, California. On July 3, 2017, a tree worker was spraying water on date palm fruit from the elevated bucket of a spraying rig when a beehive was disturbed. The bees repeatedly stung the worker, who suffered anaphylactic shock and died at the site.

The regulatory violation was issued for failure to maintain records of inspections to identify unsafe conditions, as required by the Injury and Illness Prevention Program regulation. The general citation addressed the failure to maintain at the worksite adequate first-aid materials. The serious accident-related violations were issued for failures to evaluate the worksite for hazardous bee and insect exposure, and to establish appropriate safety protocols, which include providing appropriate personal protective equipment and training that could have prevented this incident.

Citations to Tree Trimming Company for Brush Chipper Fatality
Gorilla Tree Service (#1255309)

On January 5, 2008, the Cal/OSHA American Canyon district office issued five general and two serious citations, one which was designated as accident-related with total penalties assessed $41,310 to Gorilla Tree Service, located in Napa, California. On July 3, 2017, a worker was on the ground as part of a two-person crew removing limbs from a liquidambar tree when a rope used to lower limbs from an aerial bucket was caught and pulled into the chipper, strangling him.

The general violations were for failing to certify completion of employee tree work training; failing to conduct a job briefing with employees prior to their work assignment; failing to provide first aid and CPR training; failing to ensure that the brush chipper was equipped, maintained and operated in accordance with the manufacturer's recommendations; and for failing to keep the cutting blades of the chipper sharp and properly adjusted. The serious citation was issued for failing to guard moving parts of a belt and pulley drive of the wood chipper and the serious accident-related citation was for failing to prevent a jobsite rope which employees were using to lower tree limbs, and which presented an entanglement hazard, from entering the point of operation of the brush chipper.

Citations to Foundry for Confined Spaces Accident
Alhambra Foundry Co. Limited (#1261322)

On February 27, 2008, the Cal/OSHA Los Angeles district office issued two general citations, one of which was classified as willful, and six serious citations, one which was designated as willful, and another one as willful accident-related with total penalties assessed $283,390 to Alhambra Foundry Co. Limited, located in Alhambra, California. On August 28, 2017, two workers at the foundry were cleaning and unjamming a 38-foot long auger screw conveyor at the bottom hopper of a baghouse without effectively de-energizing or locking out the equipment. When one of the workers re-entered the hopper after the cleaning was done to retrieve equipment from inside the confined space, a maintenance worker 45 feet away energized the equipment to perform a test. The moving auger screw pulled the worker into the screw conveyor, resulting in both his legs having to be amputated in order to free him.
The general violation addressed deficiencies in the implementation of employer’s Injury and Illness Prevention Program, and the willful general violation was for failing to post signs informing employees of the existence and danger of permit-required confined spaces. The serious citations were issued for failing to develop and utilize a lock-out/tag out program, and to train employees on the hazardous energy control procedures; for failing to develop and implement a permit space program and for failing to train the employees who entered the confined space. The willful serious violation was for allowing workers to enter the permit-required confined space without complying with entry requirements, even as the employer had received previous citations for such operations. The willful serious accident-related violation was for failing to protect the employees who were cleaning and unjamming equipment from hazardous movement, after the employer had been previously cited for similar violations.

Citations to Roofing Contractor for Repeat Fall Hazard Violations
California Premier Roofscapes (#1260229)

On February 28, 2018, the Cal/OSHA San Diego district office issued three general citations, one of which was classified as repeat, and one serious repeat citation with total penalties assessed $134,454 to California Premier Roofscapes, for a jobsite located in Chula Vista, California, as result of a complaint inspection. On August 29, 2017, workers were installing tiles on the roof of a three-story house without fall protection. The general citations were issued for not inspecting equipment prior to each use and inadequate training on fall hazards and protection. The general repeat violation was for failing to effectively implement and maintain an Injury and Illness Prevention Program. The serious repeat citation was issued for failing to ensure that workers on the roof were wearing fall protection.

Citations to Marine Cargo Handling Company for Fatal Forklift Accident
SSA Pacific, Inc. (#1286304)

On July 2, 2018, the Cal/OSHA San Diego district office issued one general and five serious citations, one which was designated as willful, and another one as accident-related with total penalties assessed $205,235 to SSA Pacific, Inc. located in San Diego, California. On January 3, 2018, a longshoreman was driving a forklift when he collided with a concrete support column and suffered fatal injuries after being thrown from the forklift. The employee was not wearing a seatbelt and the forklift had multiple safety devices disabled, including a seatbelt warning buzzer and mast interlock system designed to disconnect power from the hydraulic lift when the operator is unseated. The general violation was for the failure to establish and maintain an effective heat illness prevention plan. The serious citations were issued for failing to effectively implement several elements of the Injury and Illness Prevention Program provisions and for failing to inspect and maintain forklifts in accordance with manufacturer’s provisions, and with the applicable standards. The willful serious violation was cited for failing to ensure that forklift safety checks were performed at the beginning of each shift and that unsafe conditions were reported, a violation for which the company was previously cited following an accident inspection. The serious accident-related citation was issued for failing to ensure that forklift operators used seatbelts.

Citations to Outdoor Advertising Company for Billboard Electric Shock Accident
Outfront Media LLC (#1293060)

On August 3, 2018, the Cal/OSHA Los Angeles district office issued one general and two serious citations, one designated as accident-related with total penalties assessed $32,435 to Outfront Media LLC located in Los Angeles, California. On February 6, two sign hangers were working 25 feet above...
On a billboard’s platform to install a 14-by-48-foot vinyl sign, using 11-foot poles. One of the metal poles touched an energized high-voltage power line located near the edge of the billboard, which resulted in serious burns to 25 percent of the sign-hanger’s body.

The general violation addressed deficiencies of the heat illness prevention plan. The serious violation was for failing to effectively implement and maintain all required elements of the Injury and Illness Prevention Program; the serious accident-related citation was issued for the employer’s violation of provisions for preventing accidents due to proximity to overhead lines, which requires a minimum clearance of 6 feet be maintained for work done near 34.5 kilovolt lines.

**Citations to Recycling Collection Company for Fatal Waste Collection Truck Accident**  
**GreenWaste Recovery Inc. (#1299087)**  
On August 29, 2018, the Cal/OSHA Fremont District Office issued two general and two serious accident-related citations, with total penalties assessed $46,270 to GreenWaste Recovery Inc., located in San Jose, California. On March 2, 2018, a worker suffered fatal injuries from being run over by his own truck, when he fell out while operating the truck from the right-hand side of the truck without having occupant restraints. The general violations were for failures to maintain in good operating condition the truck restraint equipment and backup warning equipment. The serious accident-related citations were issued for the employer’s failure to ensure that occupant restraints were being used by workers driving from the right-hand side of the truck and for failure to identify and evaluate the unsafe work practice of workers not using occupant restraints.
**Administrative Regulations:**

**Section 336, Assessment of Civil Penalties.** This rulemaking was initiated to increase maximum and minimum civil penalties for certain violation classifications to conform to the percentage increase in the CPI-U, not seasonally adjusted, for October of the current year, as compared to the prior year's October CPI-U. The statutory changes were triggered by similar increases in the corresponding OHSA civil penalties in 2016.

**Safety Regulations:**

**PSM Section 5189.1** (Effective October 1, 2017). This regulation was based on the Governor’s Interagency Working Group on Refinery Safety report of the Chevron refinery incident in Richmond, CA, on August 6, 2012. The resultant requirements include applying a hierarchy of controls to implement safety measures that are inherently safer; conducting damage mechanism reviews; applying rigorous safeguard protection analyses; integrating human factors and safety culture assessments into safety planning; involving frontline employees in decision-making; conducting root-cause analysis following significant incidents; and performing comprehensive process hazard analyses.

**GISO Section 3650(t)(17)** (Effective October 1, 2017). This rulemaking addressed the exception to section 3650(t)(17) which allows forklift drivers to be out of the driver’s seat with the forks raised no more than 42 inches for loading and unloading above the level where the operator/loaders are standing. The amendment clarified that the 42 inches referenced in the exception is to be measured from the same level on which the forklift is operating and that the operator is to remain in the seat when the forks are raised except during loading and unloading operations.

**CISO Sections 1711, 1712, 1713, 1717, and 1721** (Effective January 1, 2018). This rulemaking was initiated as the result of OSHSB Petition File No. 537 submitted by Mr. Walter Wise, General President of the International Association of Bridge, Structural, Ornamental and Reinforcing Iron Workers, dated September 11, 2013. The regulations address the hazards of the installation of post-tension cables, reinforcing steel and formwork for concrete construction.

**LVSO Sections 2300 2320.2, 2320.7 2320.8 and 2320.11. HVSO Sections 2700, 2874, 2887, 2940, 2940.1, 2940.2, 2940.5, 2940.6, 2940.7, 2940.8, 2940.11, 2940.12, 2940.13, 2940.14, 2940.15, 2940.16, 2941, 2941.1, 2943, 2943.1, 2944, 2944.1, 2946, 2951 and 2340.17. GISO Sections 3314, 3389, 3422, 3425, 3428 and 5156 and TSO Section 8617** (Effective April 1, 2018). On April 11, 2014, federal OSHA issued a Final Rule relating to Electric Power Generation, Transmission, Distribution and Electric Protective Equipment. The main purpose of this rulemaking is to update title 8 to be at least as effective as the federal regulations. These regulations amended title 8 general industry, electrical, and construction safety orders to include new or revised provisions on host employers and contractors, training, job briefings, fall protection, insulation and working position of employees working on or near live parts, minimum approach distances, protection from electric arcs, deenergizing transmission and distribution lines and equipment, protective grounding, operating mechanical equipment near overhead power lines, and working in manholes and vaults.
Health Regulations:

CSO & GISO Sections 1535.1, 5155, 5205 and Ship Building/Repairing/Breaking Safety Orders
Section 8359.1 - Beryllium (Horcher)  
In response to a 1/09/17 federal final rule, these regulations set the permissible exposure limit (PEL) for beryllium at 0.2 micrograms per cubic meter of air, averaged over an eight-hour shift, and 2.0 micrograms per cubic meter of air as a short-term exposure limit averaged over a period of 15 minutes. Employers are required to use engineering controls, work practices, and provide respiratory protection when controls do not limit exposures to the PEL. Employers must also limit access to high exposure areas, train workers, and provide medical exams to highly exposed workers.

GISO Section 3345, Hotel Housekeeping Musculoskeletal Injury Prevention  
Employers in hotels and other lodging establishments must protect employees from musculoskeletal injuries by developing and implementing a program that includes conducting a worksite evaluation requiring effective involvement of housekeepers, methods of correction, including the availability of housecleaning tools and equipment, and effective training on injury prevention associated with housecleaning tasks.

GISO Section 5155, Benzyl Chloride  
The existing 8-hour time-weighted average (TWA) Permissible Exposure Limit (PEL) of 1 part per million (ppm) (5 milligrams per cubic meter of air (mg/M3)) is reduced to 0.03 ppm (0.16 mg/M3) for benzyl chloride.
Governor Brown signed two bills affecting Cal/OSHA in FY 2018. While signed in FY 2018, both bills will take effect on January 1, 2019.

**AB 2334** Occupational injuries and illness: employer reporting requirements: electronic submission.

This bill is an omnibus bill that introduced multiple changes that affect how the state tracks injury and illness information within the workers’ compensation and occupational safety and health jurisdictions. Specifically, it authorizes the Director of DIR to release certain data regarding public self-insured employers’ workers’ compensation programs, if the information publicized does not include individually identifiable claimant information. This bill also clarifies the applicable statute of limitations for violations relating to an employer’s obligation to maintain a record of its employees’ occupational injury and illness. Further, it requires Cal/OSHA to convene an advisory committee meeting within 120 days of determining that the federal Occupational Safety and Health Administration (OSHA) has eliminated or substantially diminished the requirement that employers electronically submit to OSHA injury and illness data as required by the “Improve Tracking of Workplace Injuries and Illnesses” rule that was passed in May 2016. The advisory committee would be required to evaluate how to implement changes to protect the goals of federal OSHA’s May 2016 electronic reporting rule.

**AB 2799** Adult-use cannabis and medicinal cannabis: license application: OSHA training.

This bill requires applicants for a state license to conduct various business activities related to the production and sale of cannabis to provide a statement to the licensing authority that the applicant employs, or will employ within one year of receiving or renewing a license, an employee and a supervisor who has successfully completed a Cal/OSHA 30-hour general industry outreach course offered by a training provider that is authorized to provide the course by an OSHA Training Institute Education Center. Applicants with only one employee would be exempt from this requirement.
SUMMARY OF ANNUAL PERFORMANCE PLAN RESULTS
FOR ENFORCEMENT
FEDERAL FISCAL YEAR 2018

Performance Goal 1.1
Targeting the Mobile Workforce

Performance Goal 1.2
High Hazard Targeting Program

Performance Goal 1.3
Process Safety Management (PSM) and Covered Industries

Performance Goal 2.1
Heat Illness Prevention Enforcement and Outreach to Employees and Employer Groups

Performance Goal 2.2
Educational Outreach to High-Risk, Vulnerable Employee Populations

Performance Goal 2.3
Partnership Programs

Performance Goal 3.1
Timeliness of Inspections Opening and Citation Issuance

Performance Goal 3.2
Imminent Hazards and Fatalities Response Time
GOAL 1.1
Targeting the Mobile Workforce

Strategic Goal: Secure safe and healthy workplaces, particularly in high-risk industries, and improve workplace safety and health through enforcement and consultative assistance.

Performance Goal: Target the mobile workforce to reduce fatalities and occupational injuries and illnesses in construction and agriculture by reducing and eliminating hazards in these industries.

FY 16 – OIS data as of December 27, 2018
FY 18 – OIS data as of December 20, 2018

This goal was achieved. Whenever possible, Cal/OSHA field staff attempt to secure abatement of these hazards while on-site.
GOAL 1.2
High Hazard Targeting Program

Strategic Goal: Secure safe and healthy workplaces, particularly in high-risk industries, and improve workplace safety and health through enforcement and consultative assistance.

Performance Goal: Reduce injuries, illnesses and fatalities in selected high hazard industries, with a goal of removing the industry from the High Hazard Industries list due to decreased injury and illness rates.

| Outcome Measures           | • At least 1,200 event participants will have gained increased knowledge of workplace safety and health hazards, workers’ rights, and how to exercise those rights. An additional 25,000 workers will gain this knowledge through trainings conducted by event participants.  
• The Farm Labor Contractor (FLC) Safety and Health guide will be translated into Spanish.  
• There were over 40,000 attendees at FY 2018 outreach events with vulnerable workers. Based on this information, it is safe to infer that at least 1,200 event participants came away with increased knowledge of workplace health and safety hazards, workers’ rights under the law and how to exercise these. It is also safe to conclude that over 25,000 workers gained health and safety knowledge from the workshops, training and other events.  
• The English-language FLC guide, now called Safety and Health in Agricultural Field Operations, is undergoing additional revisions. The translation of this publication will begin once English guide is completed.  
• This goal was achieved.

</tbody>
</table>

Strategic Goal: Promote workplace cultures that increase employer and employee awareness of, commitment to, and involvement in safety and health.

Performance Goal: Promote voluntary compliance by offering employers a variety of partnerships including recognition and exemption programs.

**Activity Measures**
- Cal/VPP and Cal/VPP Construction Units will hold one workshop each to promote Cal/VPP and Cal/VPP Construction.
- Cal/VPP held one workshop and Cal/VPP Construction held nine mini-workshops.
- Cal/VPP held mini-workshops with general contractor and sub-contractors. Large multi-general contractor workshops were not held this year.

**Outcome Measures**
- Seven new establishments will be added into the Division’s leadership level for fixed site establishments (Cal/VPP) and 15 will be renewed.
- Eight new establishments will be added into the Division’s leadership level partnership program for construction VPP worksites and one will be renewed.
- Nine new VPP establishments were added into the Division’s leadership level for fixed establishments and 10 were renewed.
- Three new establishments were added into the Division’s leadership level partnership program for construction VPP worksites and none were renewed during FY 2018.
- California had a delay of four months in its ability to prepare certificates for those who had successfully completed their renewal visits. These renewals will be reflected in the FY 2019 year.
- New establishments are required to have a thorough application completed by the general contractor. Nine applications are pending and anticipated to be completed in the FY 2019 year. Due to the nature of construction, Cal/VPP-C renewals only occur only if the project is not yet completed.
Goal 3.1
Timeliness of Inspections Opening and Citations Issuance

Strategic Goal: Maximize Cal/OSHA's effectiveness and enhance public confidence.

Performance Goal: Respond effectively to mandates so that workers are provided full protection under Cal/OSHA by timely response to formal complaints and to nonfatal accidents, as well as by timely issuance of citations, so that hazards could be timely corrected.

</tr>
</thead>
<tbody>
<tr>
<td>Activity Measures</td>
<td>• Use the SAMMs report to monitor, on a monthly basis, response times to imminent hazard complaints/referrals, as well as fatality reports, and correct data entry errors that occur.</td>
<td>• Cal/OSHA staff ran the OIS SAMMs report on a monthly basis and monitored response times to imminent hazard complaints/referrals, as well as fatality investigations and corrected any data entry errors identified.</td>
<td>• This goal was achieved.</td>
</tr>
<tr>
<td>Outcome Measures</td>
<td>• Respond to 100% of imminent hazard complaints/referrals within one day of receipt.</td>
<td>• 100% of all imminent hazard complaints/referrals were responded to within one day of receipt, as reflected by SAMMs #3 as of December 12, 2018.</td>
<td>• This goal was achieved.</td>
</tr>
<tr>
<td></td>
<td>• Cal/OSHA will also respond to 100% work related fatality reports within one day of receipt.</td>
<td>• 97.77% of work related fatalities (175 out of 179) were opened within one workday, as reflected by SAMMs #10 as of December 20, 2018.</td>
<td>• This goal was not achieved. Four work related fatalities were identified as having a response time greater than one day. After close review of these four fatalities, it was found that: 2 – occurred at active wildfire sites, which Cal/OSHA could not immediately access as the sites were deemed unsafe; and 2 – were opened late</td>
</tr>
